Introduction

This publication provides information about both the number of healthcare professionals actively practicing across the state and a few measures of the health status of the population in South Carolina. This information is presented in several ways:

- area summary tables reporting the number of healthcare professionals with a primary practice site in that area, the age and racial profile of the population in that area, a selection of vital statistics and health status indicators for that area, information about healthcare facilities, and a selection of statistics related to socio-economic conditions that are closely associated with healthcare status and outcomes;
- maps showing the distribution of healthcare professionals by the zip code location of their primary practice setting;
- maps showing the concentration of healthcare professionals having their primary practice in each county, relative to the population in that county;
- tables which show, for each county in the state, the total number of healthcare practitioners who report having either their primary or a secondary practice location within that county. If a provider reports having both a primary and a secondary practice in the same county they are counted only once in the 'primary practice' count. For those providers that have more than one secondary site, they are counted in each unique county location.

This information has been compiled by the South Carolina Office for Healthcare Workforce in the South Carolina Area Health Education Consortium (AHEC) program office housed at the Medical University of South Carolina. We are a neutral entity dedicated to coordinating the development and publication of workforce policy-relevant research across the spectrum of health professions in South Carolina. Funded by the state of South Carolina, our primary goal is the development and analysis of accurate, reliable information on the supply of healthcare professionals and the demand for health services in South Carolina in order to support a wide array of workforce planning efforts. Readers interested in additional information on any of the licensed health professions included in this publication are welcome to contact us directly through our website: www.scohw.org. This report may also be downloaded free of charge from our website.

Sources and Limitations of the Data

Health Professions Data

The health professions data used in this report are collected every other year during the license renewal process by the regulatory boards that oversee each of the following professions: Nurses (including Licensed Practical Nurses, Registered Nurses, Nurse Practitioners, Certified Nurse Anesthetists, Certified Nurse Midwives, and Clinical Nurse Specialists), Physicians, Dentists and Dental Hygienists, Occupational Therapists and Occupational Therapy Assistants, Optometrists, Pharmacists and Pharmacy Technicians, Physical Therapists and Physical Therapy Assistants, Physicians, Physician Assistants, and Respiratory Care Practitioners. New this year is the addition of Clinical Social Workers. Our counts are

restricted to those with a license designation of LISW-Clinical Practice, LISW-Advanced Practice, and LMSW (Master Social Worker). This last group is further restricted to just those employed in non-profit agencies, government agencies and health delivery facilities such as hospitals and hospice.

The data collection process is organized and administered through the South Carolina Department of Labor, Licensing and Regulation, Division of Professional and Occupational Licensing Boards. Although the specific data elements collected during the renewal process are slightly different for each licensed group, each licensure database includes basic demographic, practice, and location information for each of the healthcare profession groups included in this book.

The South Carolina Revenue and Fiscal Affairs Office, Health and Demographics Section (RFA-HDS) is the official repository for statistical data relating to licensed health professionals in South Carolina. The RFA-HDS provided the raw data used to create the counts of healthcare providers having their primary practice in each county in the state and in zip code areas within the state. Missing information for primary practice county¹ or zip code was filled in by looking up practice addresses to verify the correct county and zip code information. Invalid zip codes were corrected using the same method. The corrected county and zip code information for each provider was used to create the maps and tables in this report. Note that the dots in the dot density maps are randomly assigned within the zip code area borders and do not reflect the exact street location of providers.

Definitions and Limitations

State law requires that practitioners in each of the health professions profiled in this report obtain a license to practice.² However, counting all practitioners with an active license to practice would overstate the size of the actual workforce. Healthcare practitioners may change their work status over time from full to part time; by temporarily leaving the workforce to care for family members; by retiring; by moving to another state but maintaining their South Carolina license; or by maintaining their license but working in another field. To avoid that problem, ***the counts of licensed healthcare professionals reported here include only those individuals holding an active license to practice and actively practicing in their field within the state of South Carolina.*** Note that this definition may include educators, researchers and administrators who do not engage in direct patient care but are still actively engaged in their profession and the workforce.

The result may be a conservative count of the healthcare workforce due to the fact that new licensees (those immigrating into South Carolina from another state, or new graduates receiving their initial license to practice in South Carolina) may not be required to report their employment or practice status in their initial license application, and thus might not be captured in the workforce definition until they have gone through the license renewal process. Depending on when a new licensee receives their initial license to practice, they may be a productive part of the workforce for as much as two years before they are reflected in official workforce counts. However, established healthcare providers also retire, die, or leave practice every day for a variety of reasons as well. These two groups tend to balance each other out in a stable workforce. Understanding whether a specific health profession is growing or shrinking requires tracking these in- and out-migrations over time.

¹ Some healthcare providers practice in more than one location.

² An exception is made for physicians and nurses who practice solely within a federal or military facility such as a Veterans Administration hospital.

The time periods on which our workforce counts are based differ for each professional group. The license renewal process occurs on a biennial cycle (every two years) for most, but not all, health professions. The Department of Labor, Licensing and Regulation, Division of Professional and Occupational Licensing Boards administers license renewals in South Carolina. Timelines for license renewal are specified within the practice acts of each professional group, with different groups renewing at different times of the year. This produces a staggered effect in the data collection periods. As a result, it is not possible to produce a true 'snapshot' of the healthcare workforce in South Carolina at a single point in time. Also, because licensee information is updated on a biennial cycle for the majority of health professions, it is difficult to get a truly accurate count of the workforce since people are both entering and leaving the workforce over that two year time period.

The table below shows the months and years during which information was gathered for each of the groups included in this report. Some regulatory boards may allow a grace period that, in effect, extends the license renewal period beyond the official end date. The data provided by the RFA-HDS for this report allows an additional two-month period beyond the last day of the renewal in order to account for processing time or periods of grace that may have been extended by the regulatory boards.

Profession	License Renewal Period on Which Counts are Based
Clinical Nurse Specialists	February 1 - April 30, 2016
Certified Registered Nurse Anesthetists	February 1 - April 30, 2016
Dentists	October 15 - December 31, 2017
Dental Hygienists	October 15 - December 31, 2017
Licensed Practical Nurses	February 1 - April 30, 2016
Nurse Midwives	February 1 - April 30, 2016
Nurse Practitioners	February 1 - April 30, 2016
Occupational Therapists	January 1 - March 15, 2017
Occupational Therapy Assistants	January 1 - March 15, 2017
Optometrists	August 1 - September 30, 2017
Pharmacists	March 1 - April 30, 2017
Pharmacy Technicians	April 1 - June 30, 2017
Physical Therapists	October 15 - December 31, 2017
Physical Therapy Assistants	October 15 - December 31, 2017
Physicians	April 15 - June 30, 2017
Physician Assistants	October 1 - December 31, 2017
Registered Nurses	February 1 - April 30, 2016
Respiratory Care Practitioners	January 1 – May 30, 2017
Social Workers	November 1 – December 31, 2017

This version of the SC Health Professions Data Book counts every physician with a practice site in South Carolina as among the state's physician workforce, except for those employed in military or federal facilities which serve the armed services community. Physicians are classified by their self-reported specialty area of practice. Doctors of Medicine (MDs) and Doctors of Osteopathy (DOs) are grouped together in the counts. Both types of physicians are awarded the same privilege to practice by the South Carolina Board of Medicine. Physician counts in this book include physicians enrolled in graduate medical education programs (residency programs and fellowships). These physicians-in-training contribute a significant amount of care to South Carolina citizens. The 1,432 "residents" who were actively practicing in the state at the time this information was collected made up approximately 11% of the entire physician workforce.

The physicians whose primary practice was in federal or military facilities and who indicate their employer as "Federal, Military" or "Federal, Civilian" are not included in any of the physician counts in this book, with the exception of those that had their primary practice in a federally-qualified community health center or rural health center. They are counted among the civilian physician workforce because they provide services to the civilian population.

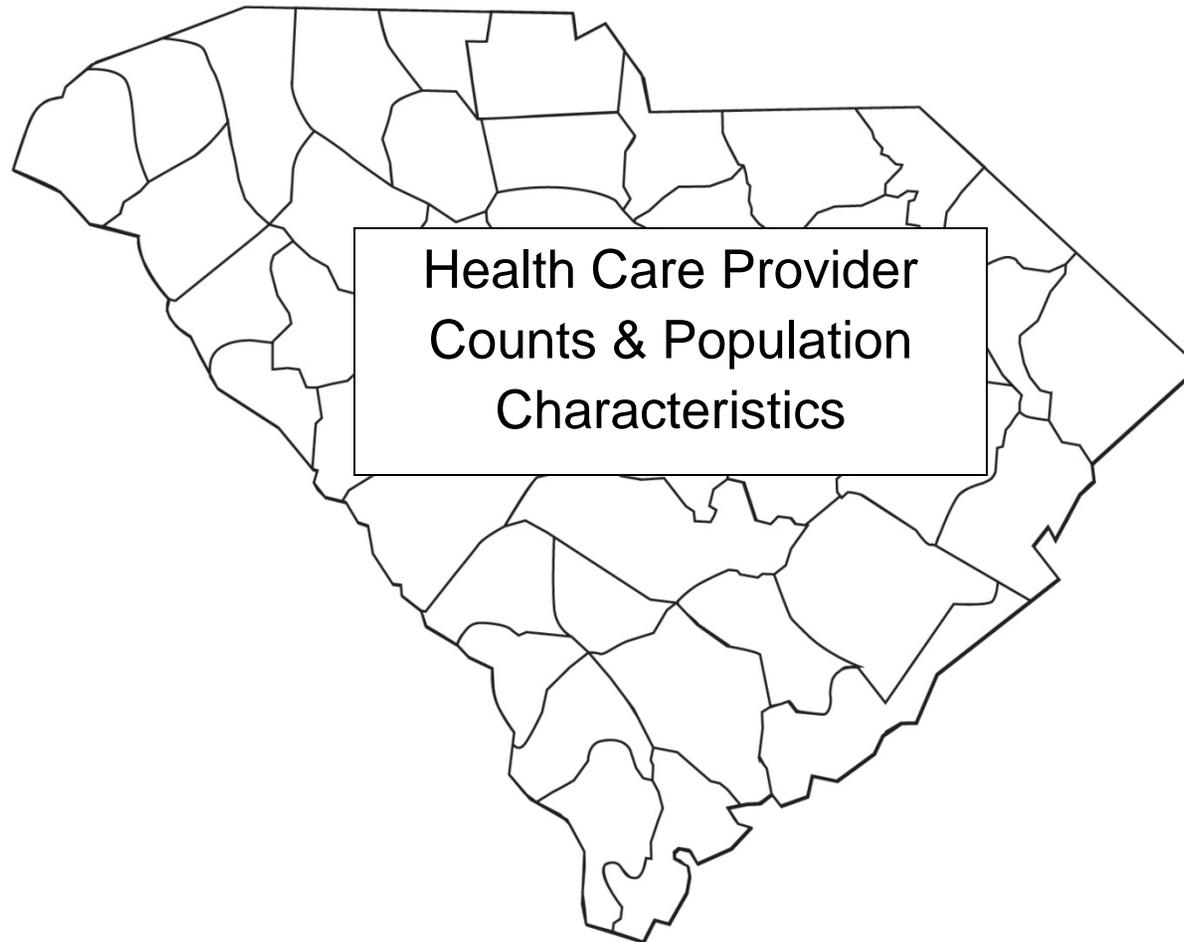

Population Data Source

Information on area population by age and race is from the U.S. Census Bureau 2017 abridged race post-census estimates released by the National Center for Health Statistics. County level age and race summary tables were provided by the Health and Demographics Section of the Revenue and Fiscal Affairs Office. Regional aggregations were created by the South Carolina Office for Healthcare Workforce staff.

Demographic, Health Facility and Economic Data

This publication also includes information on different types of health status in the population - vital statistics such as births, deaths and pregnancies; hospital and nursing home beds in an area; hospital discharges within resident's home county; and socio-demographic indicators for the area population such as unemployment, education, income and insurance coverage. Definitions of each statistic and its source can be found in Appendix I: *Data Definitions and Sources*.

In addition to reporting information at the county level, data has also been aggregated into regional summaries. There are several different regional definitions included in this book that are used by one or more governmental agencies for planning or program implementation purposes. These include: AHEC regions, DHEC planning regions, perinatal care regions, and Workforce Investment Board regions. We also include two different definitions of the urban and rural areas of our state. The source and definitions for each regional categorization can be found in Appendix I, while a list of the counties included in each region can be found in Appendix II: *Regional Definitions*.

Counties of South Carolina

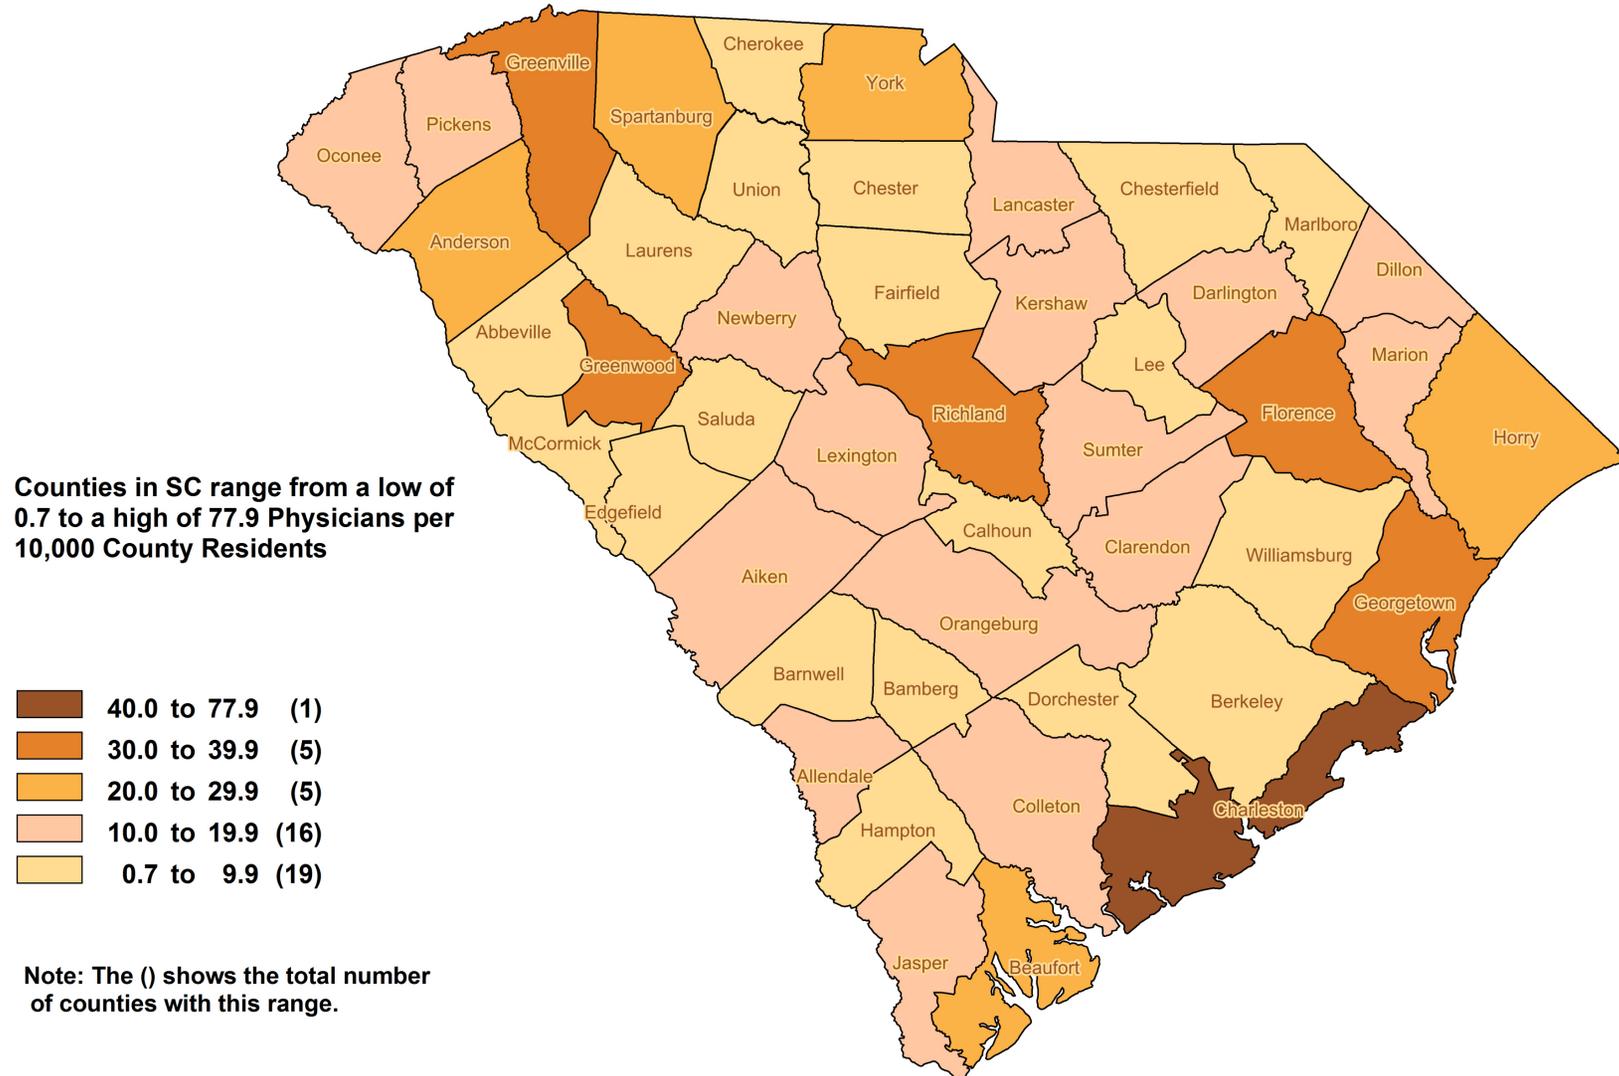

Total Physicians in South Carolina by Primary Practice Location

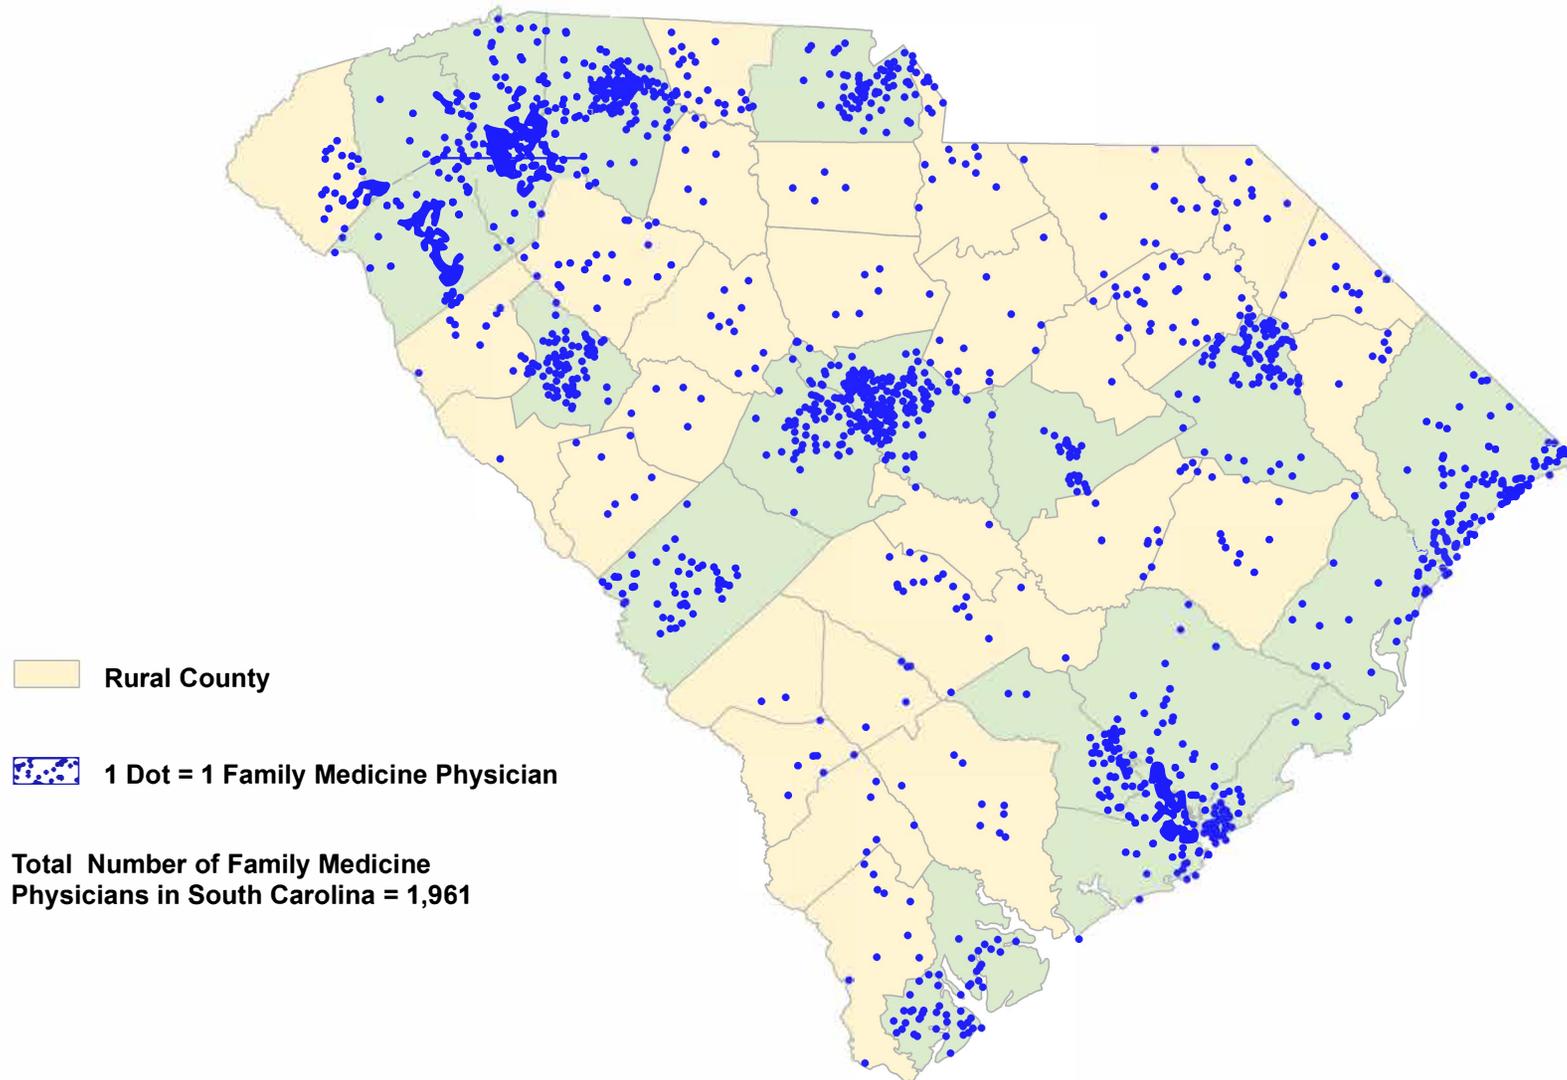

This information is based on all non-federal Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Physicians in residency training programs are included in these numbers. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 15 Physicians who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of All Physicians Per 10,000 Population

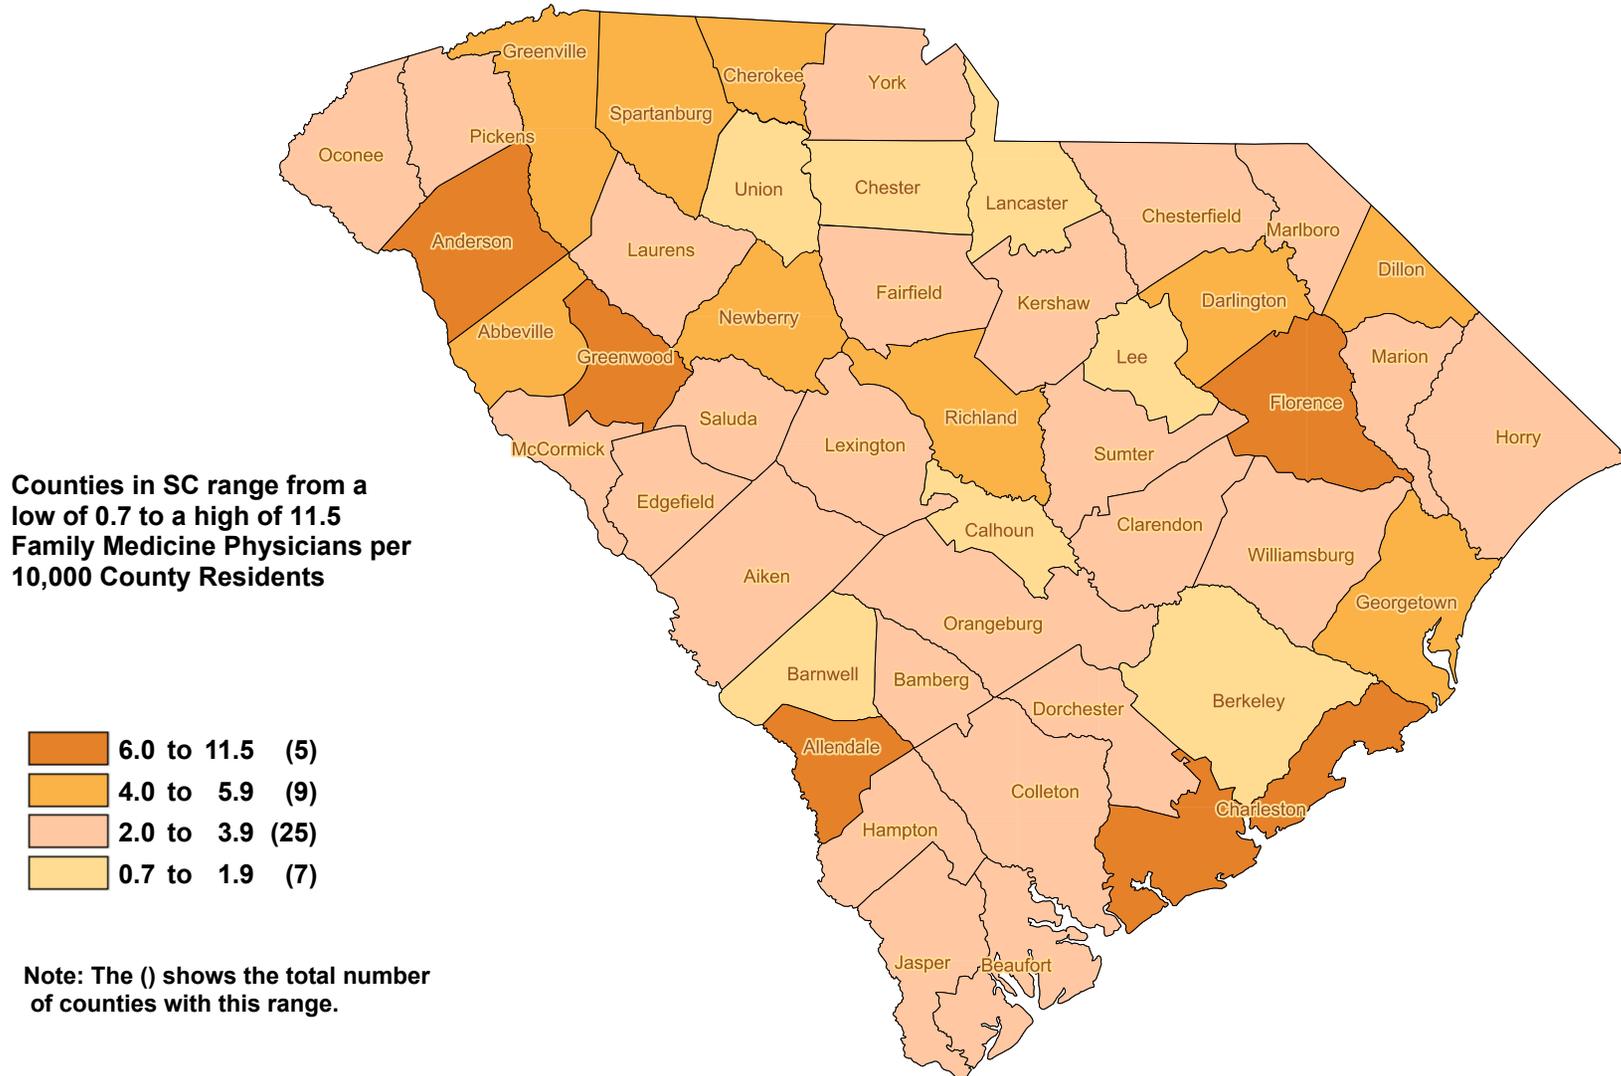

This information is based on all Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on their primary practice location.

Family Medicine Physicians in South Carolina by Primary Practice Location

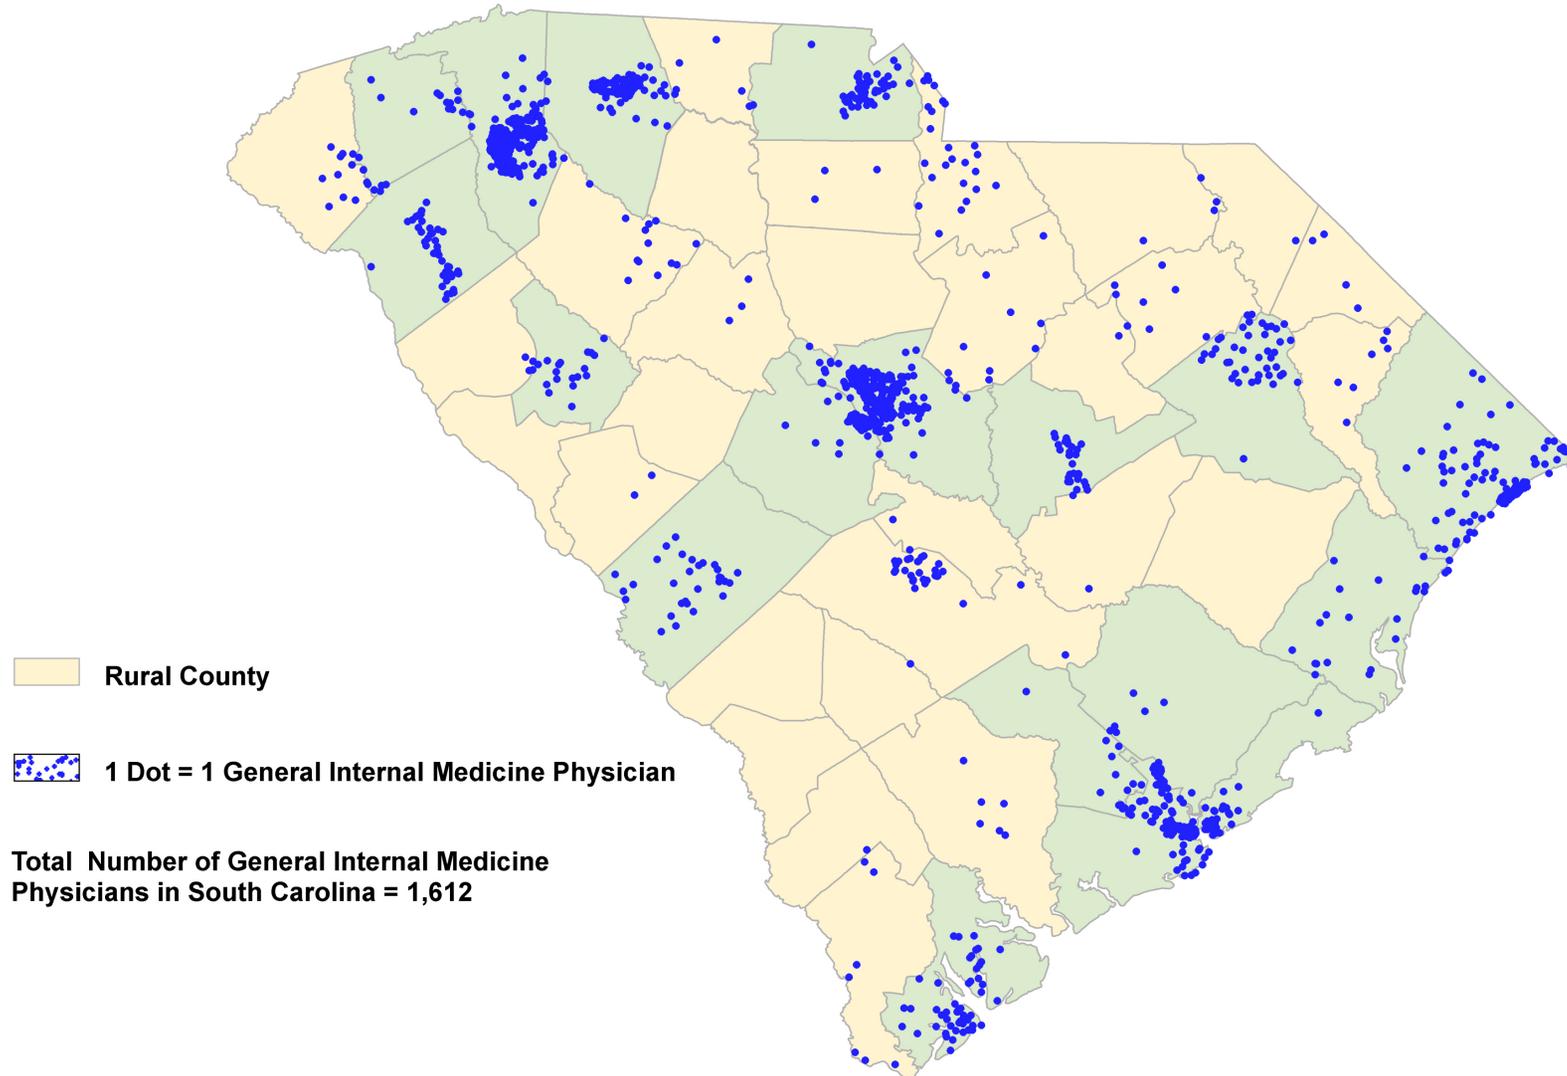

This information is based on all Family Medicine and General Practice Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Family Medicine Physicians Per 10,000 Population

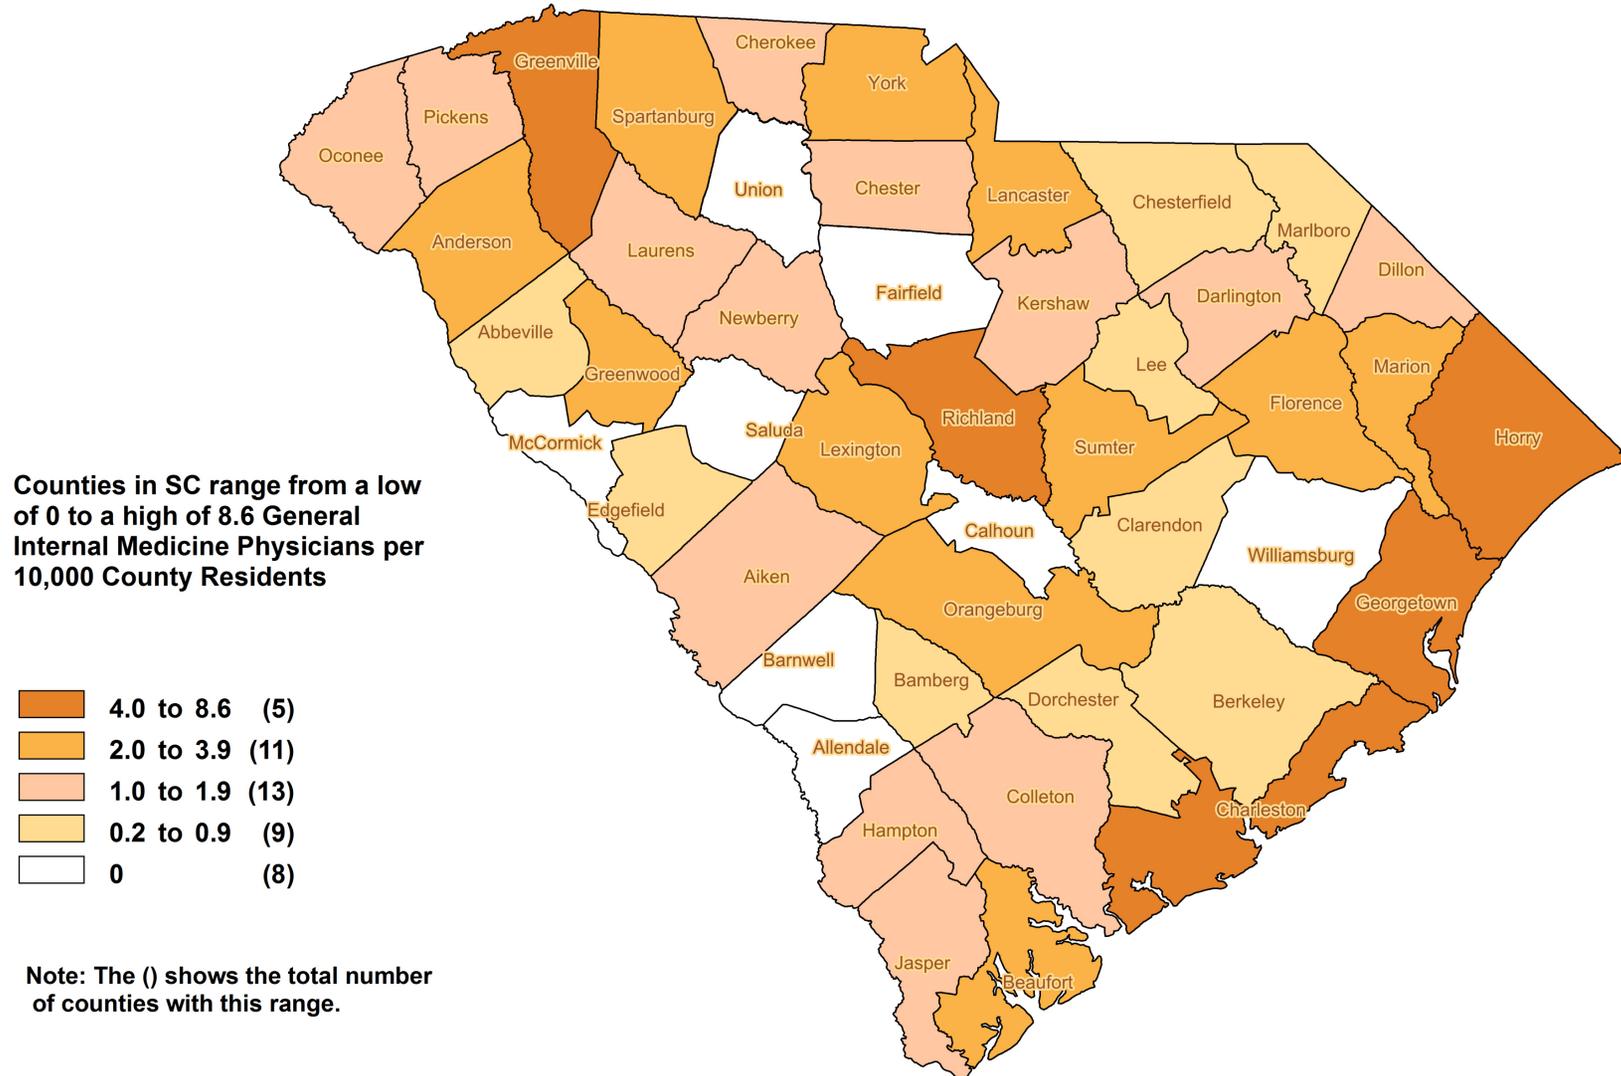

This information is based on all Family Medicine and General Practice Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on their primary practice location.

General Internal Medicine Physicians in South Carolina by Primary Practice Location

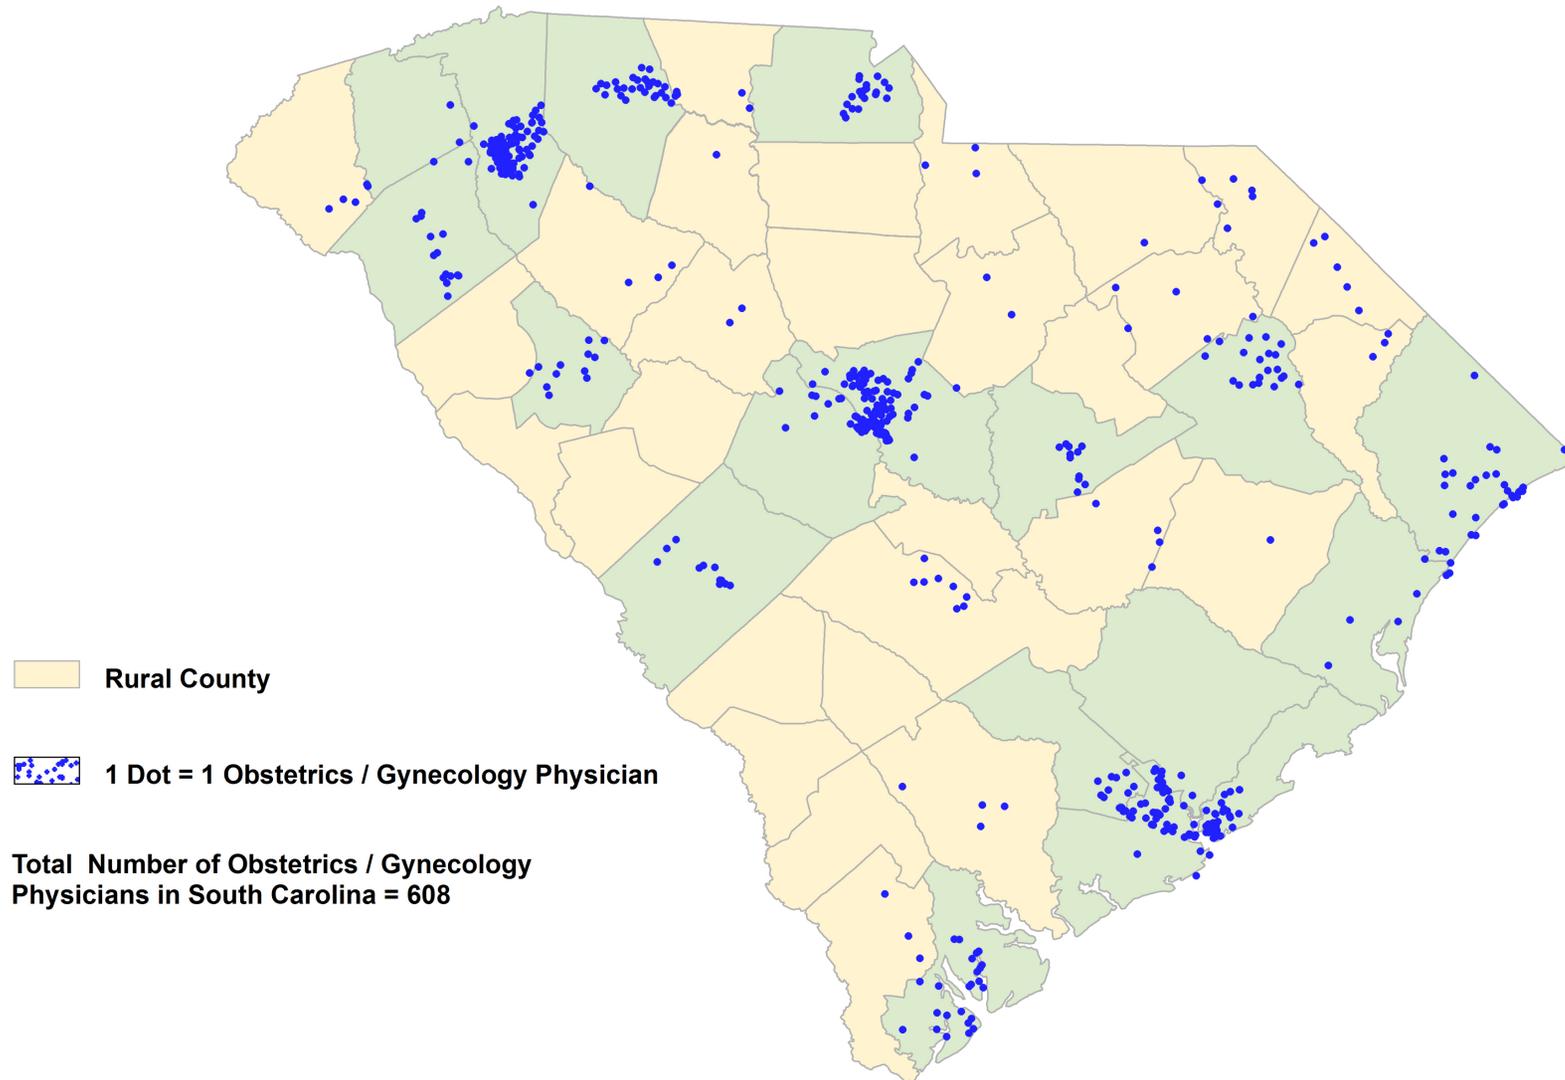

This information is based on all General Internal Medicine Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 2 Internal Medicine Physicians who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of General Internal Medicine Physicians Per 10,000 Population

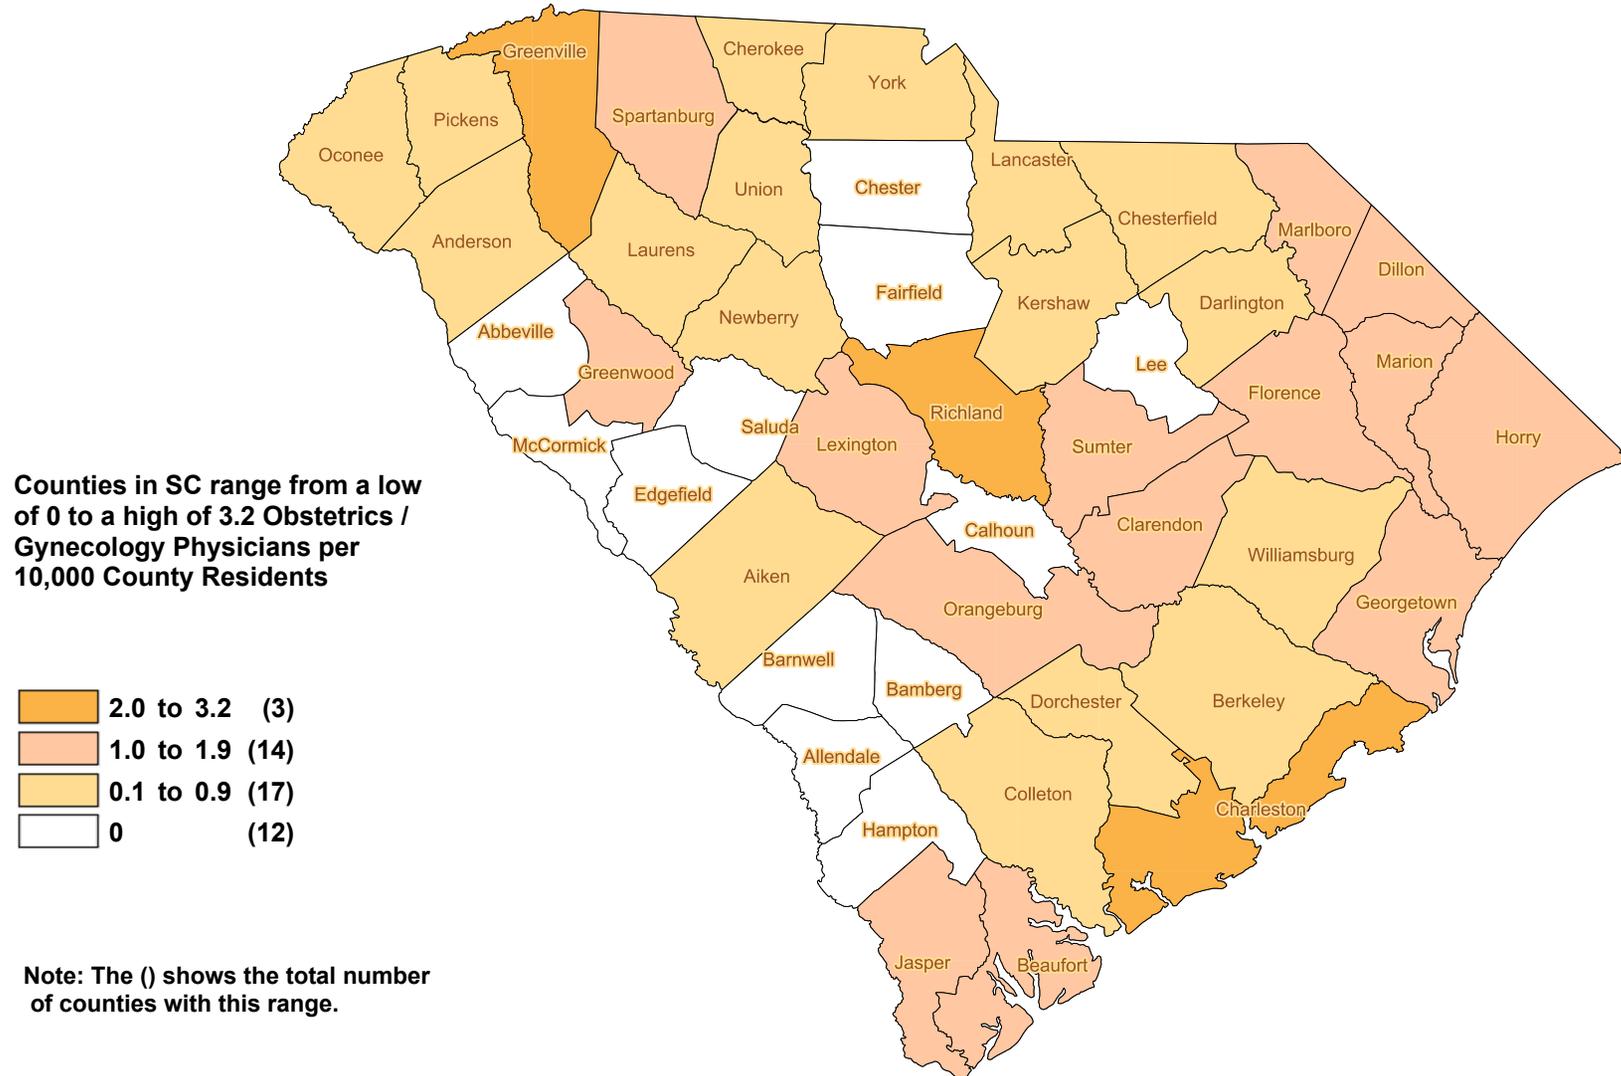

This information is based on all General Internal Medicine Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on their primary practice location.

Obstetrics / Gynecology Physicians in South Carolina by Primary Practice Location

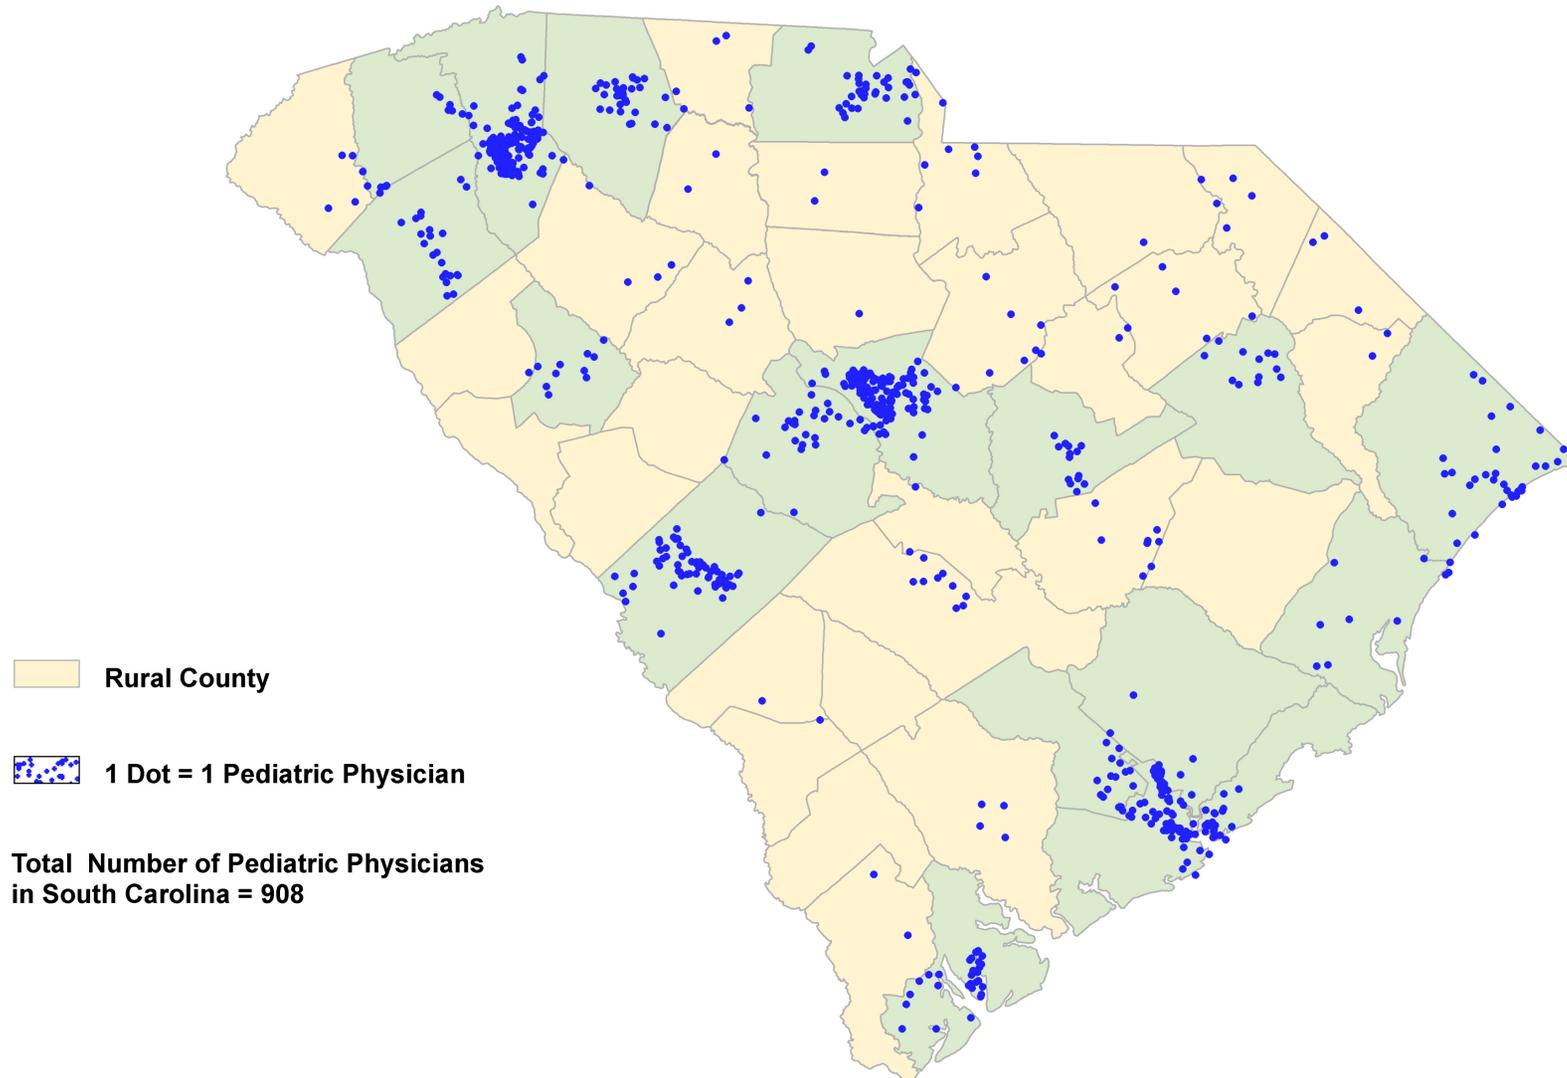

This information is based on all Obstetrics / Gynecology Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Obstetrics / Gynecology Physicians Per 10,000 Population

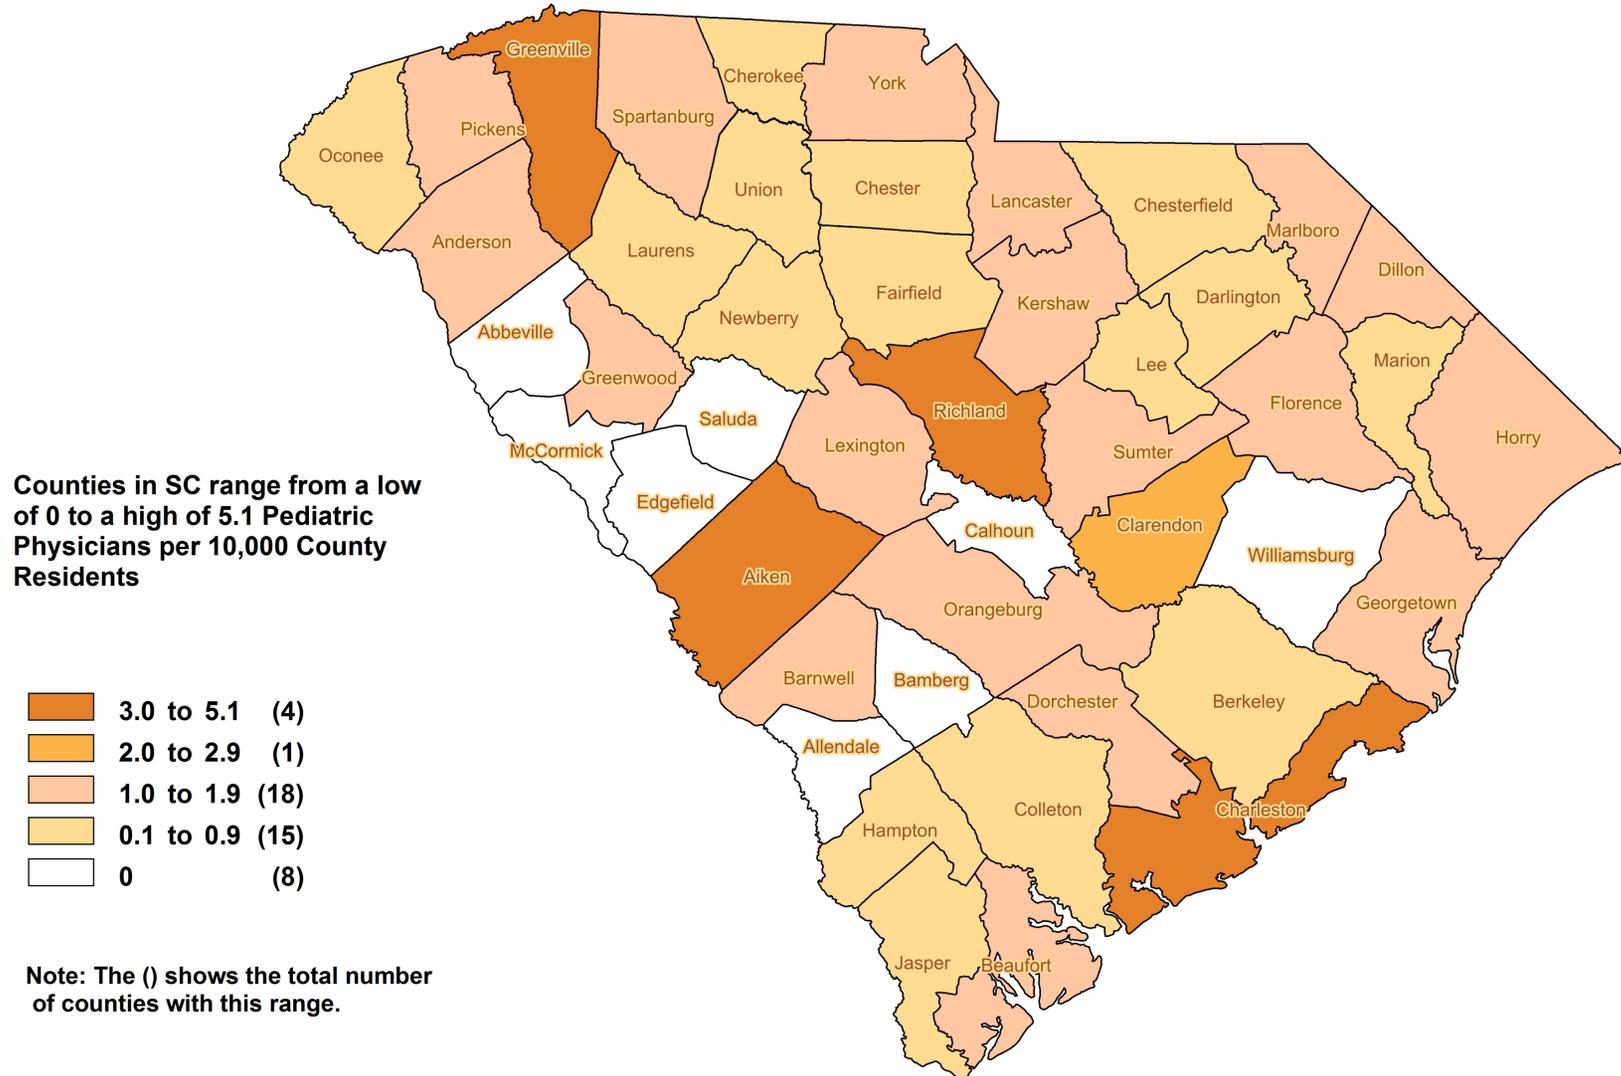

This information is based on all Obstetrics / Gynecology Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on their primary practice location.

Pediatric Physicians in South Carolina by Primary Practice Location

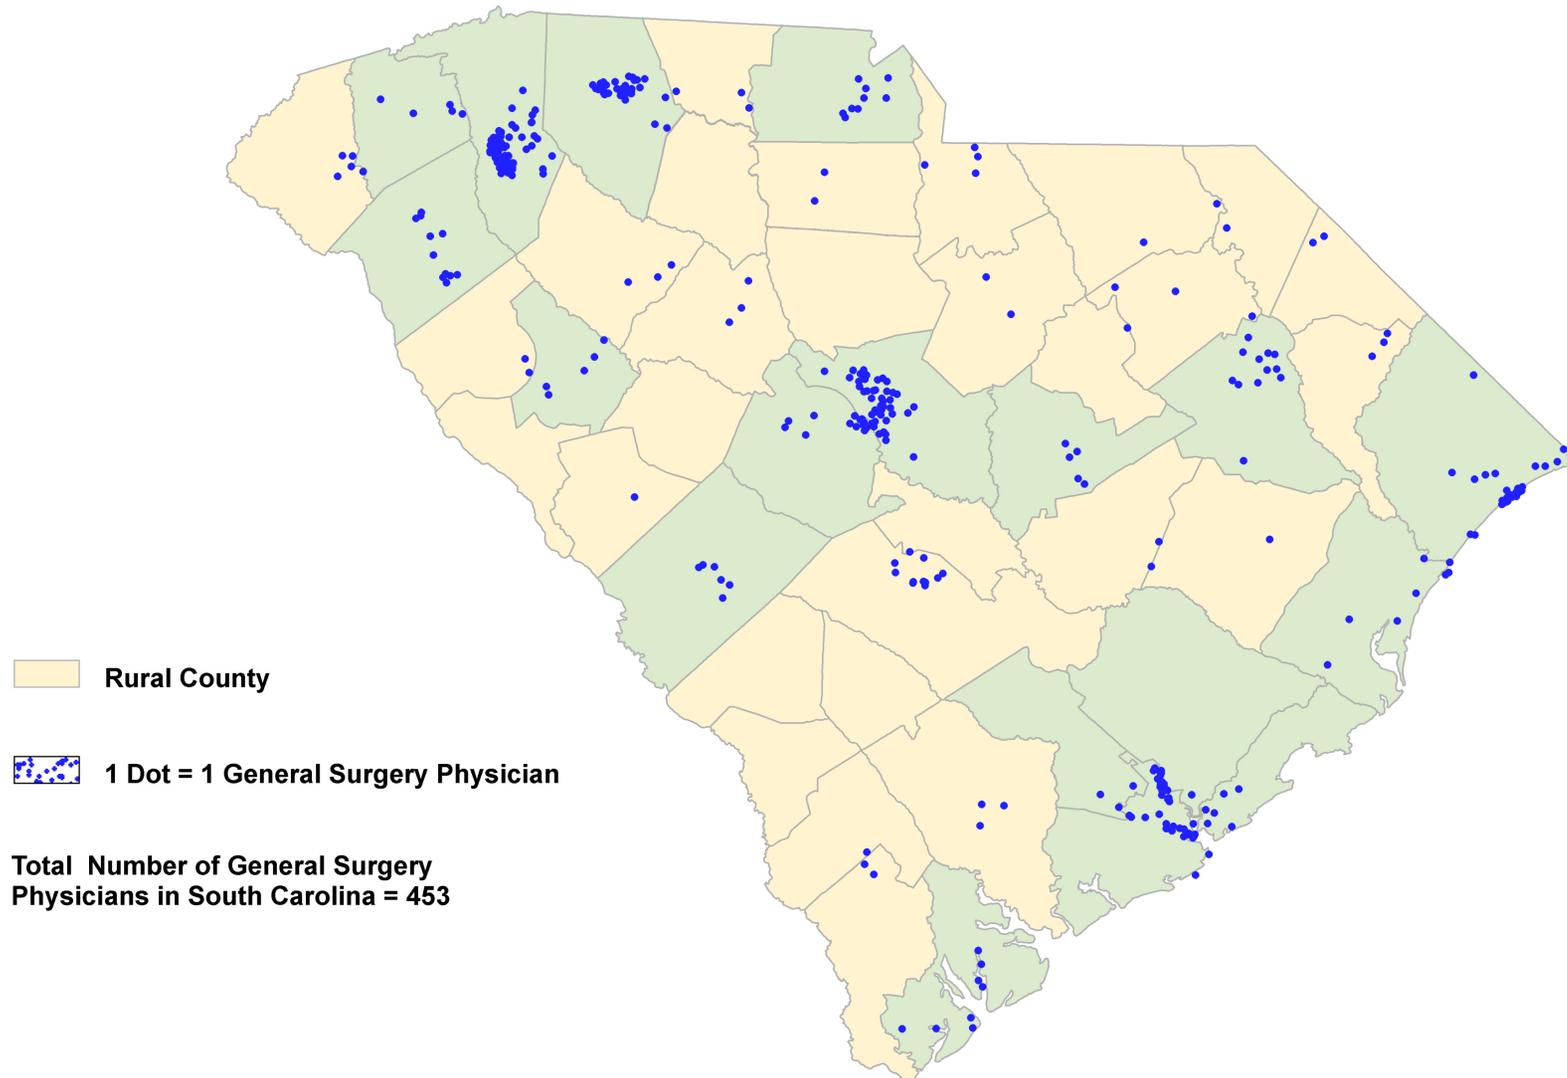

This information is based on all Pediatric Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Pediatric Physicians Per 10,000 Population

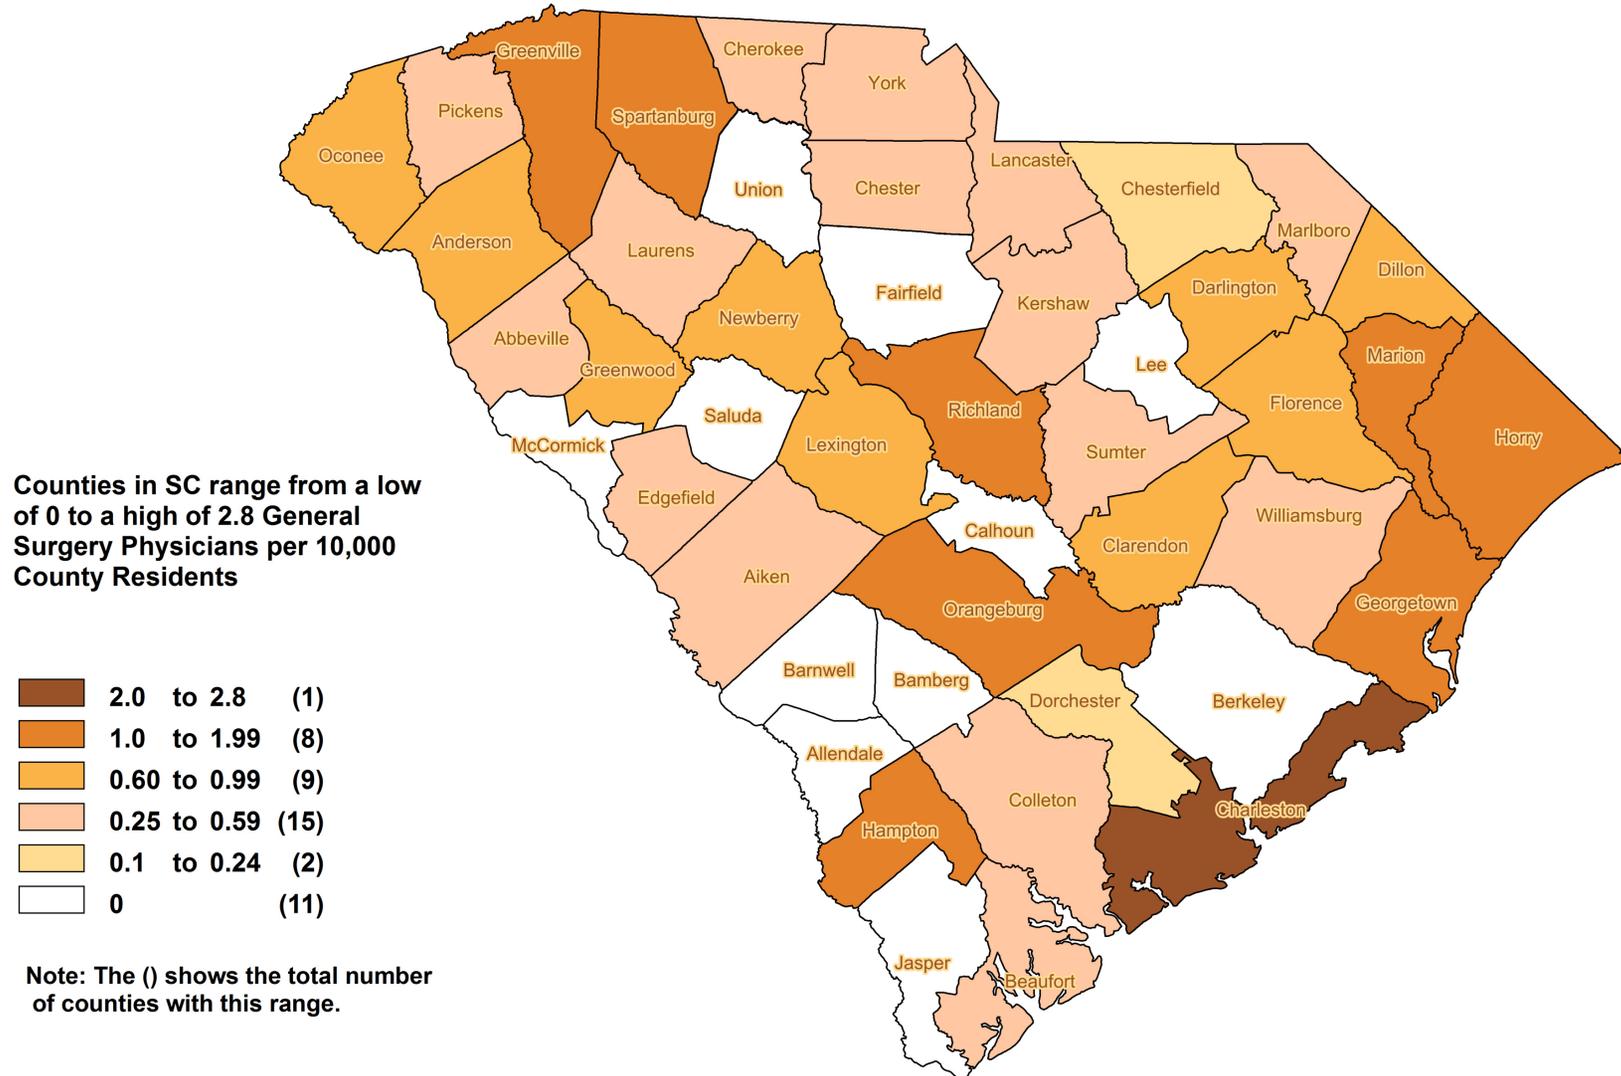

This information is based on all Pediatric Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on their primary practice location.

General Surgery Physicians in South Carolina by Primary Practice Location

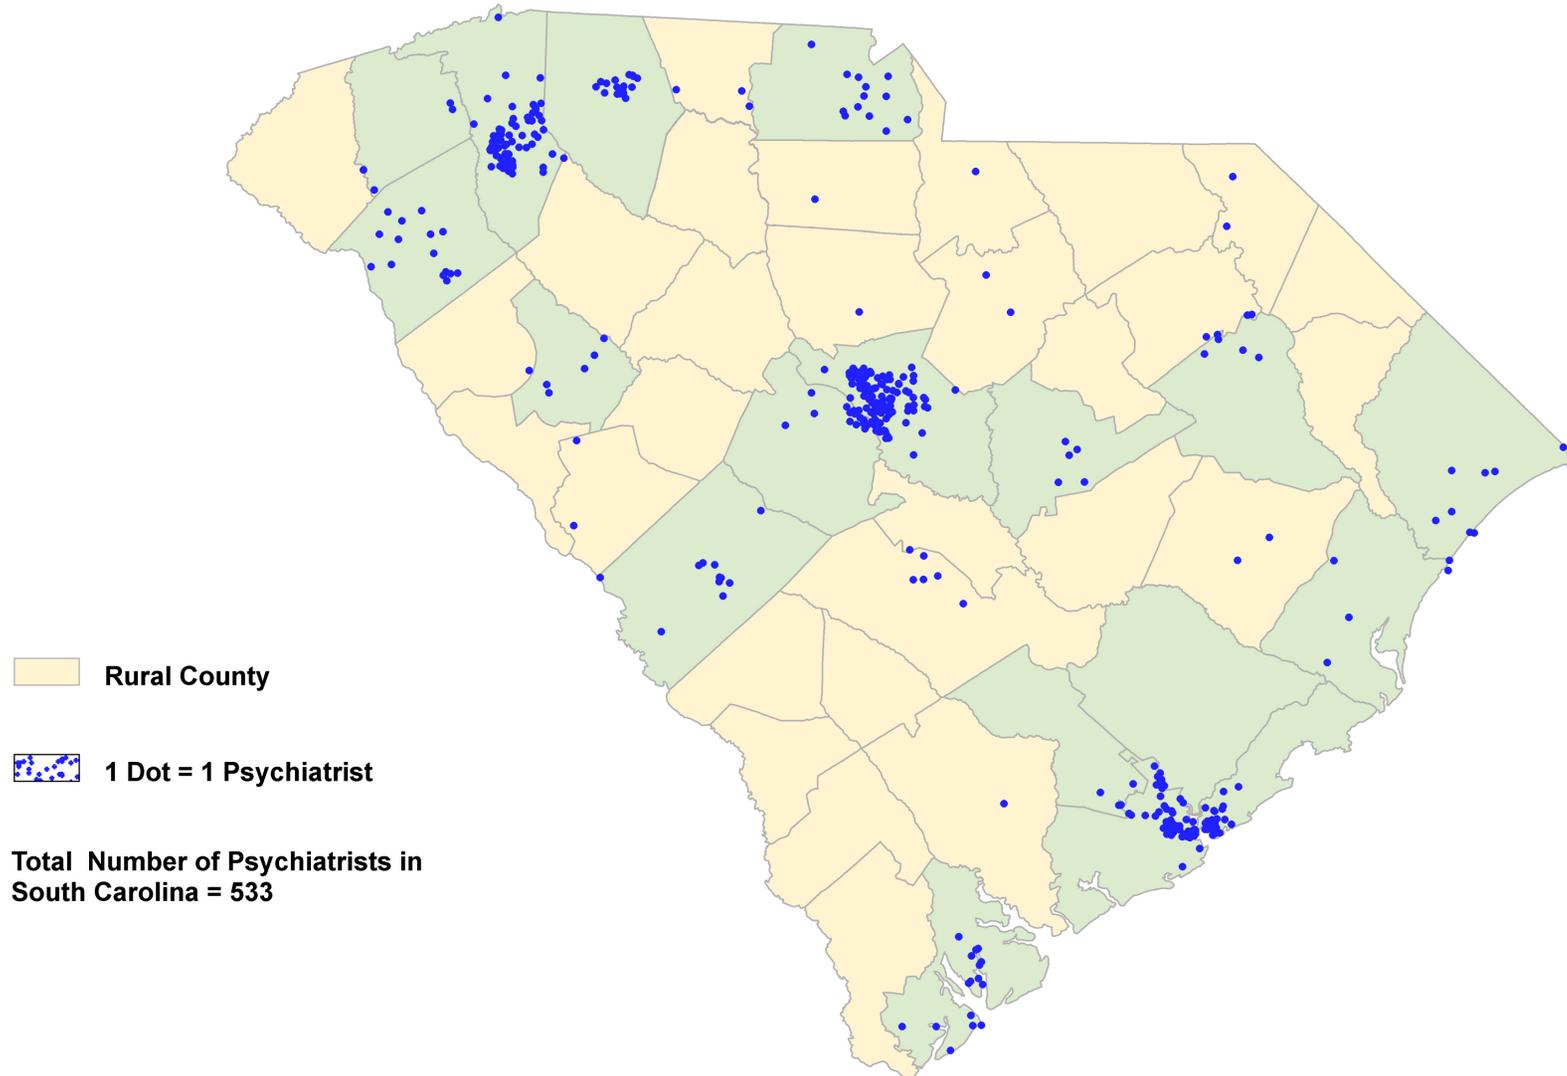

This information is based on all General Surgery Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of General Surgery Physicians Per 10,000 Population

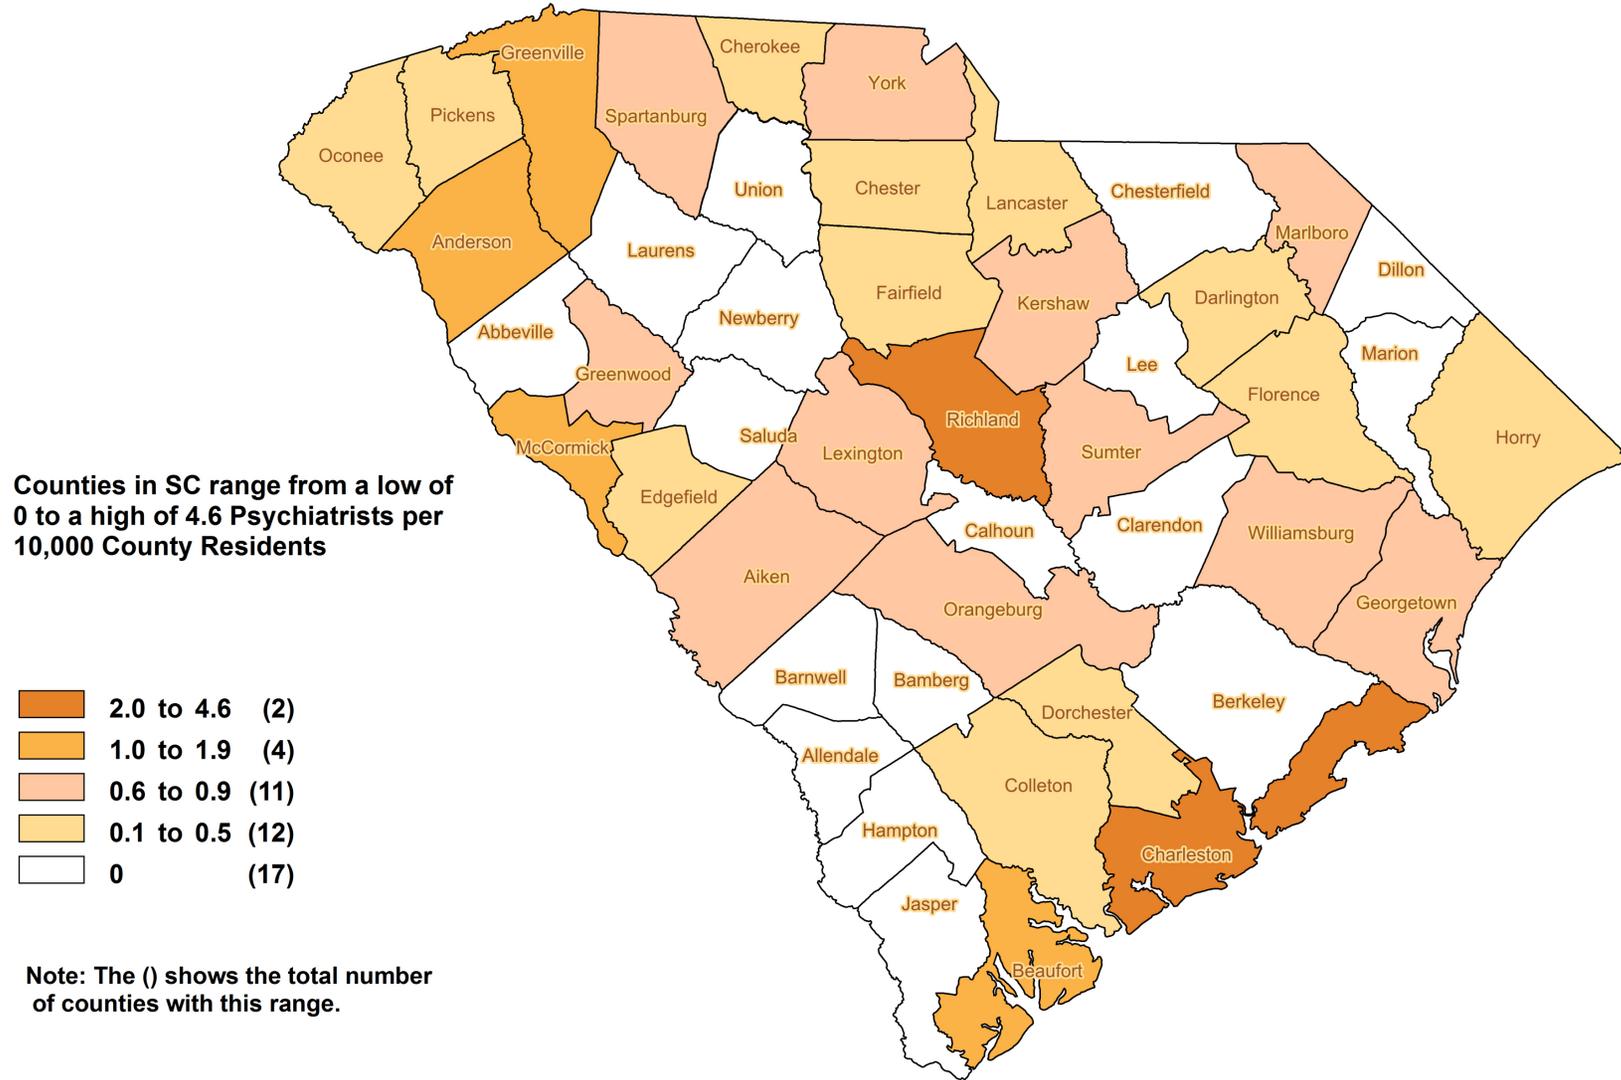

This information is based on all General Surgery Physicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on their primary practice location.

Psychiatrists in South Carolina by Primary Practice Location

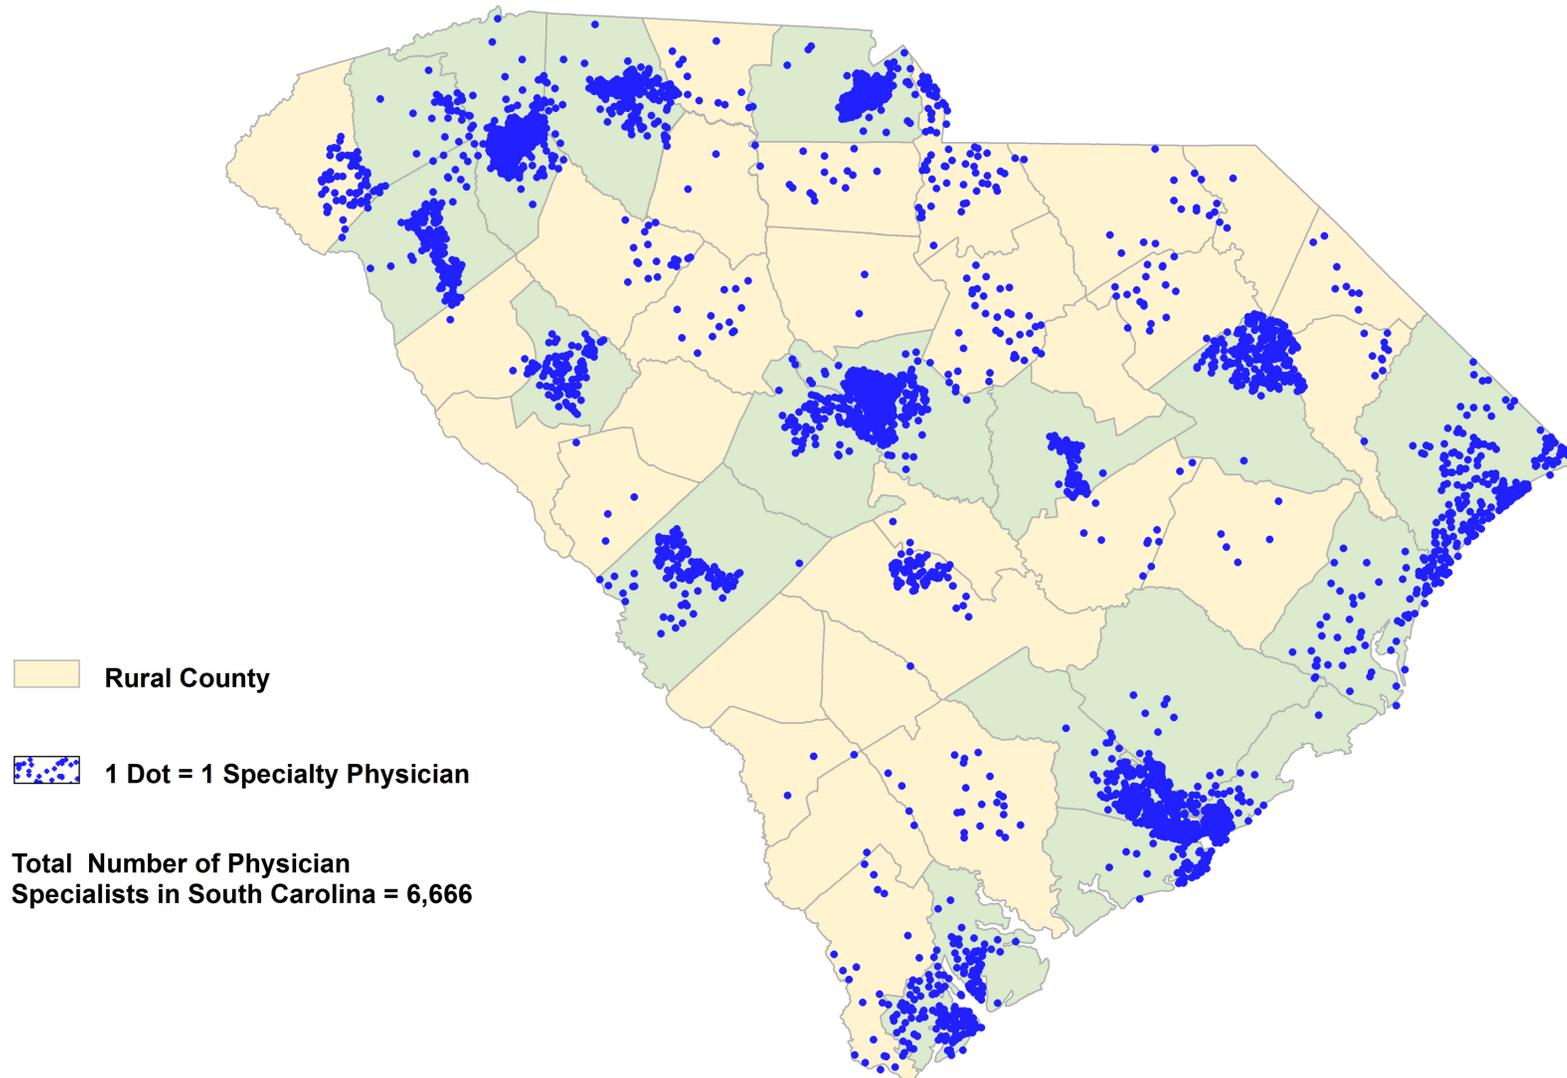

This information is based on all Psychiatrists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 3 Psychiatrists who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Psychiatrists Per 10,000 Population

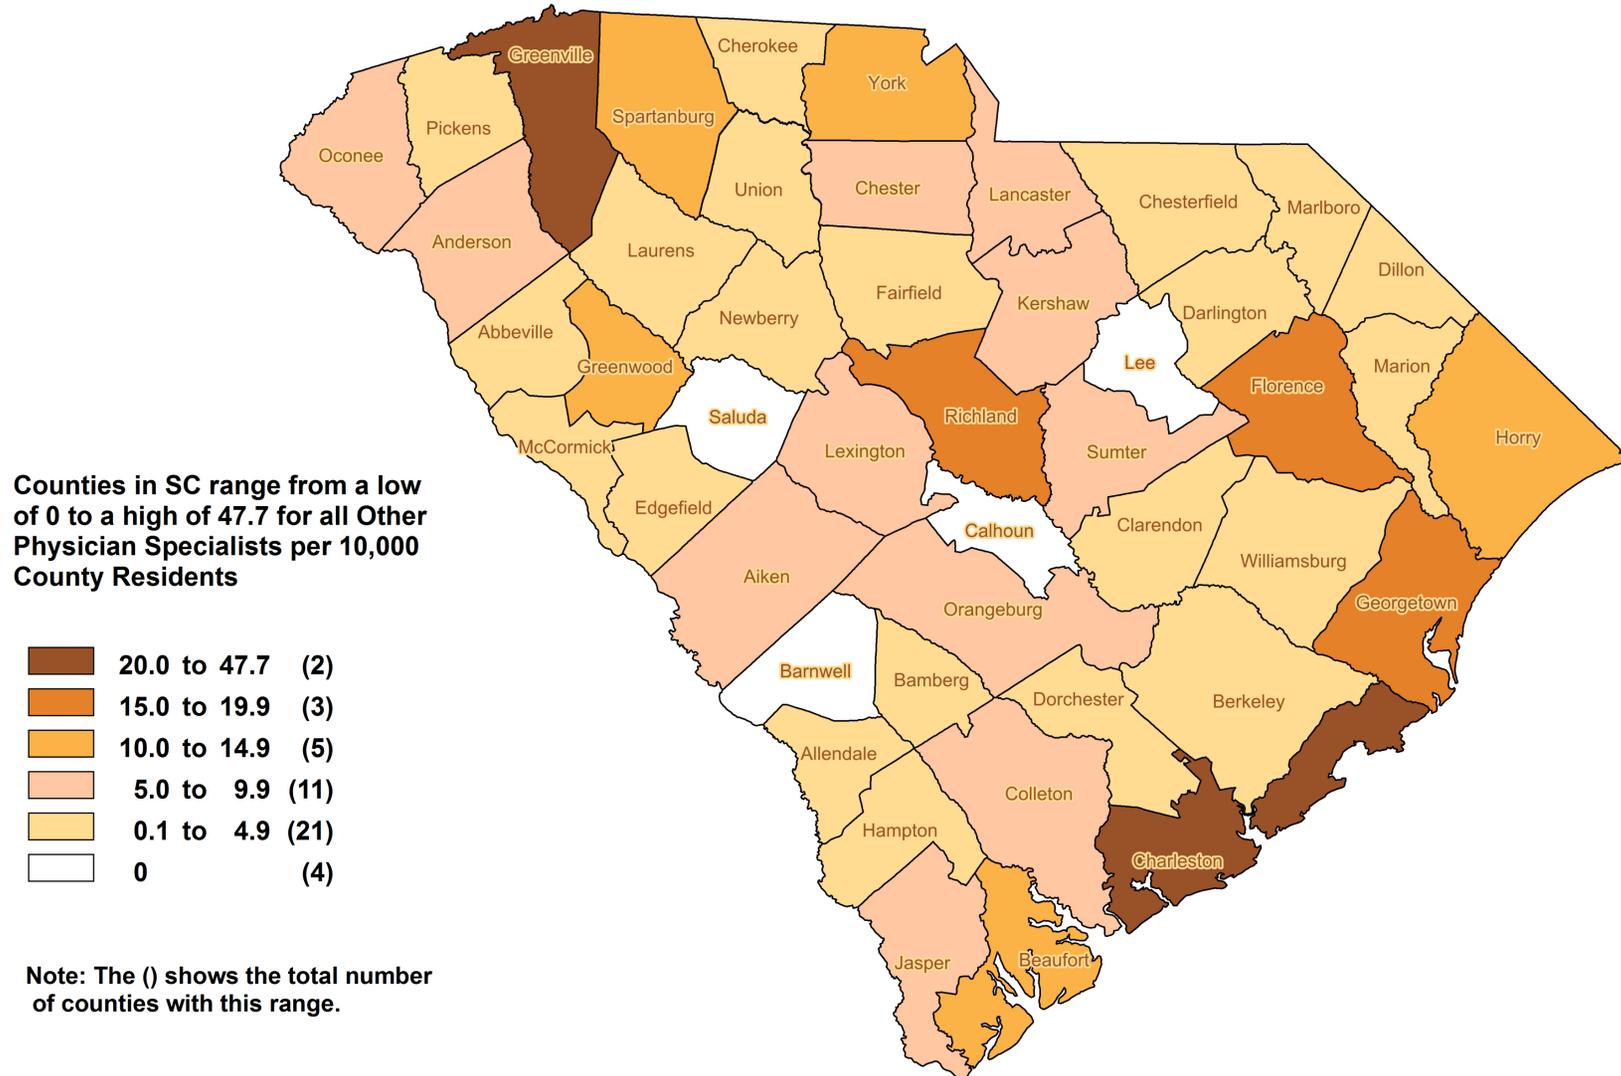

This information is based on all Psychiatrists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on their primary practice location.

All Other Physician Specialists in South Carolina by Primary Practice Location

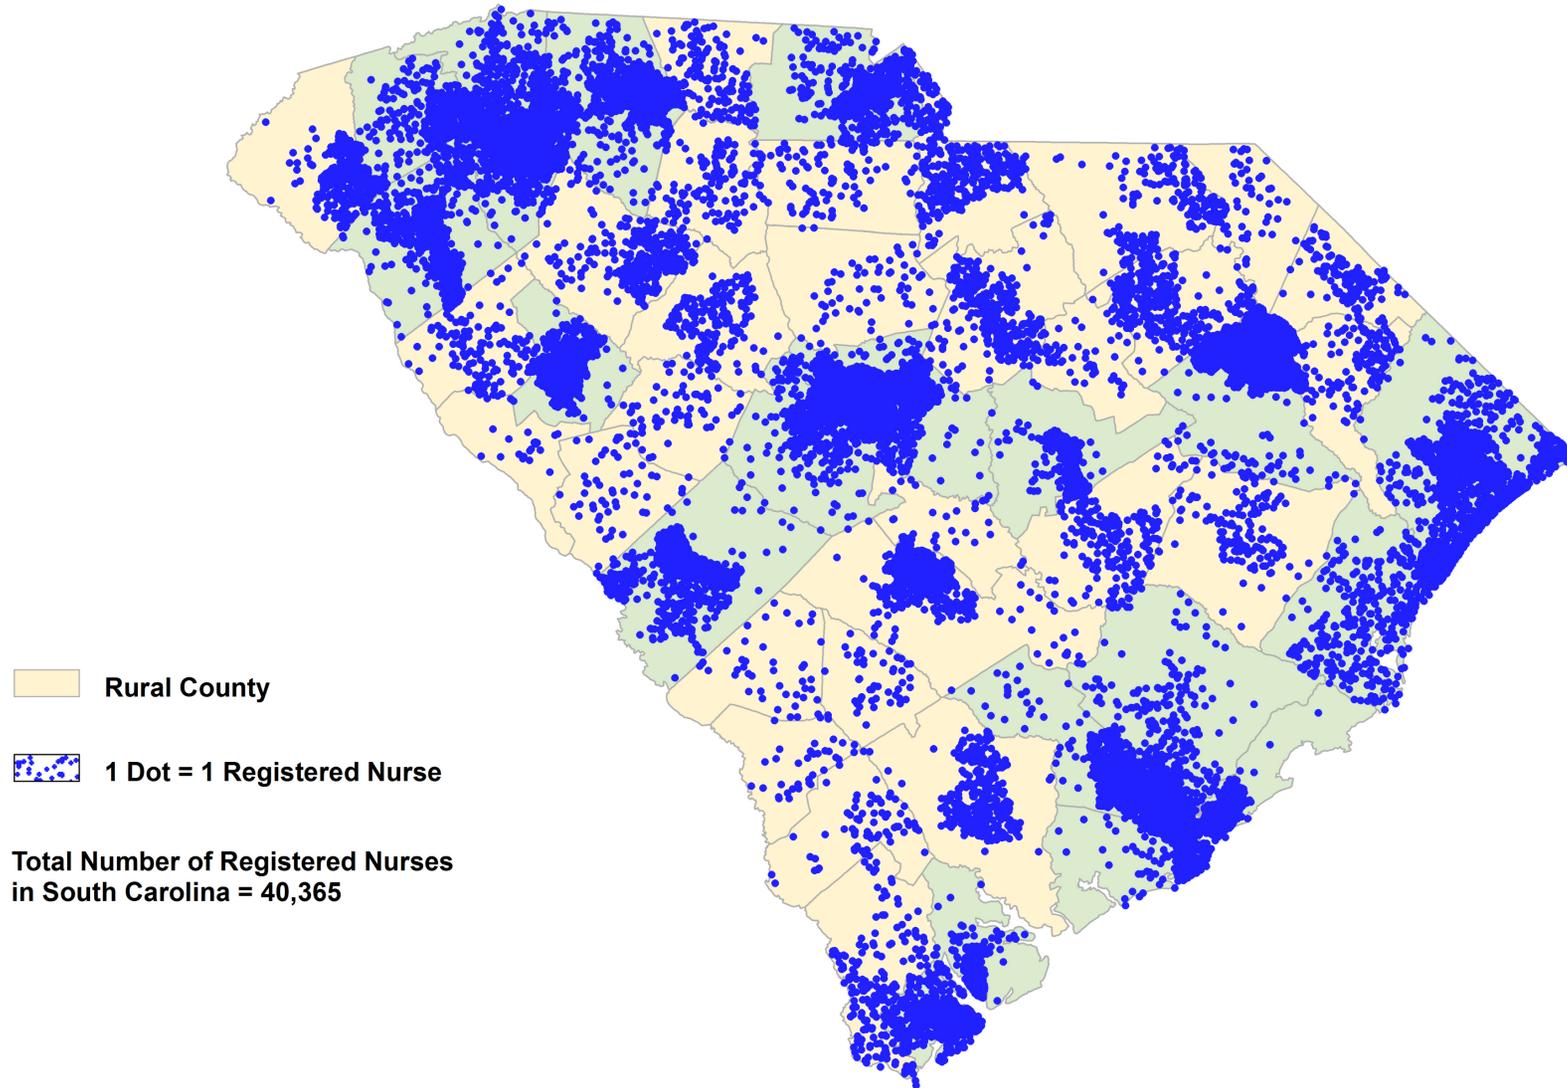

This information is based on all Physicians who named their specialty area as anything other than General Practice, Family Medicine, Internal Medicine, Pediatrics, Obstetrics, Gynecology, Psychiatry or General Surgery with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 10 Specialty Physicians who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of All Other Physician Specialists Per 10,000 Population

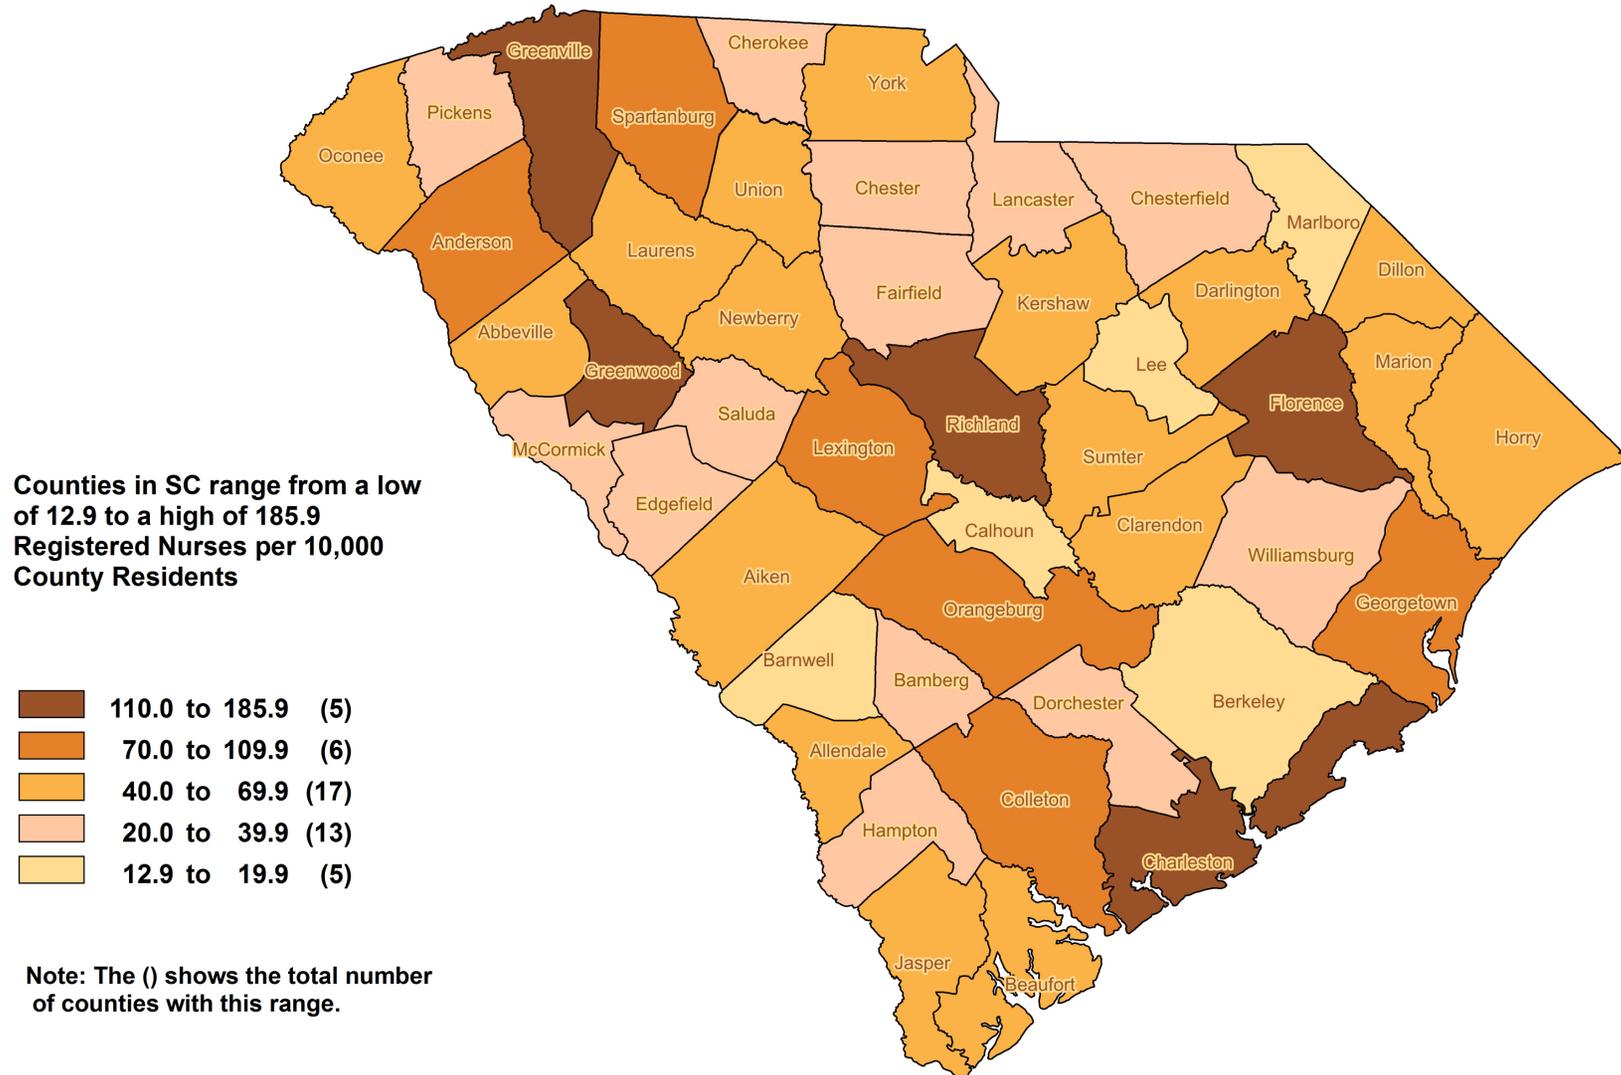

This information is based on all Other Physician Specialists (does not include family medicine, general internal medicine, Obstetric/gynecology, pediatrics, general surgeons or psychiatrists) with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on their primary practice location.

Registered Nurses in South Carolina by Primary Practice Location

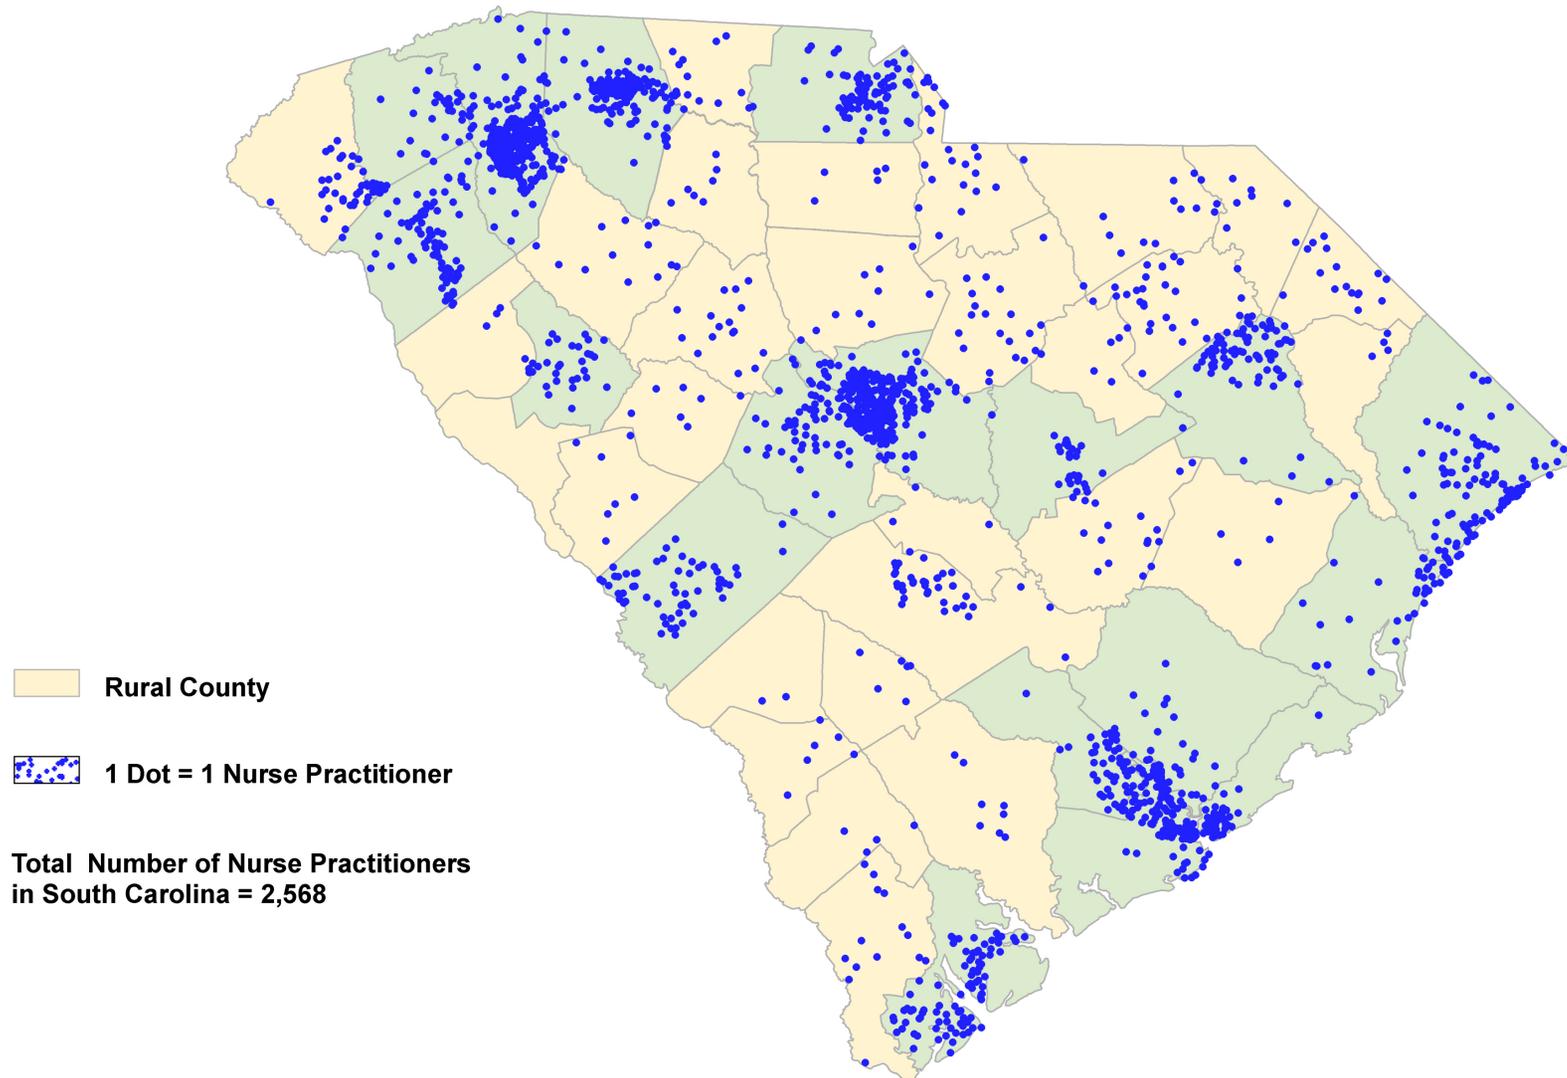

This information is based on all Registered Nurses excluding Advanced Practice RNs, with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 45 Registered Nurses who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Registered Nurses Per 10,000 Population

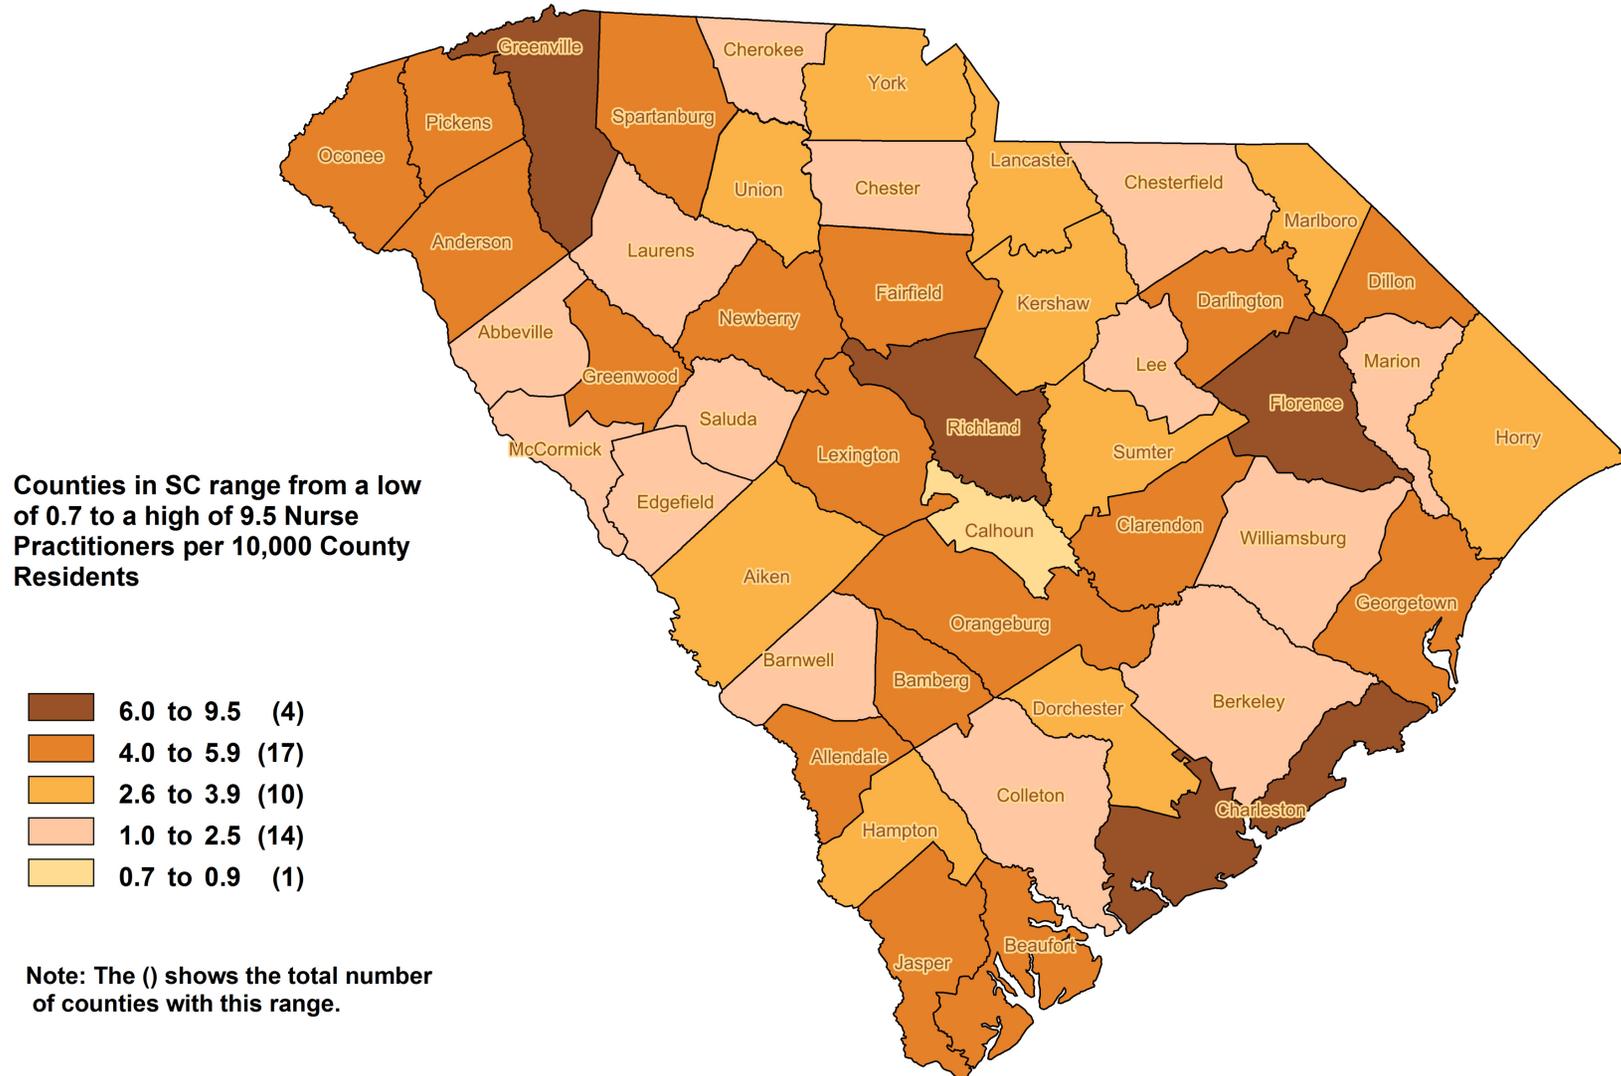

This information is based on all Registered Nurses (excluding Advanced Practice Nurses) with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Provider counts are based on their primary practice location.

Nurse Practitioners in South Carolina by Primary Practice Location

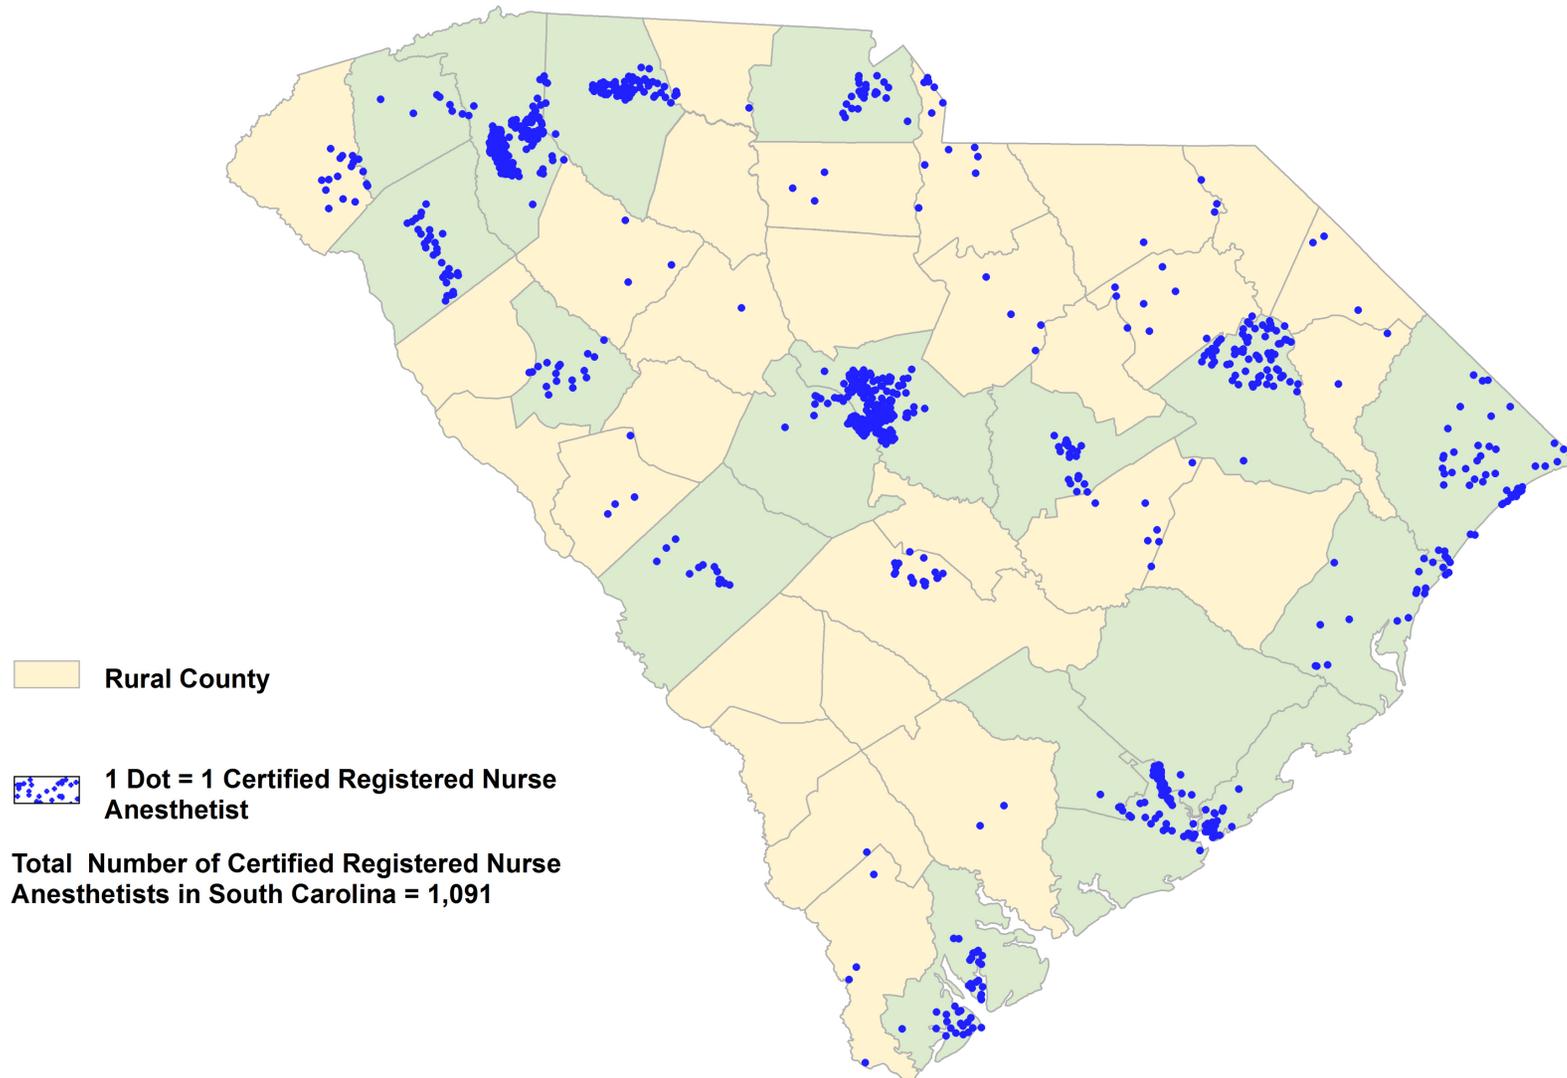

This information is based on all Nurse Practitioners with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 71 Nurse Practitioners who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Nurse Practitioners Per 10,000 Population

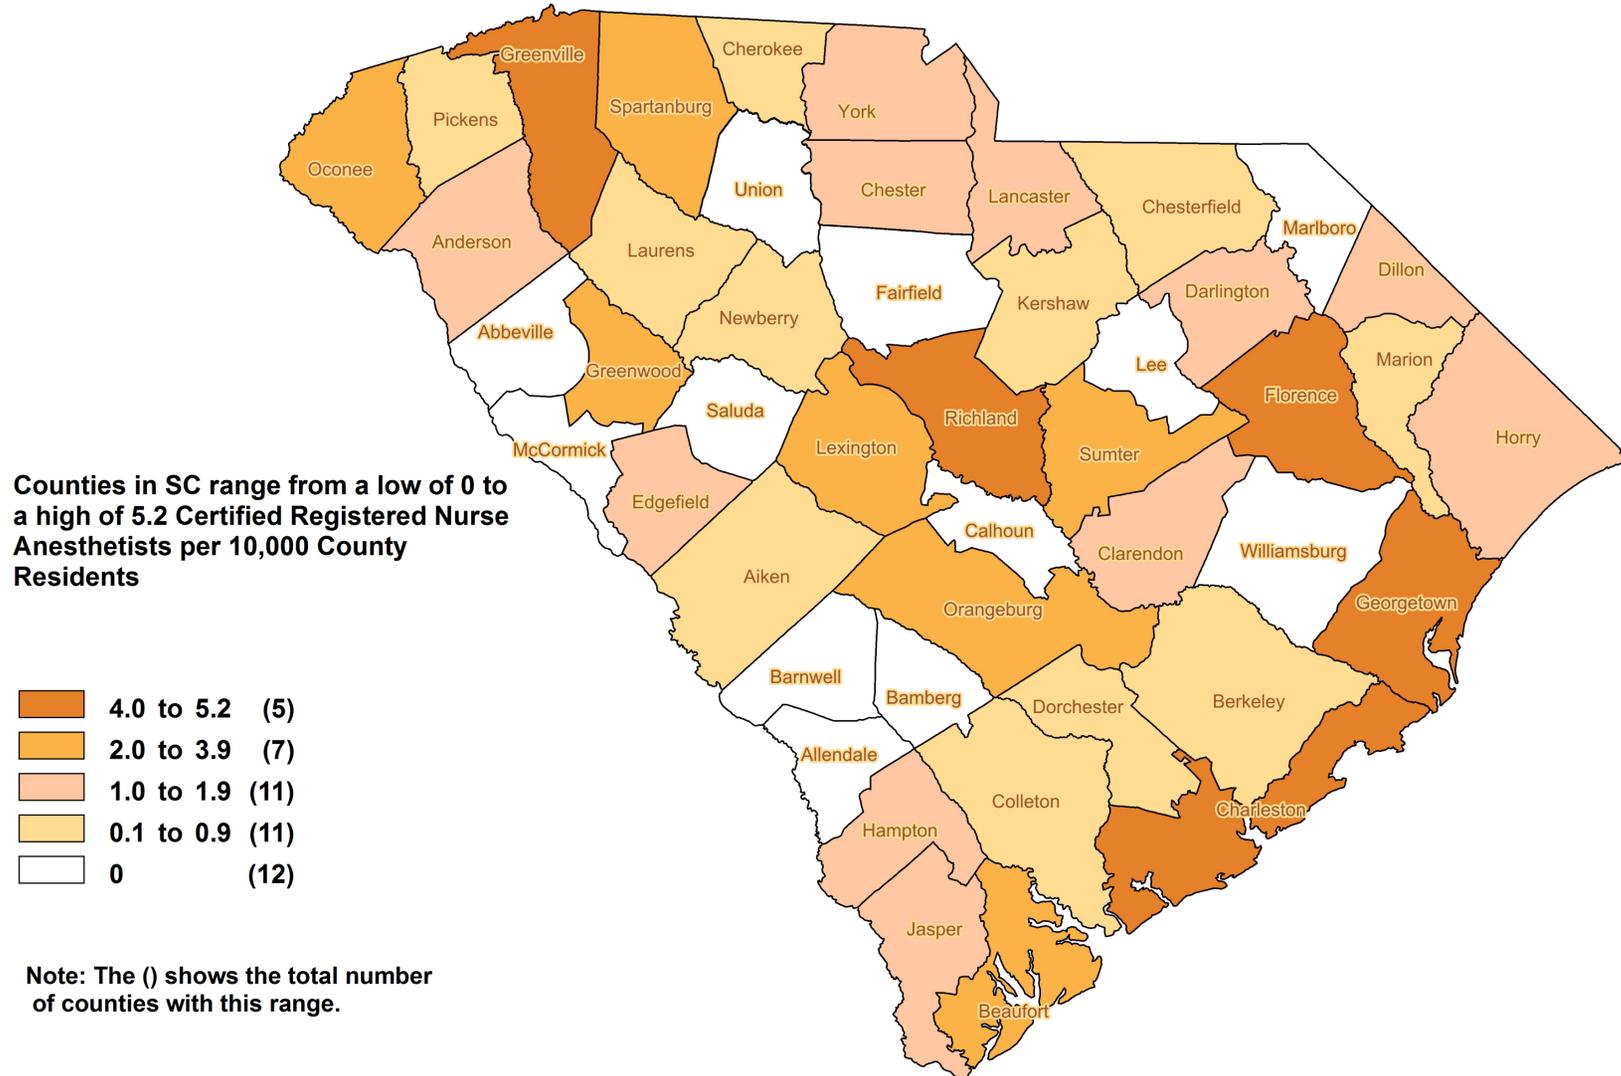

This information is based on all Nurse Practitioners with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Primary practice location information was not yet available for 71 newly licensed Nurse Practitioners. Provider counts are based on their primary practice location.

Certified Registered Nurse Anesthetists in South Carolina by Primary Practice Location

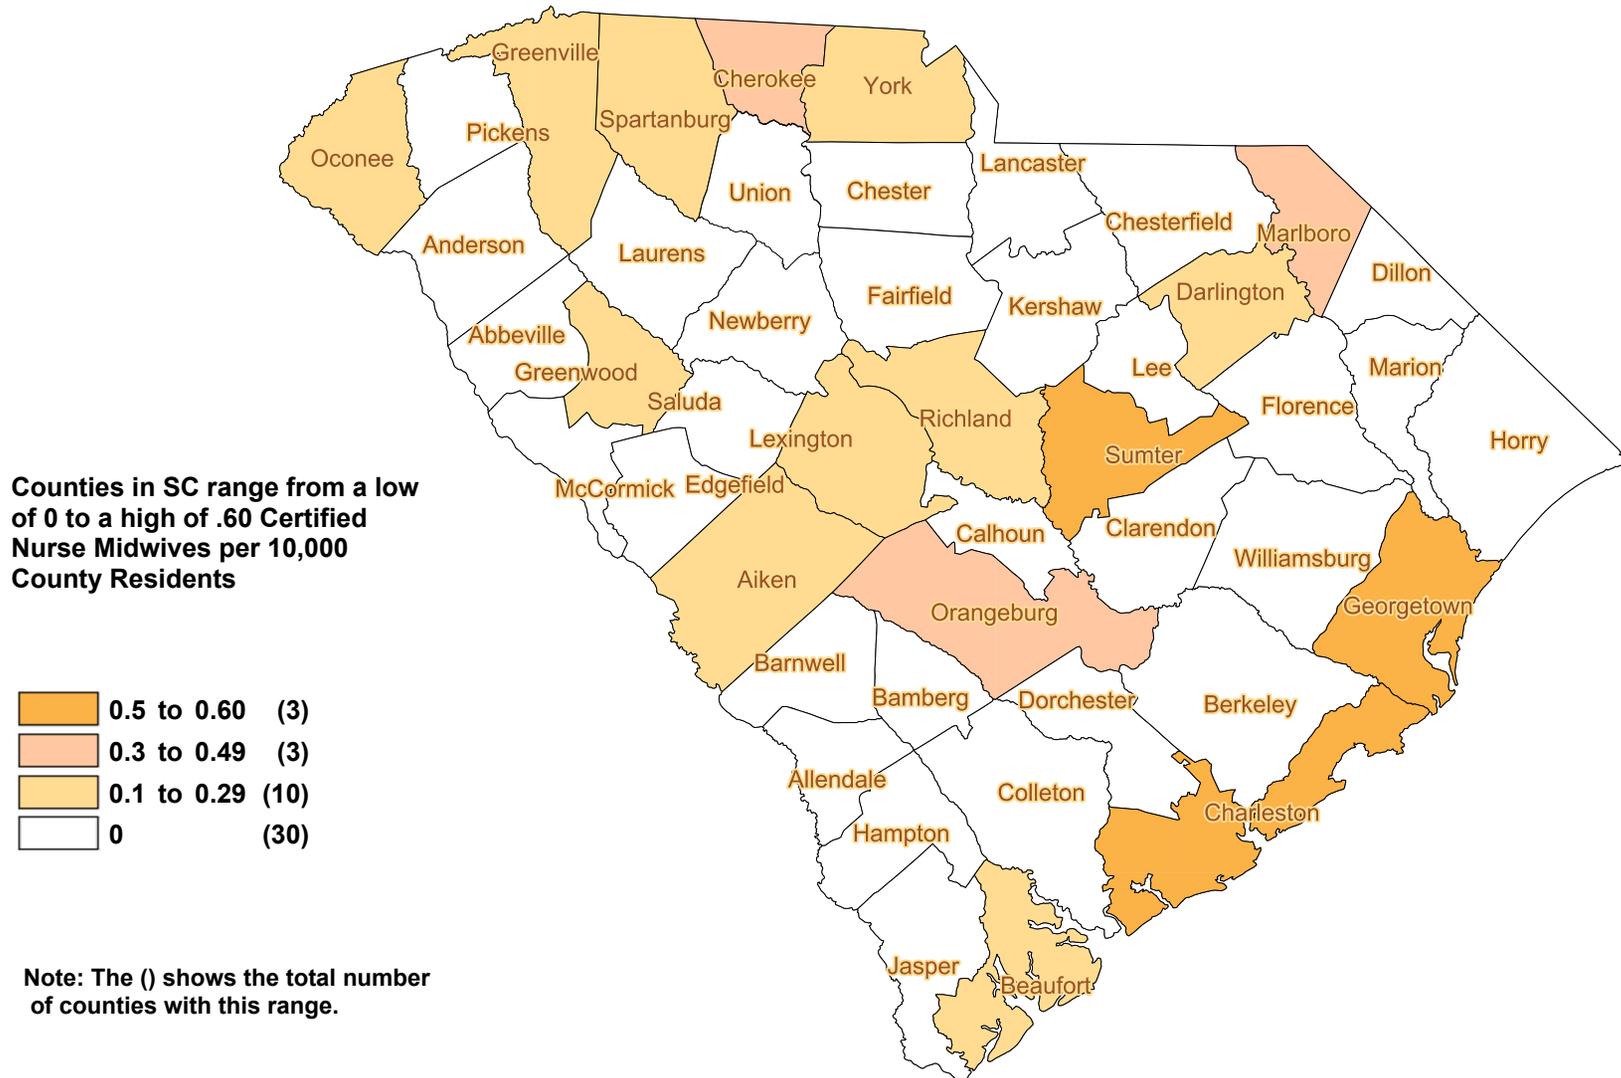

This information is based on all Certified Registered Nurse Anesthetists (CRNAs) with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 2 CRNAs who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Certified Registered Nurse Anesthetists Per 10,000 Population

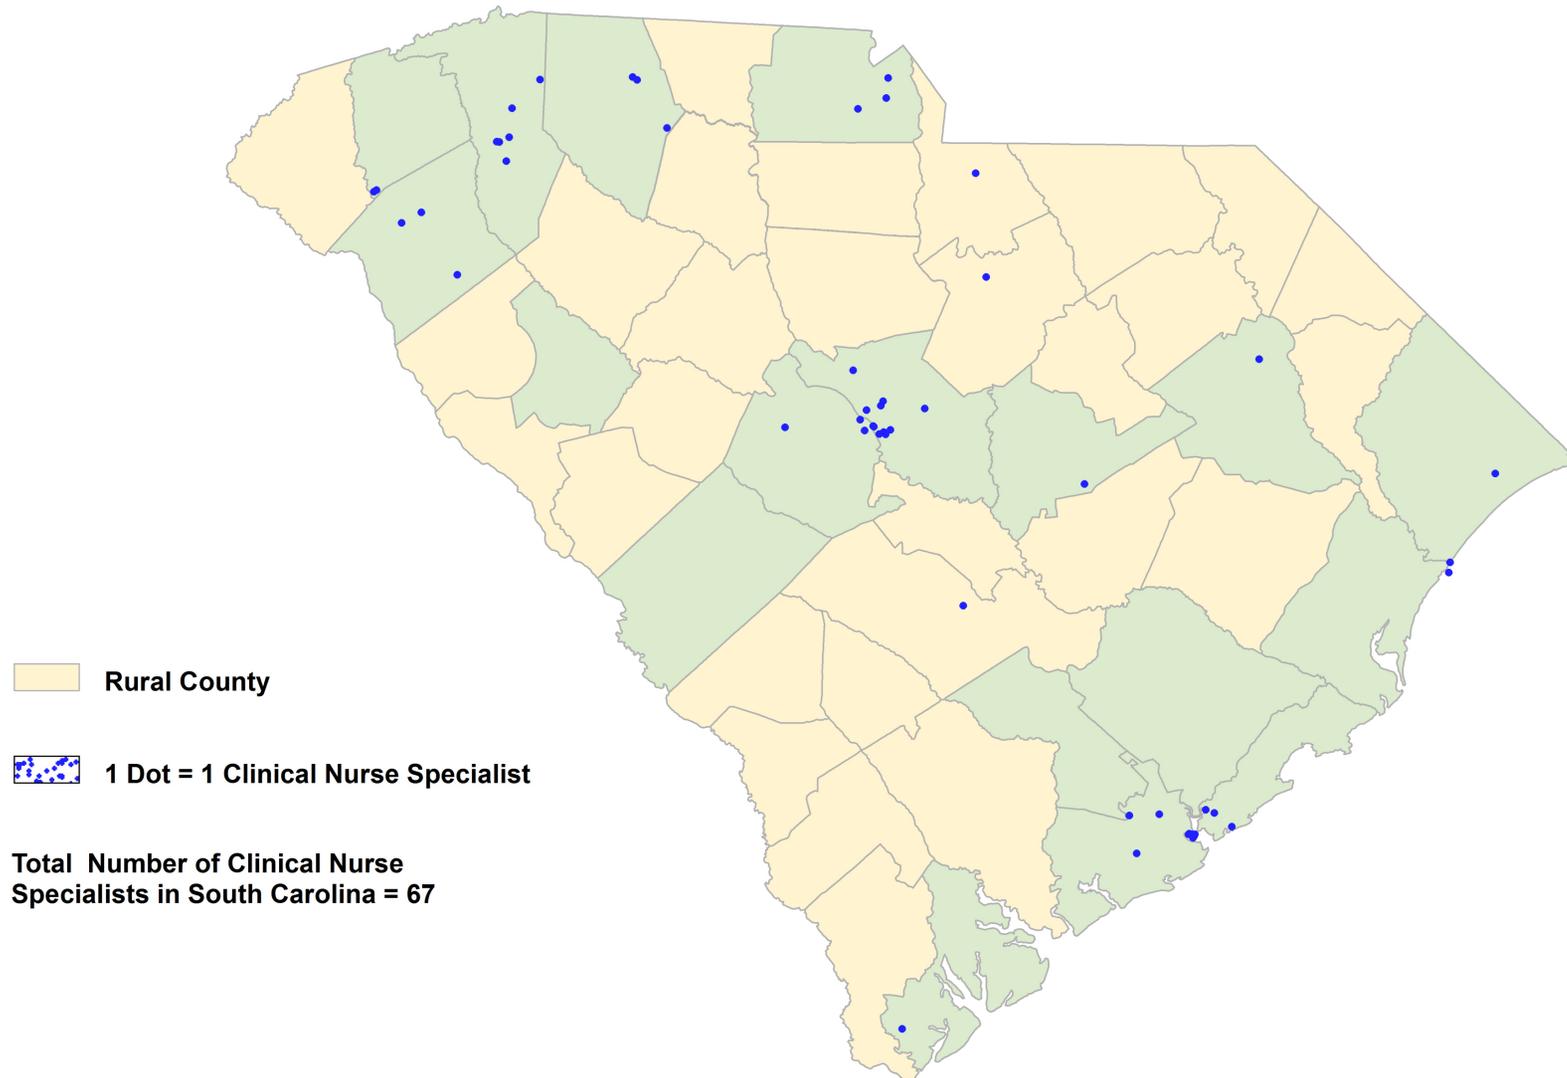

This information is based on all Certified Registered Nurse Anesthetists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Provider counts are based on their primary practice location.

Concentration of Certified Nurse Midwives Per 10,000 Population

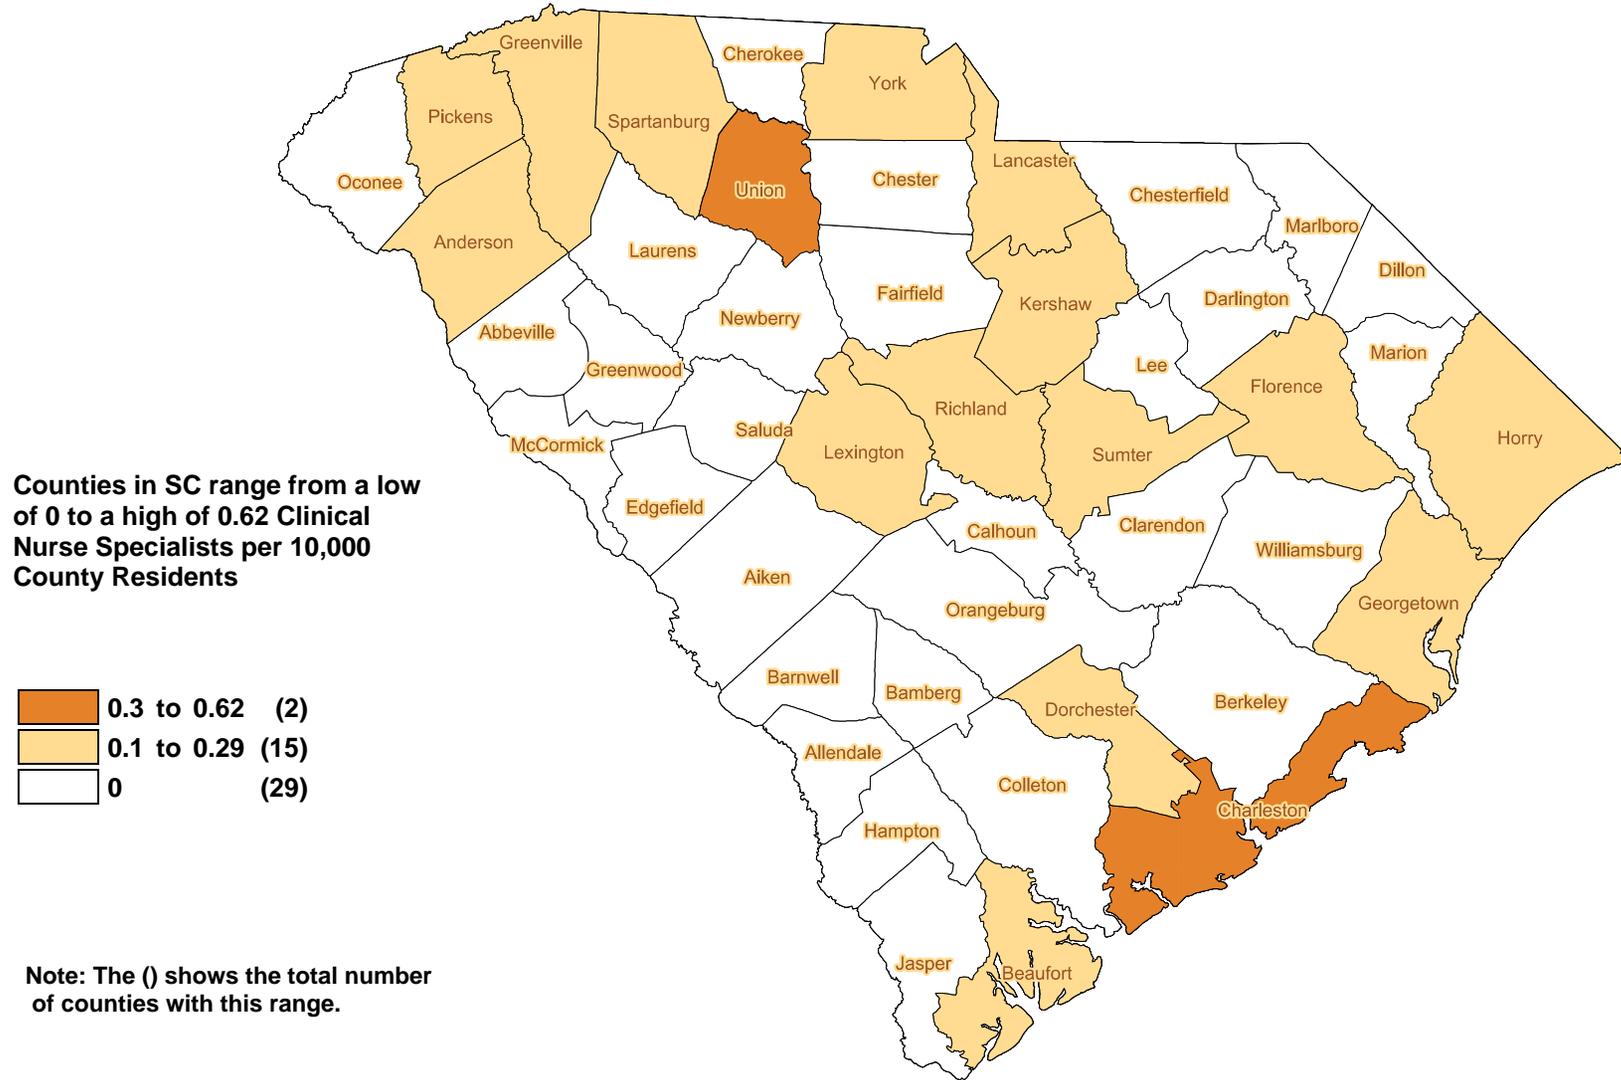

This information is based on all Certified Nurse Midwives with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. The county practice locations are those reported as the primary practice site.

Clinical Nurse Specialists in South Carolina by Primary Practice Location

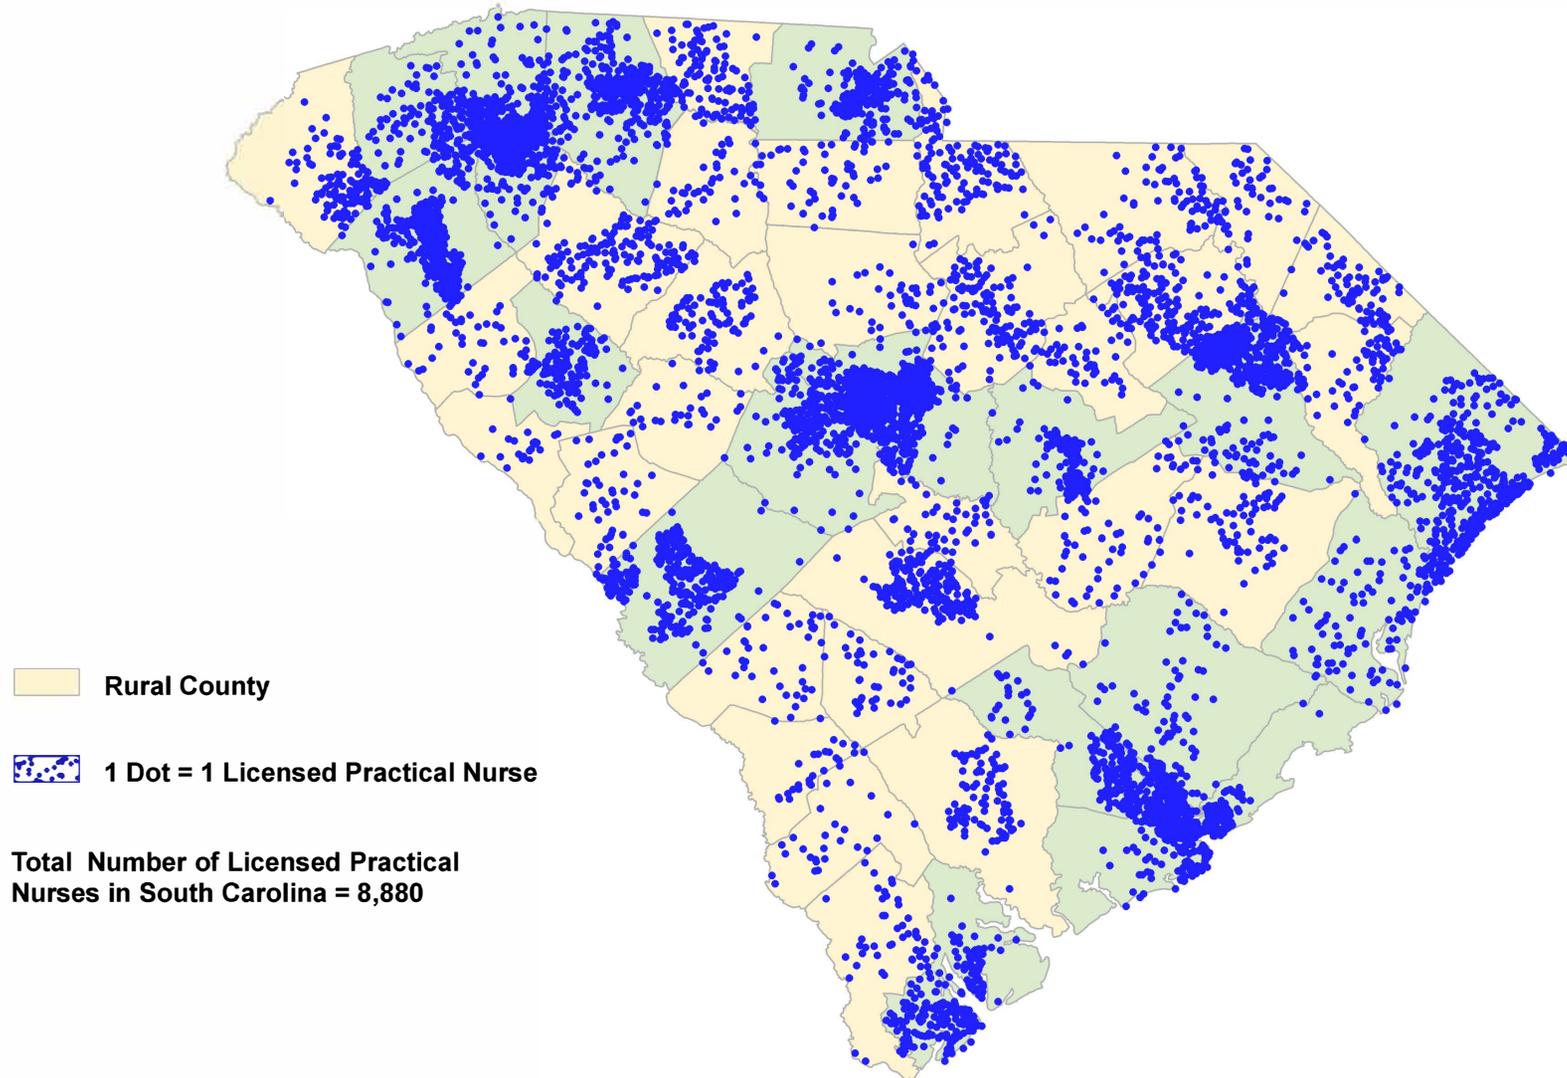

This information is based on all Clinical Nurse Specialists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 3 Clinical Nurse Specialists who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Clinical Nurse Specialists Per 10,000 Population

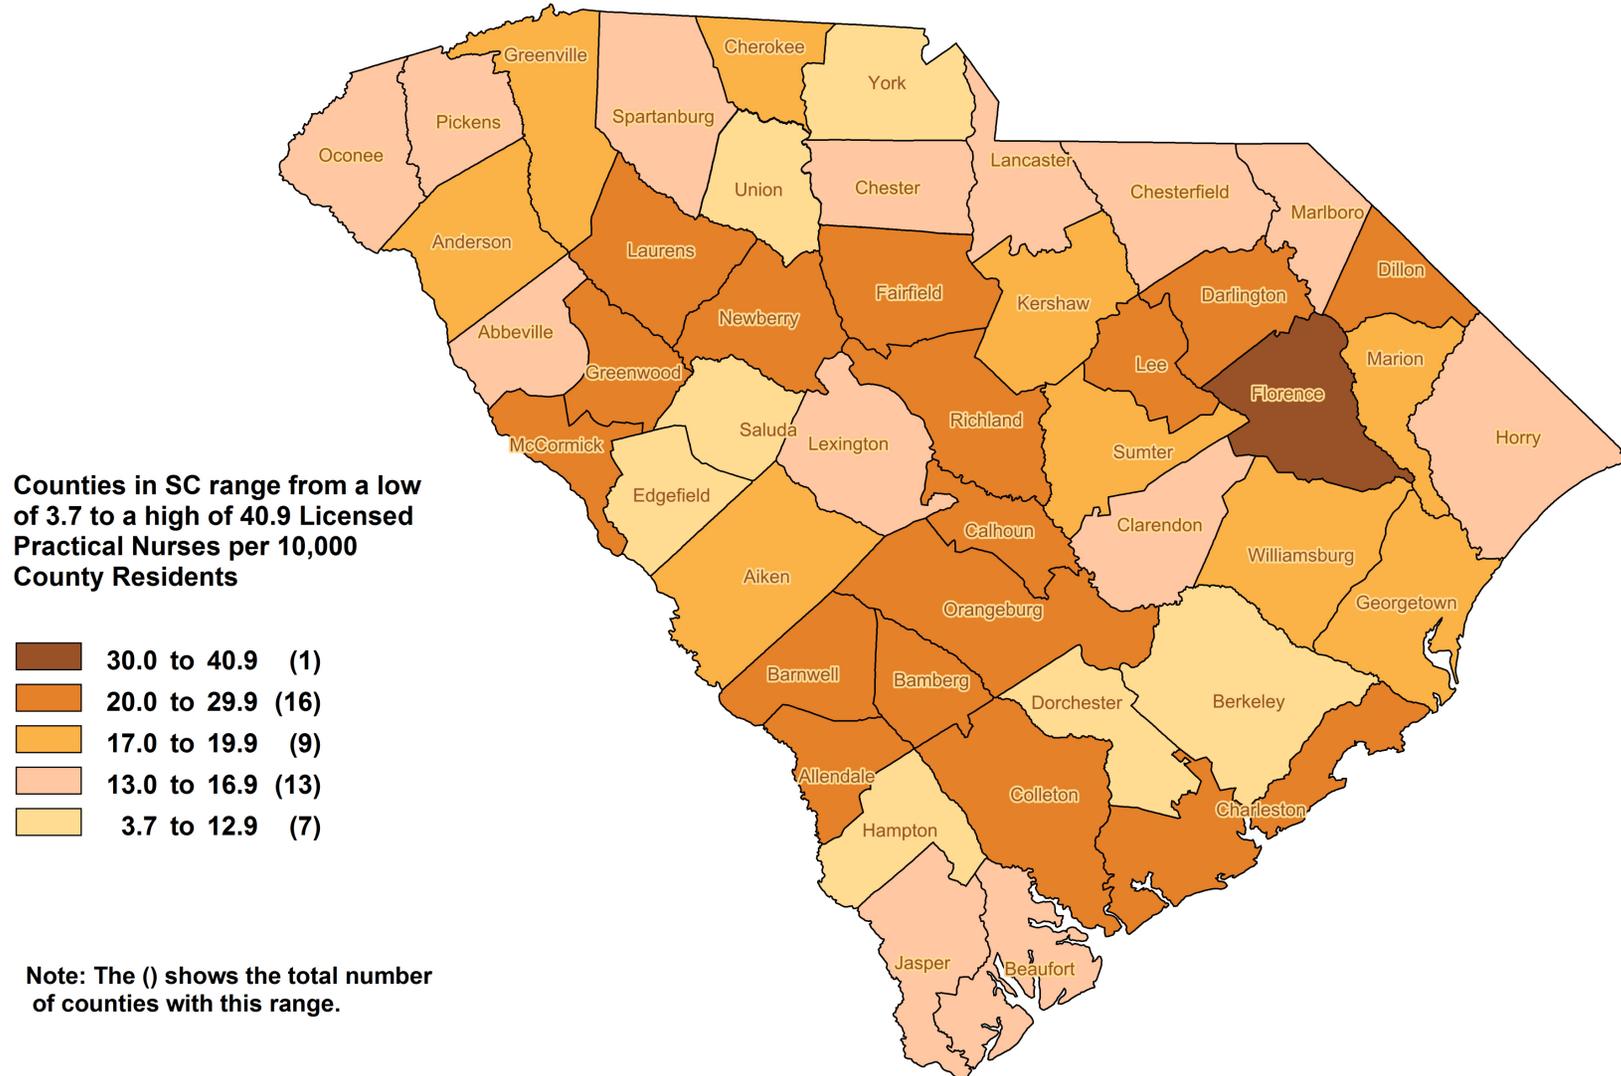

This information is based on all Clinical Nurse Specialists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Provider counts are based on their primary practice location.

Licensed Practical Nurses in South Carolina by Primary Practice Location

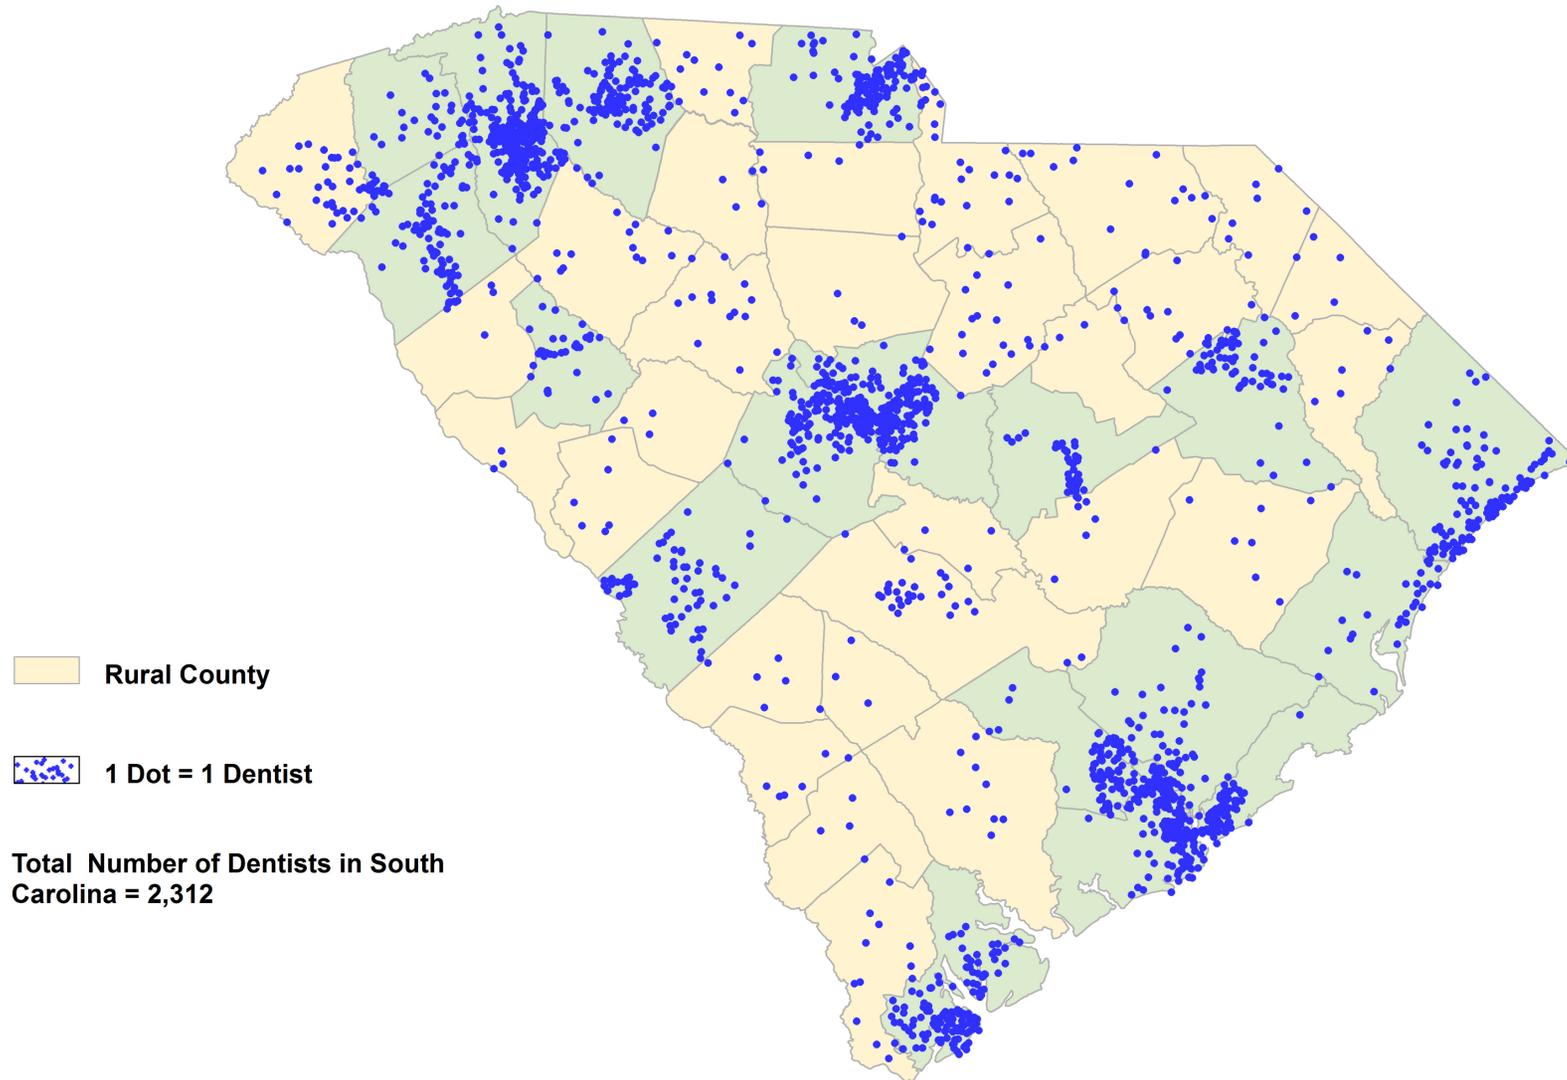

This information is based on all Licensed Practical Nurses with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 9 Licensed Practical Nurses who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the 1J01Julation lives outside an urbanized area. based on the 2010 census counts.

Concentration of Licensed Practical Nurses Per 10,000 Population

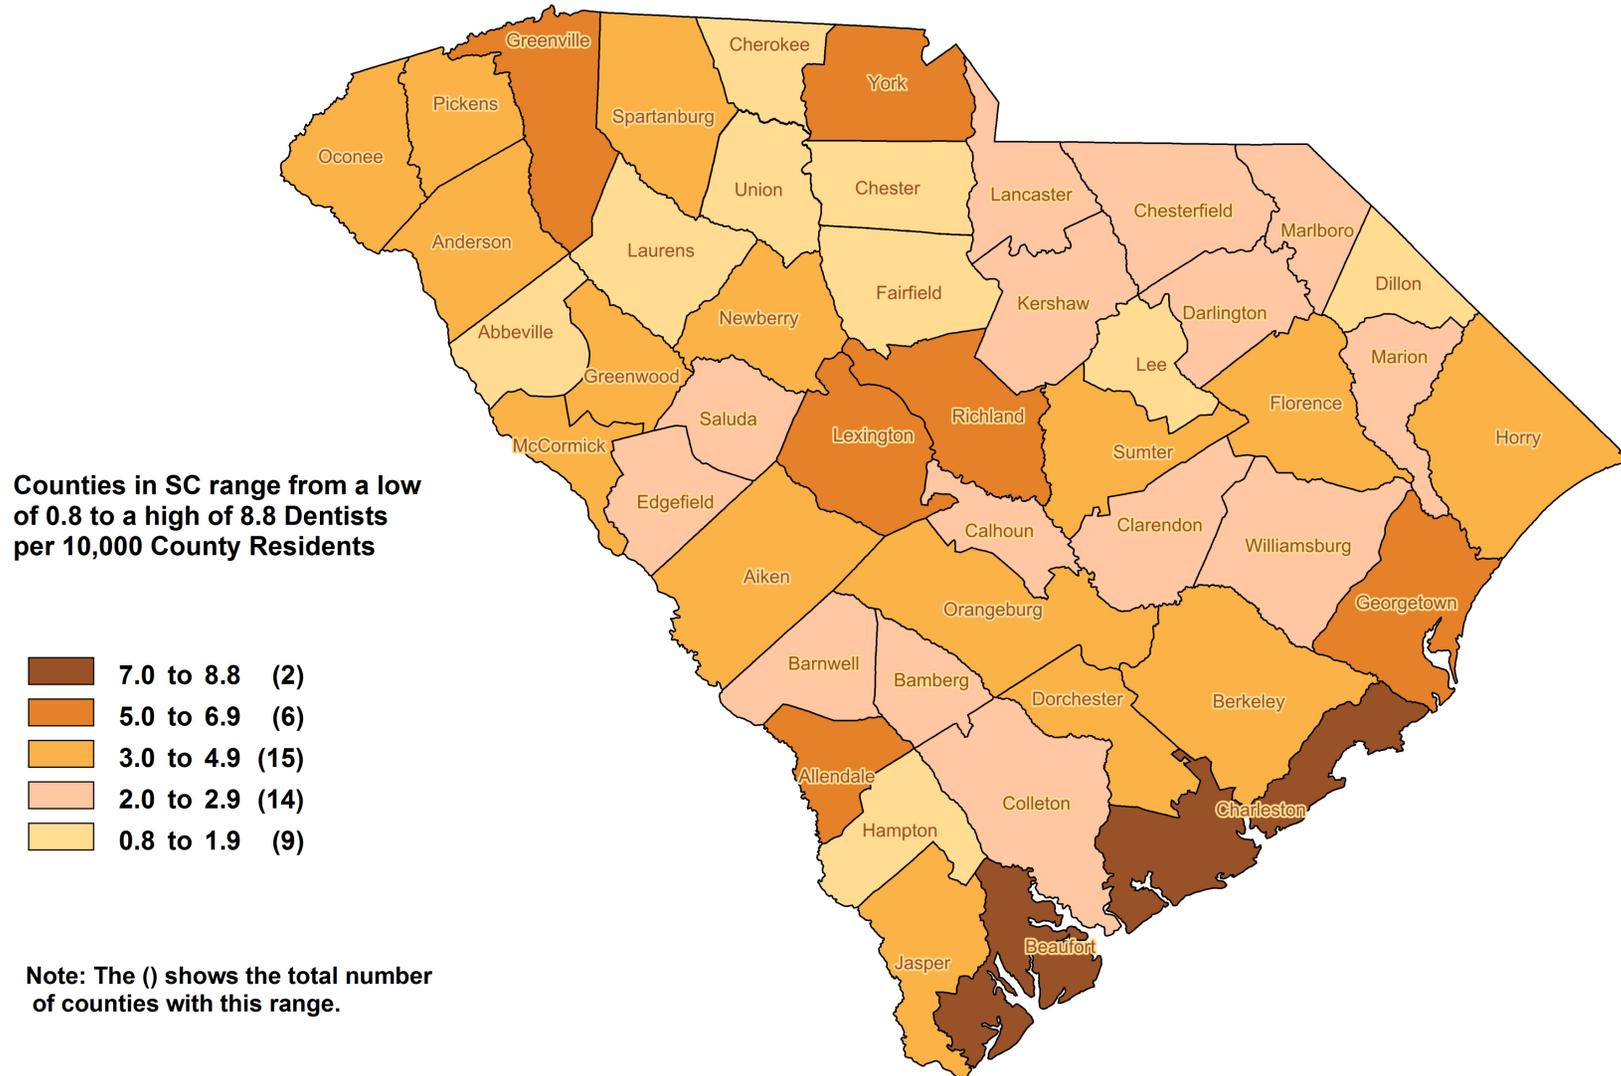

This information is based on all Licensed Practical Nurses with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2016. Provider counts are based on their primary practice location.

Dentists in South Carolina by Primary Practice Location

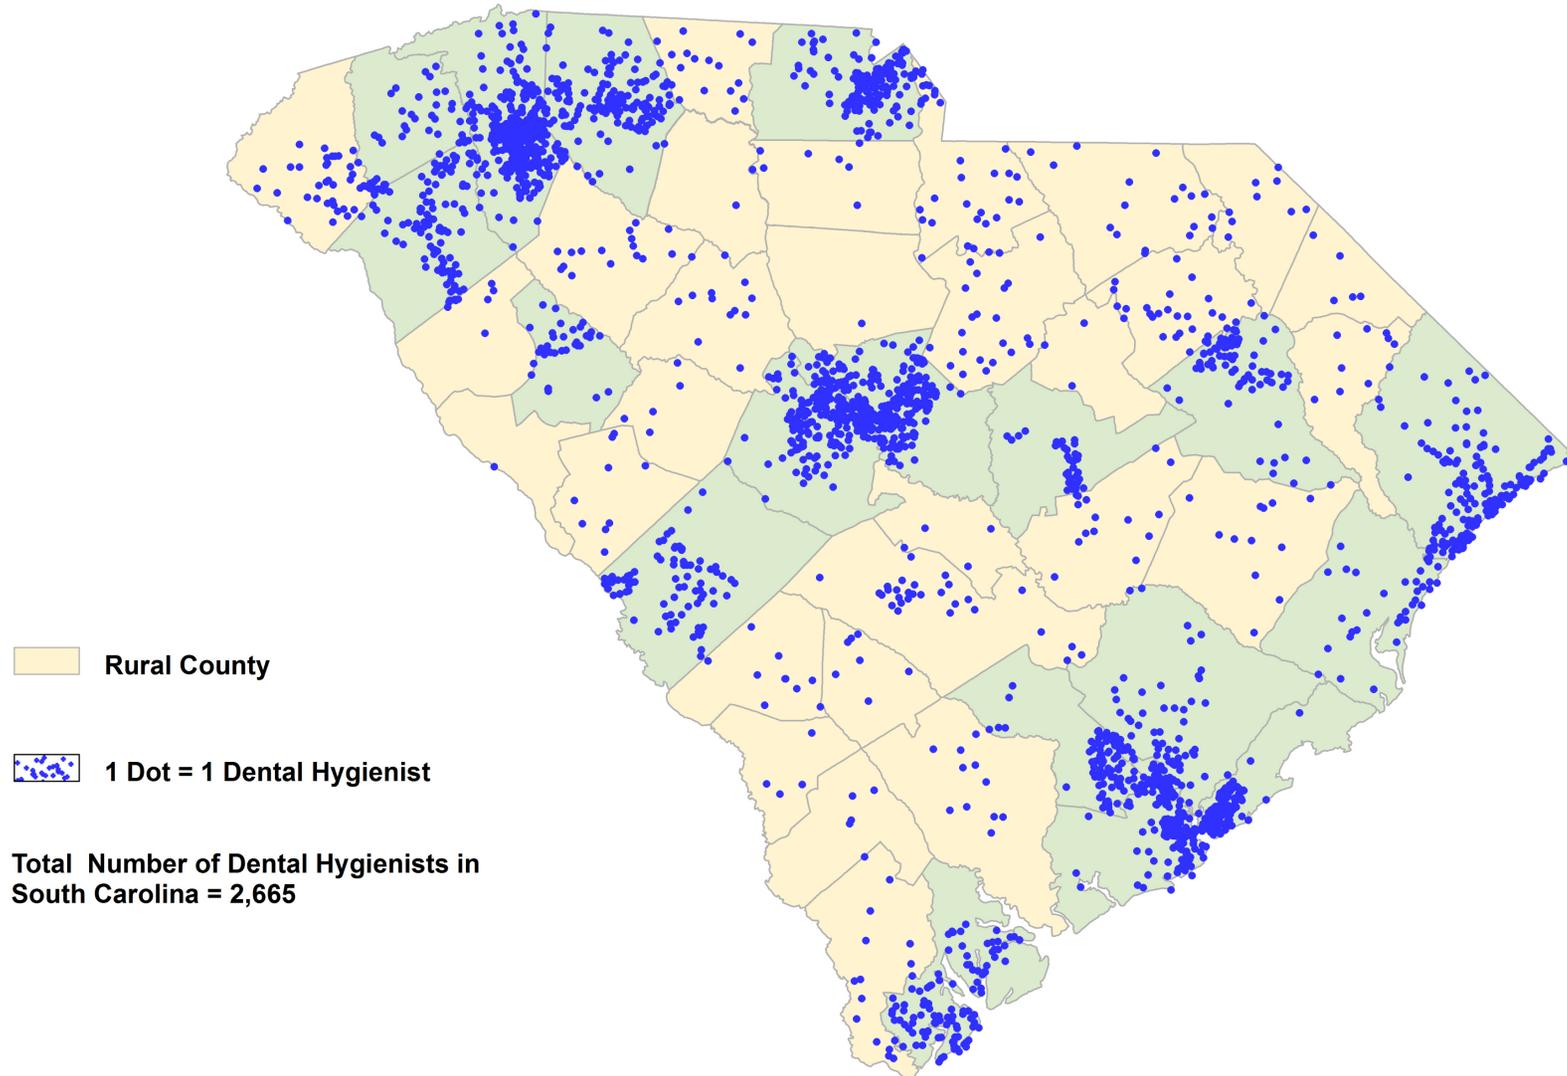

This information is based on all Dentists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Dentists Per 10,000 Population

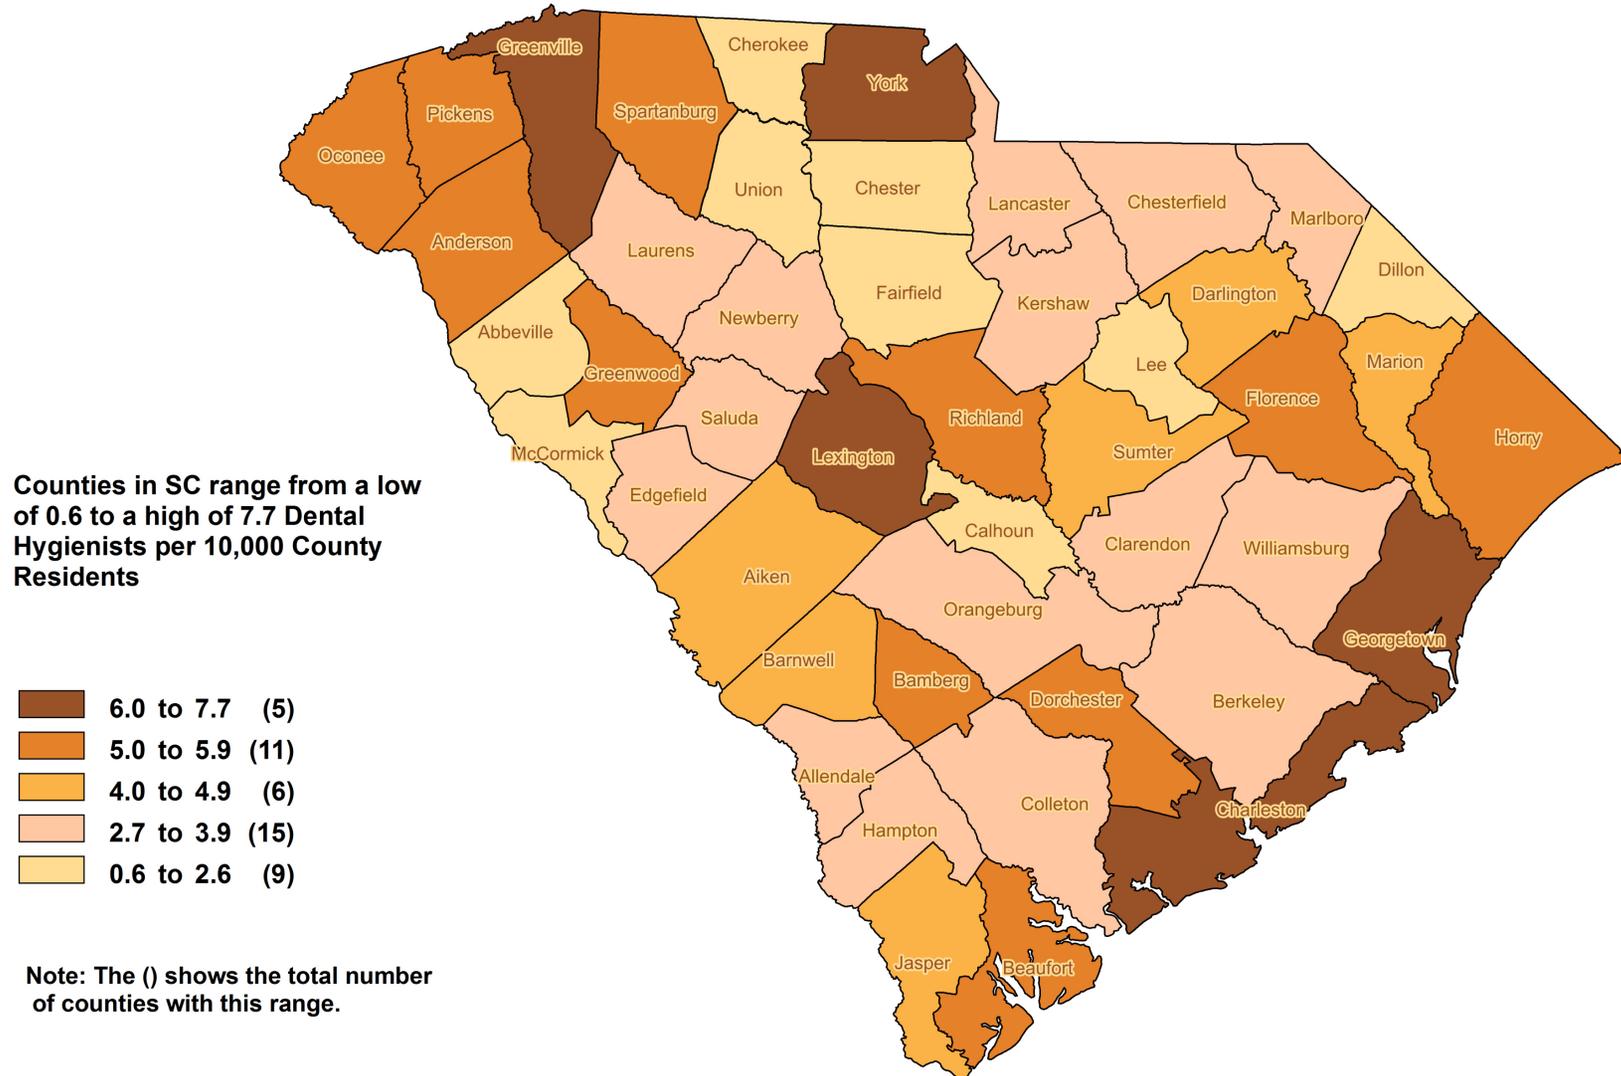

This information is based on all Dentists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Provider counts are based on their primary practice location.

Dental Hygienists in South Carolina by Primary Practice Location

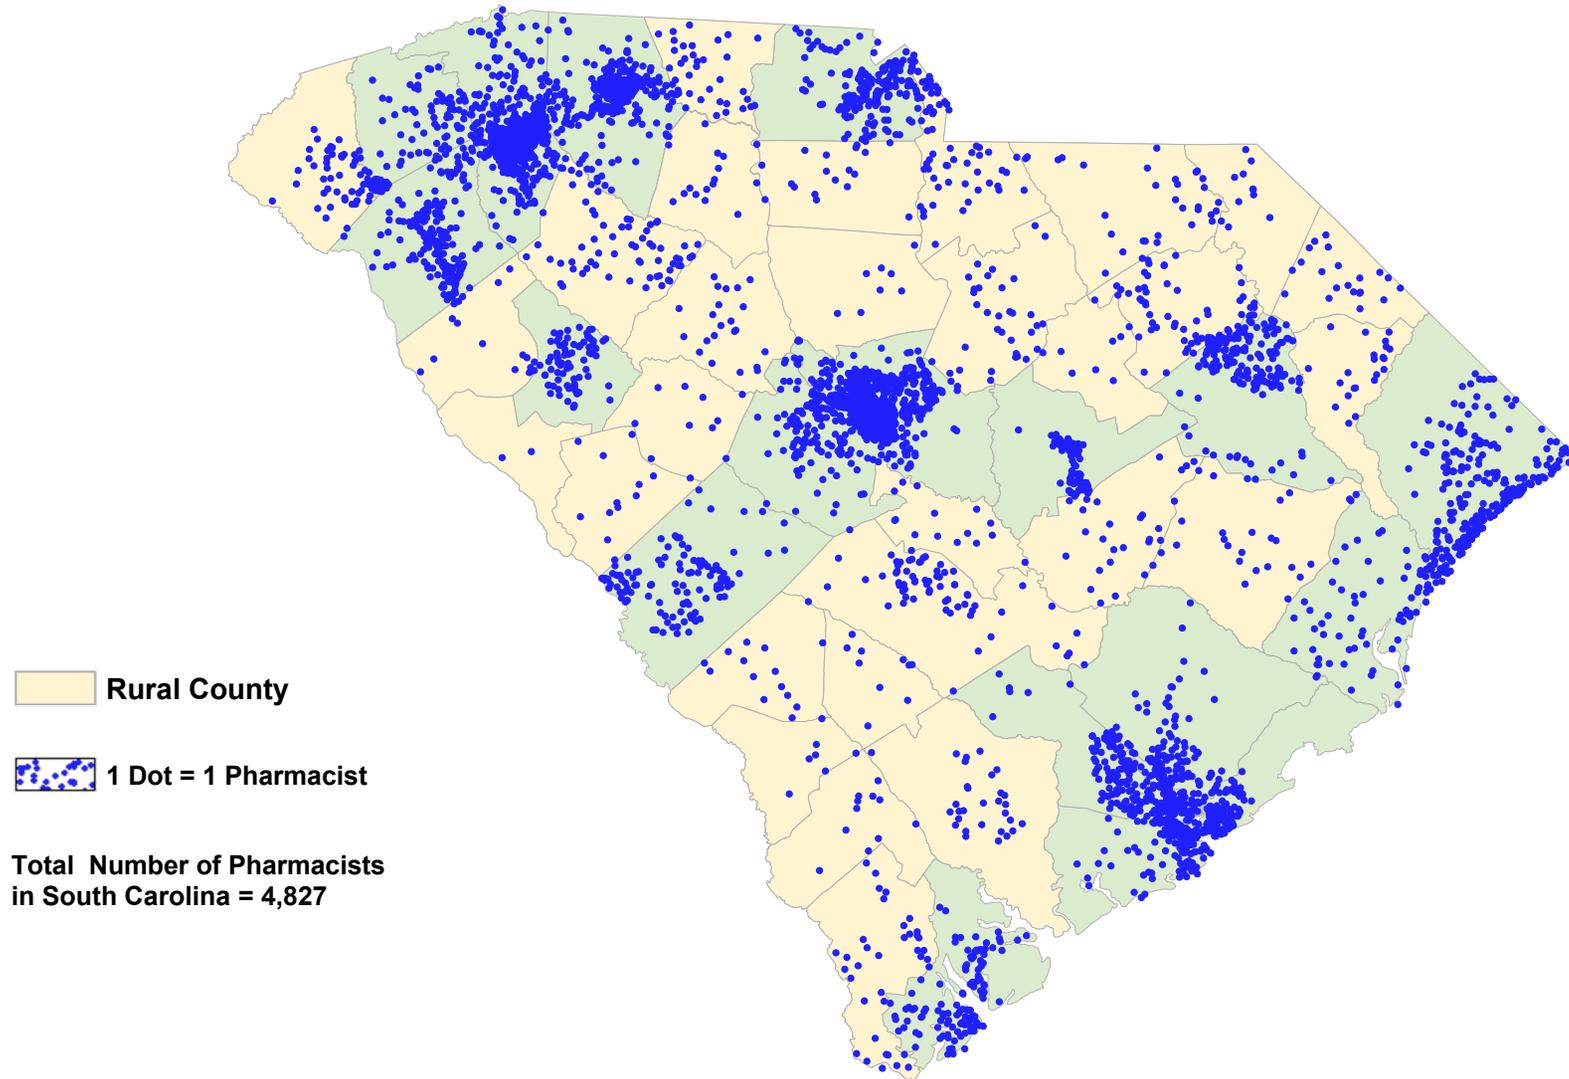

This information is based on all Dental Hygienists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Dental Hygienists Per 10,000 Population

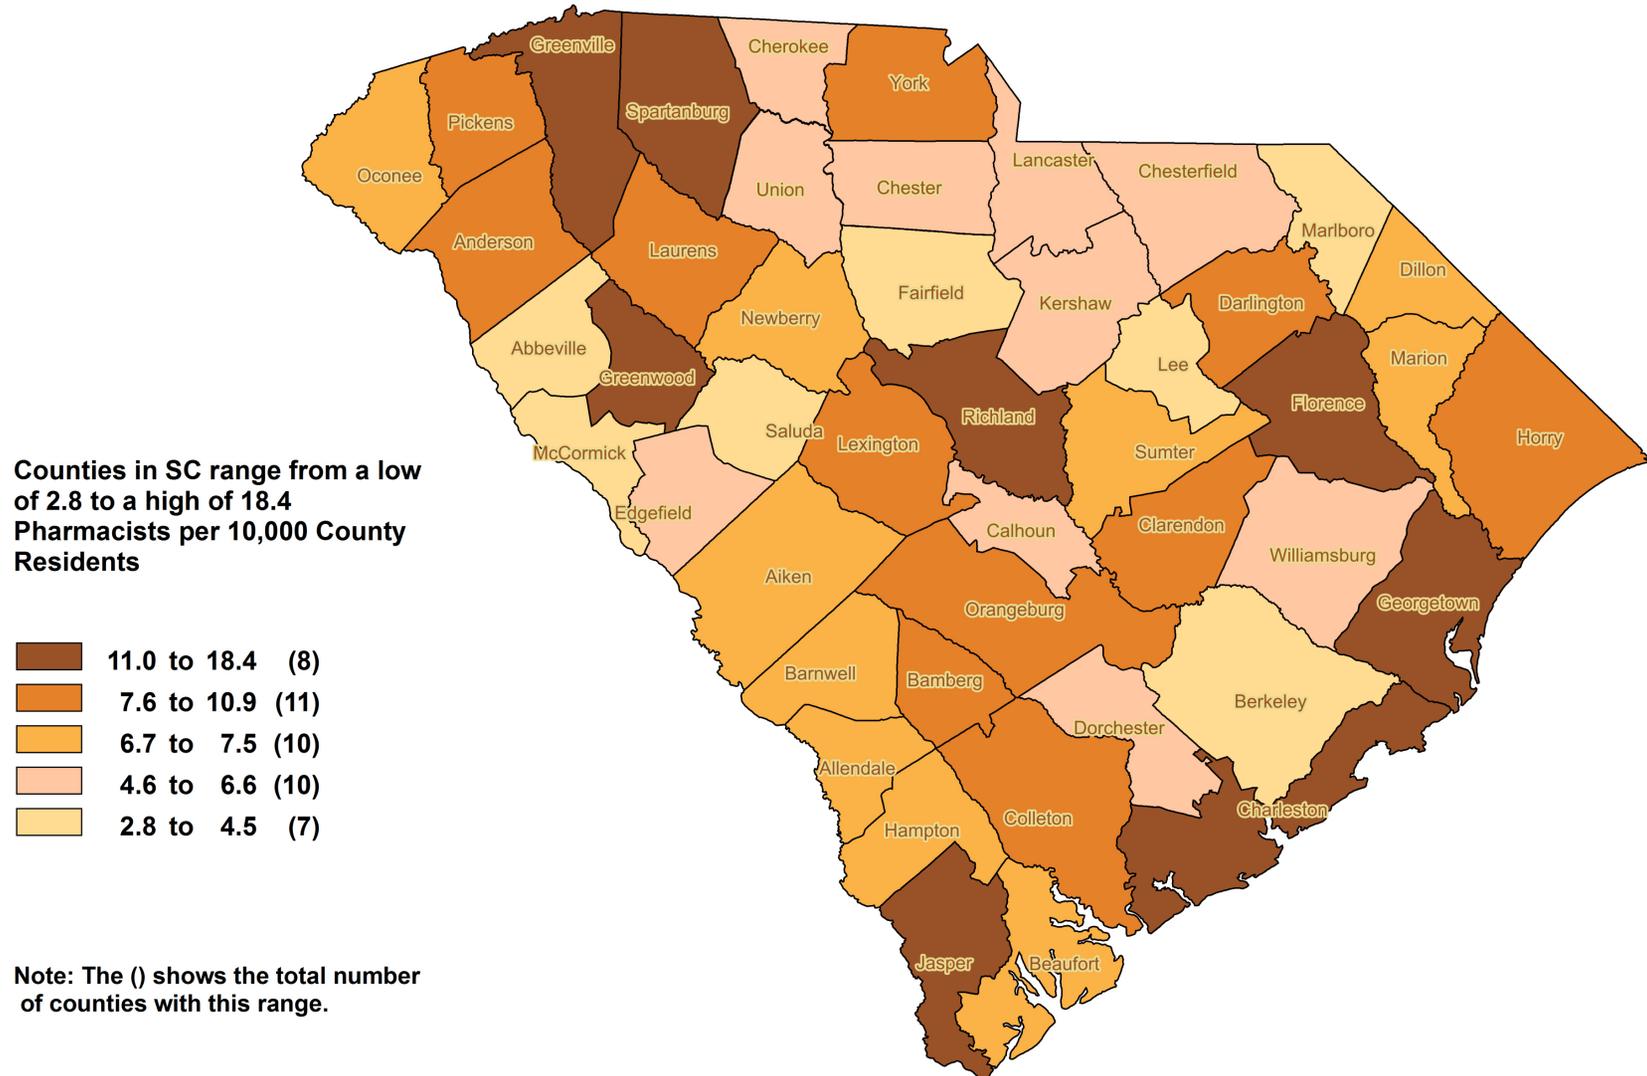

This information is based on all Dental Hygienists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Provider counts are based on their primary practice location.

Pharmacists in South Carolina by Primary Practice Location

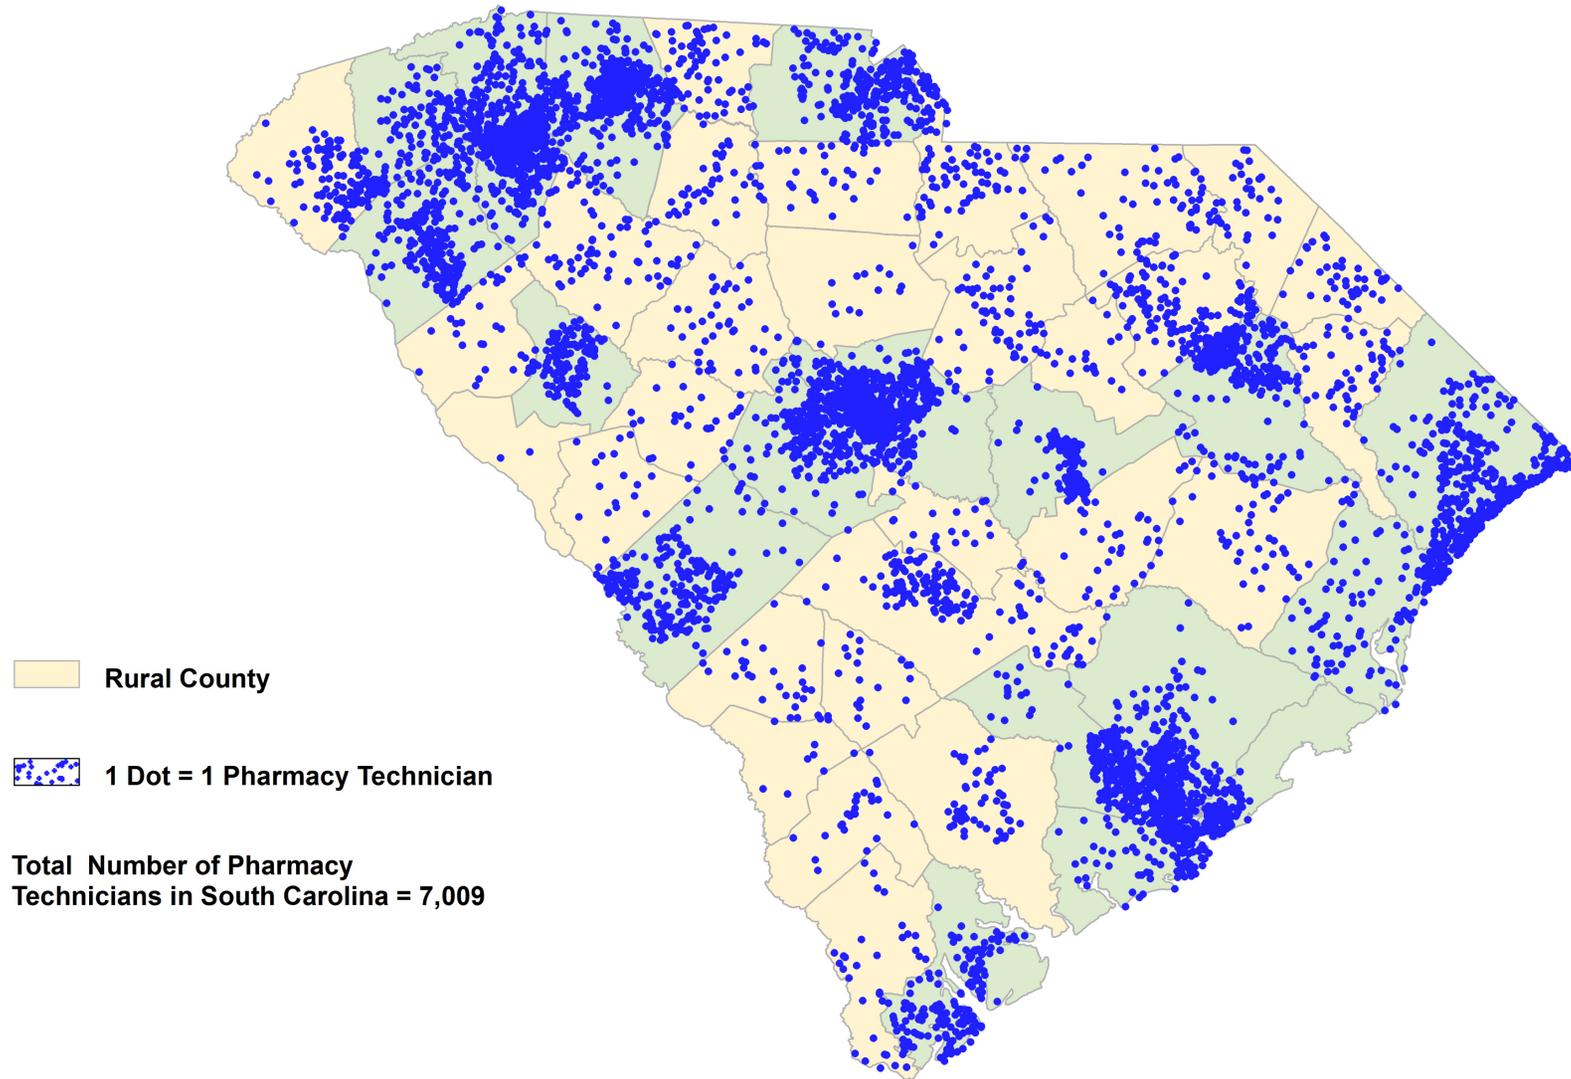

This information is based on all Pharmacists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 04/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 12 Pharmacists who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Pharmacists Per 10,000 Population

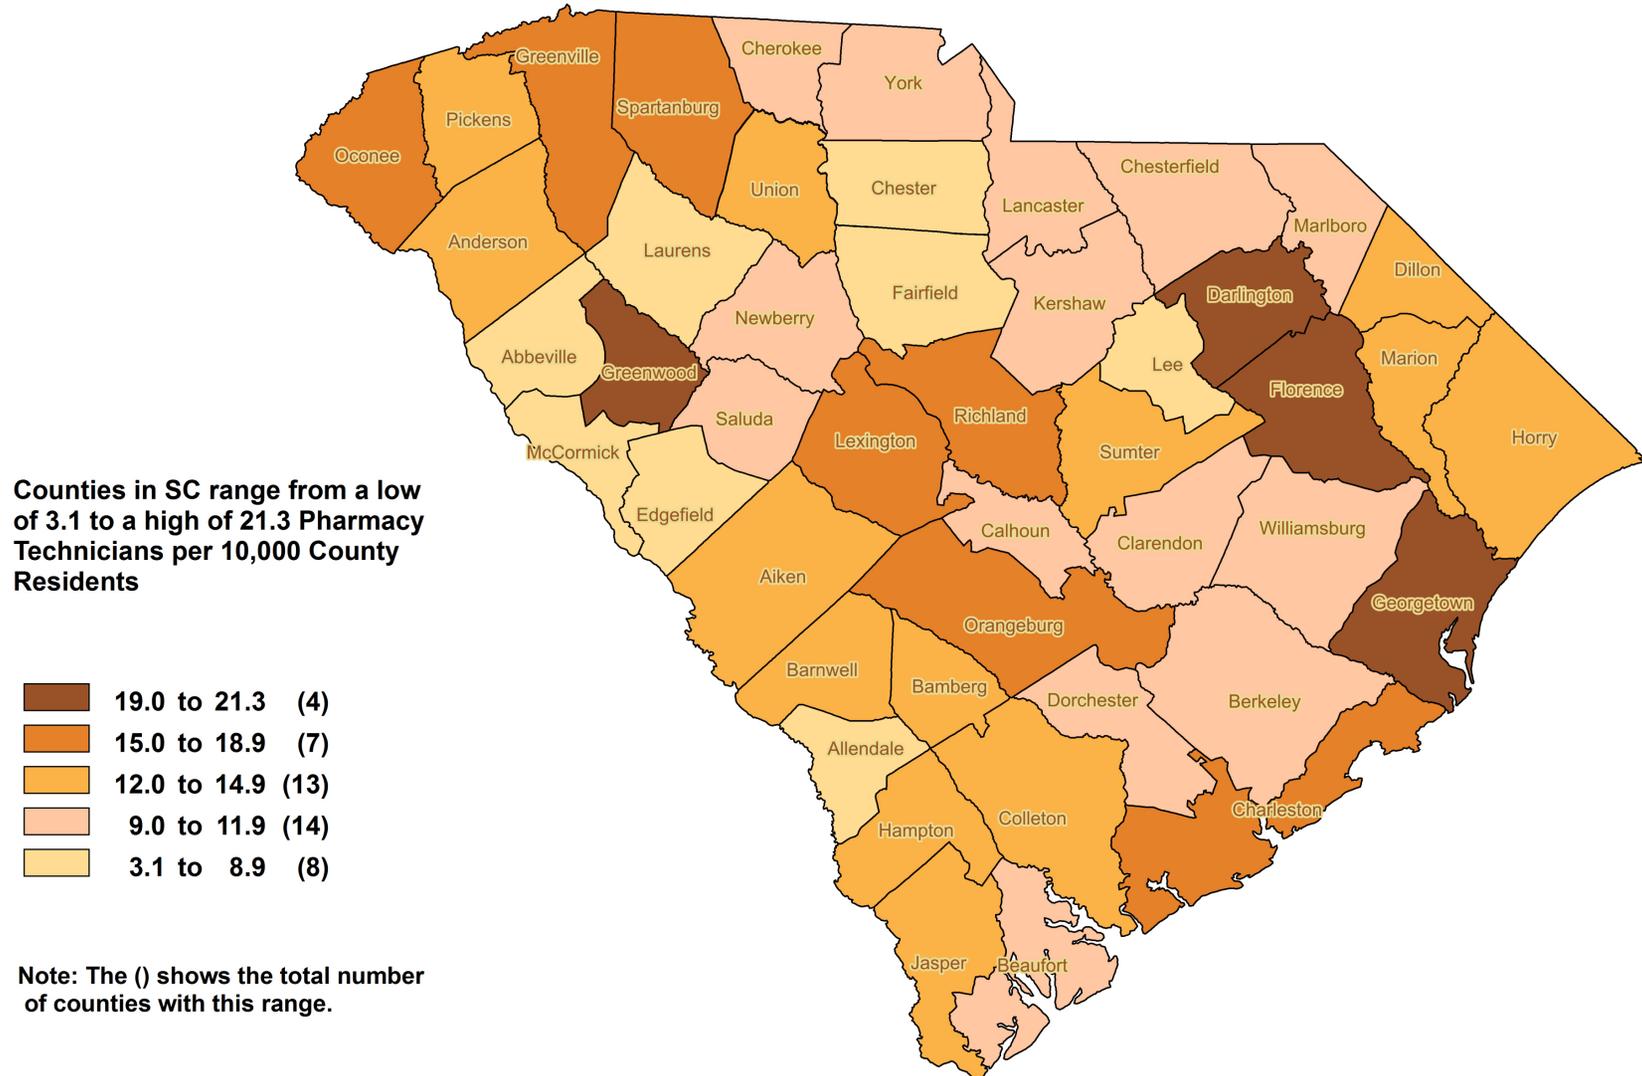

This information is based on all Pharmacists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 4/30/2017. Provider counts are based on the primary practice location.

Pharmacy Technicians in South Carolina by Primary Practice Location

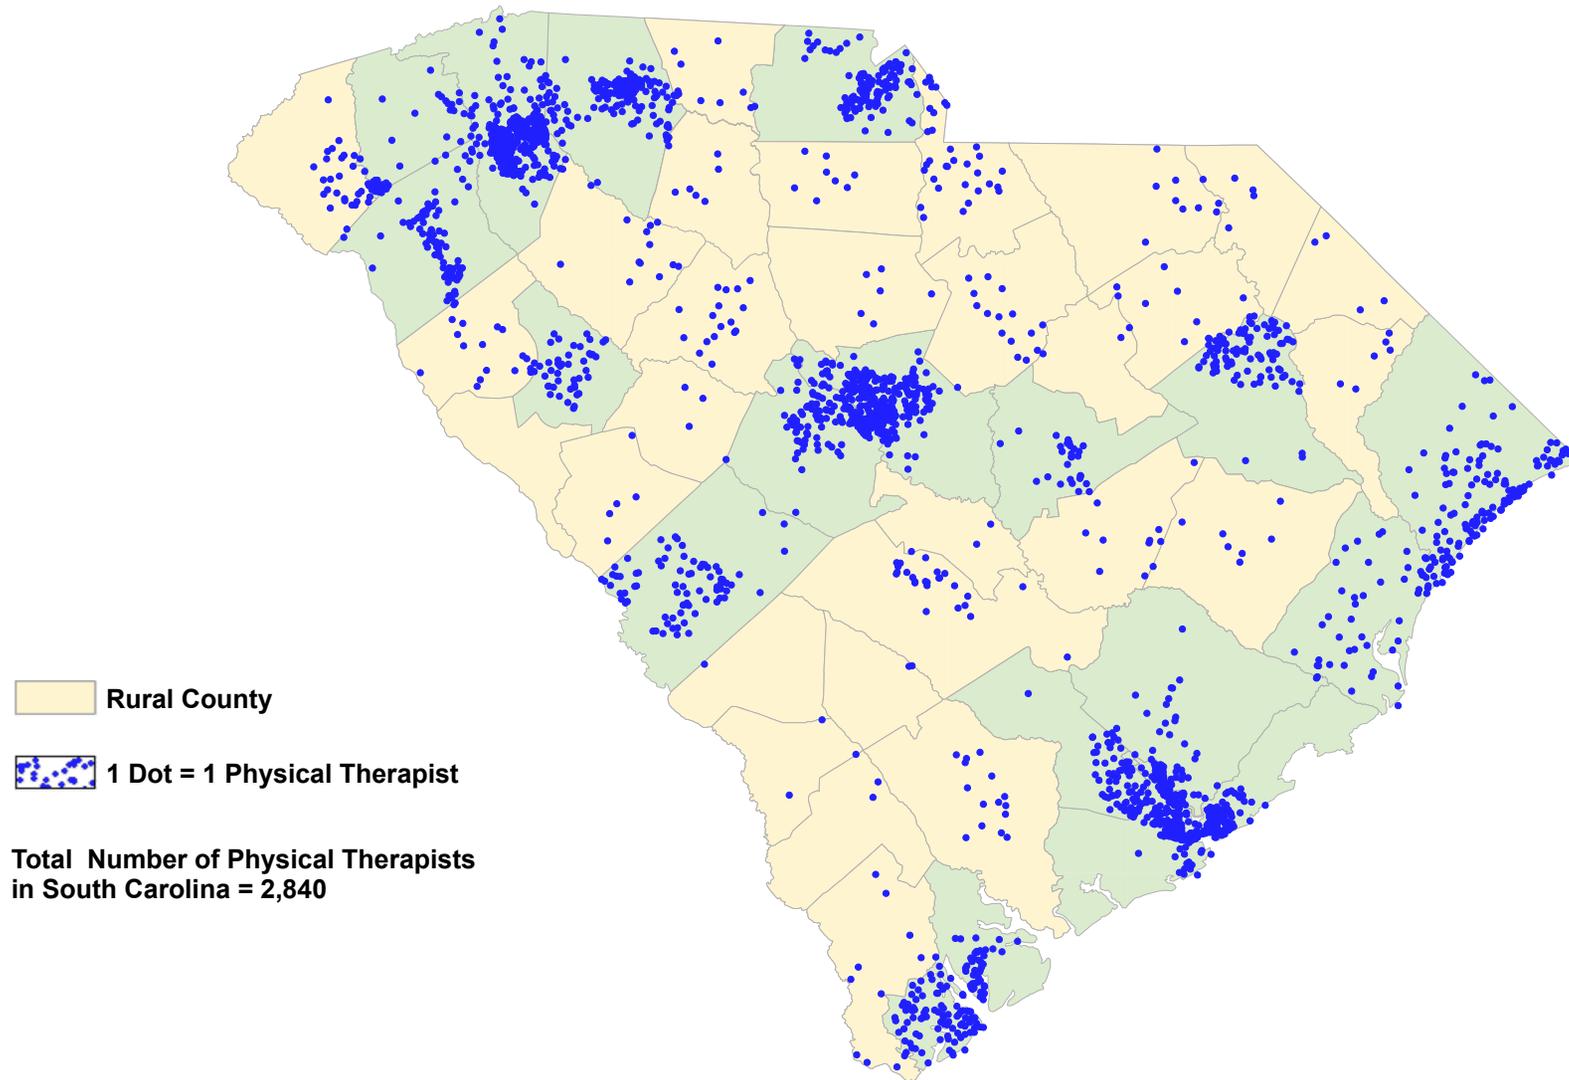

This information is based on all Pharmacy Technicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 1 Pharmacy Technician who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Pharmacy Technicians Per 10,000 Population

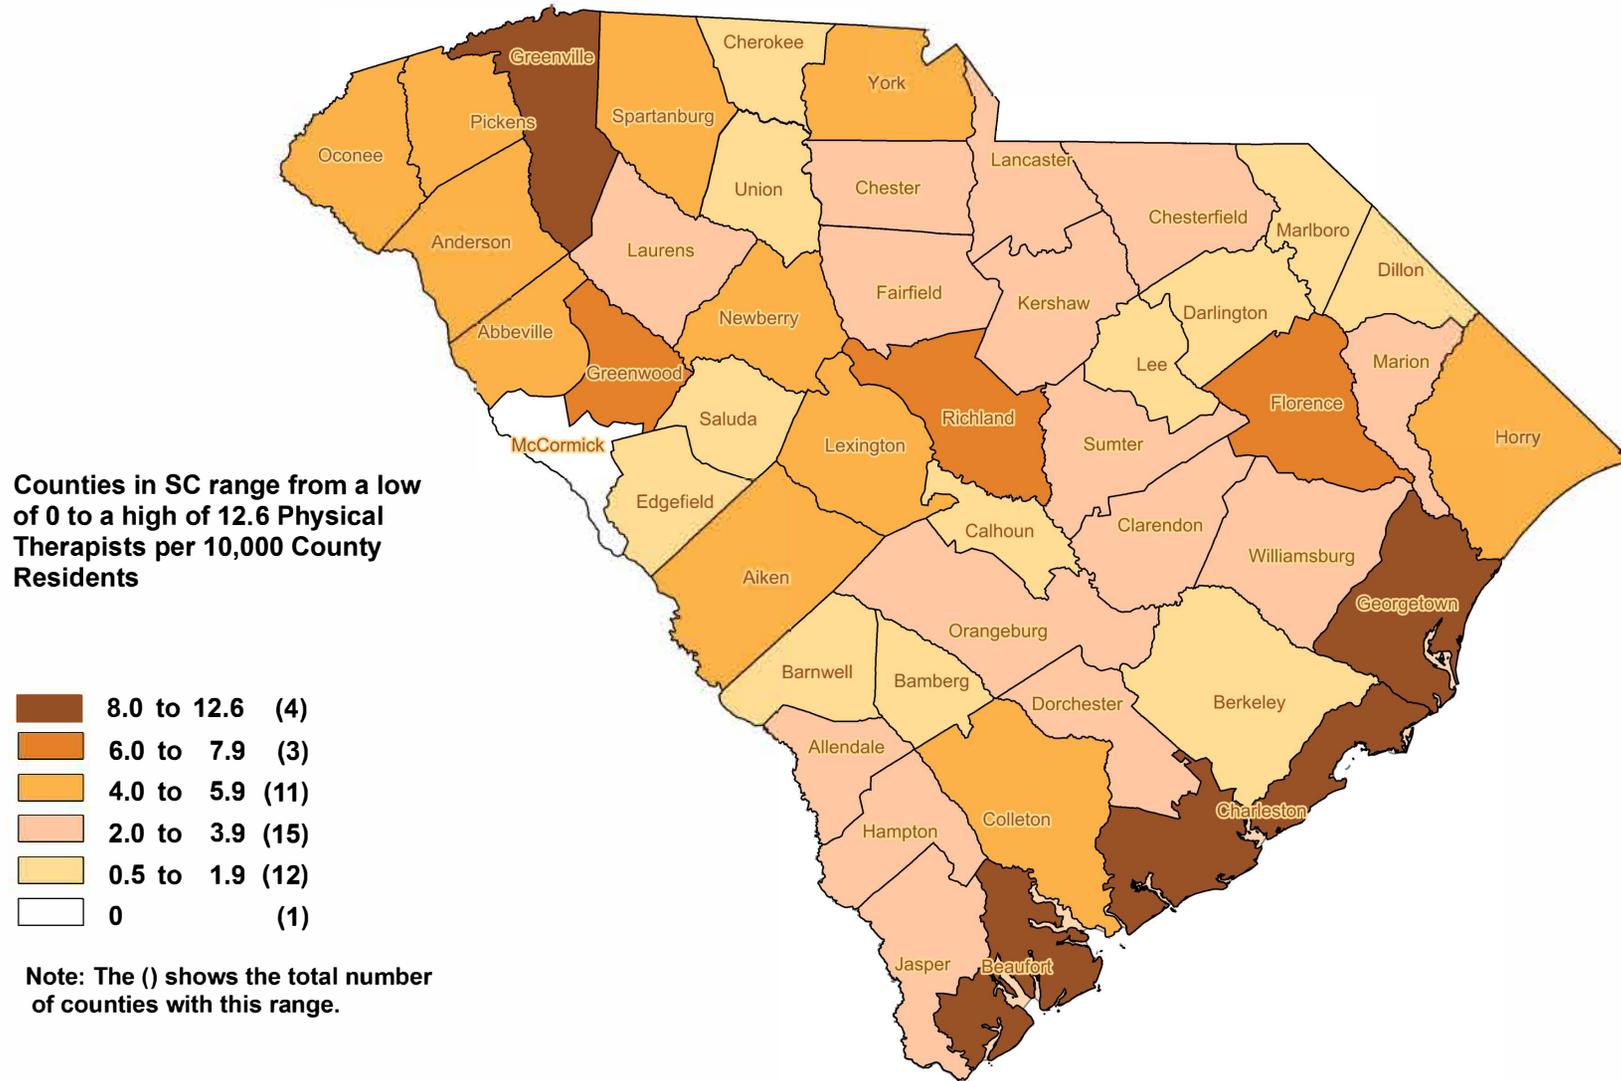

This information is based on all Pharmacy Technicians with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Provider counts are based on the primary practice location.

Physical Therapists in South Carolina by Primary Practice Location

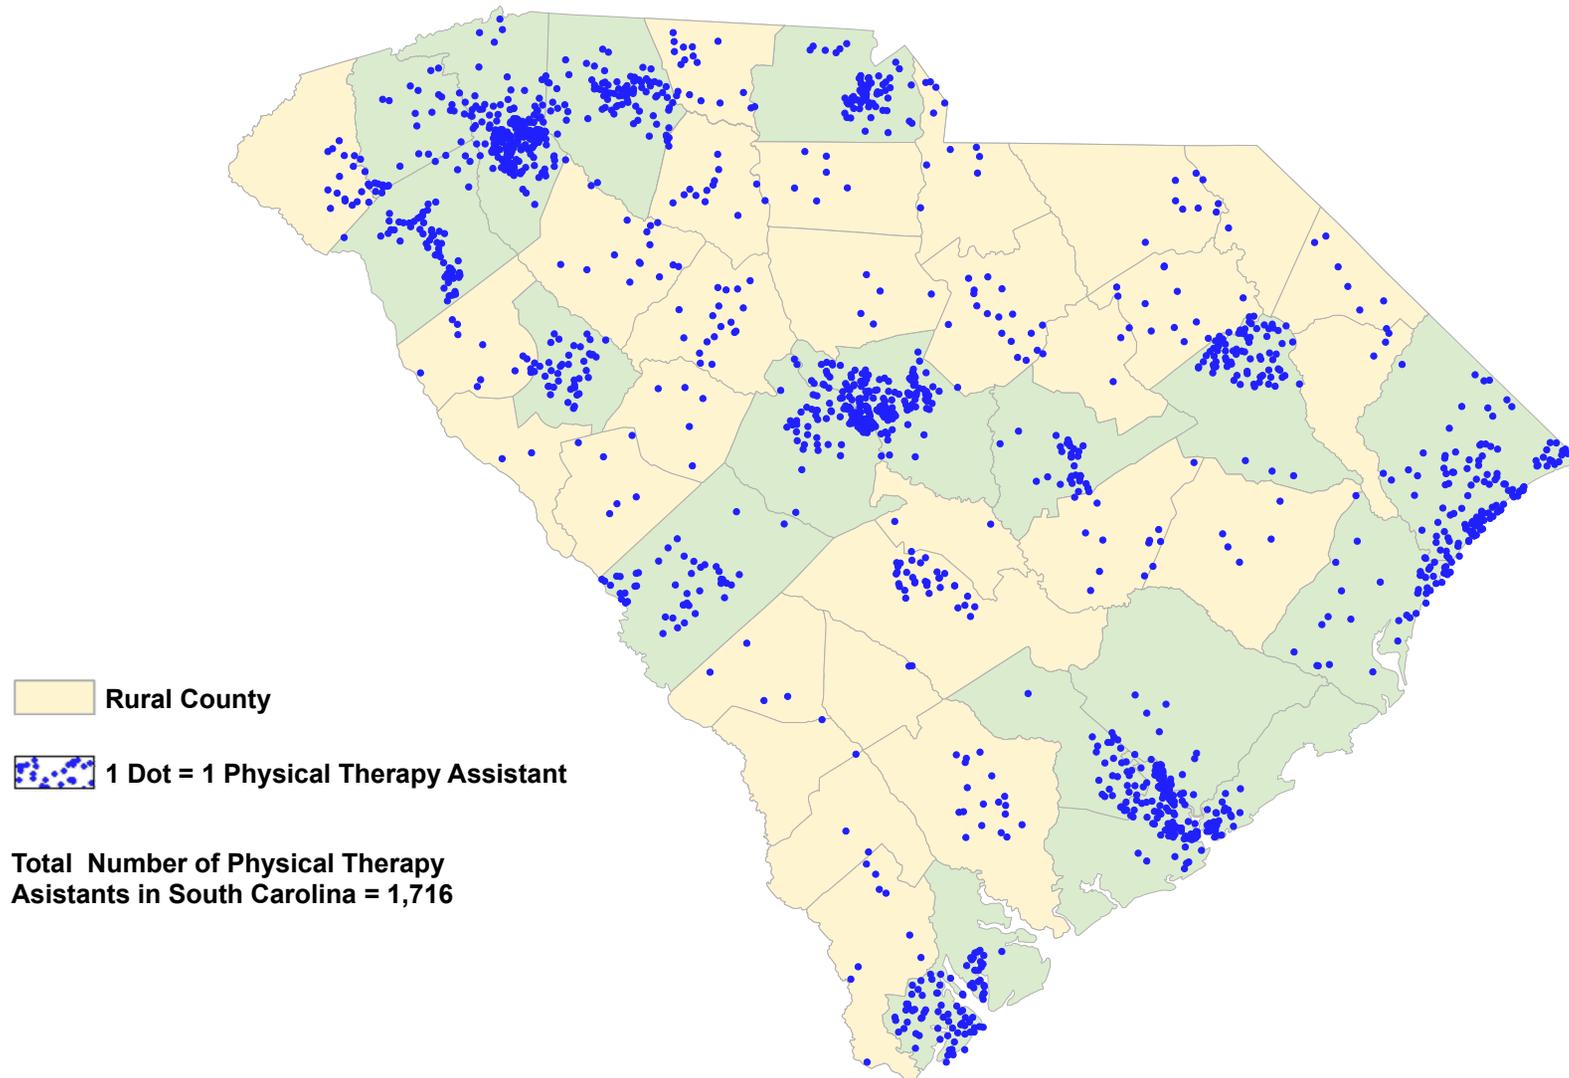

This information is based on all Physical Therapists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Physical Therapists Per 10,000 Population

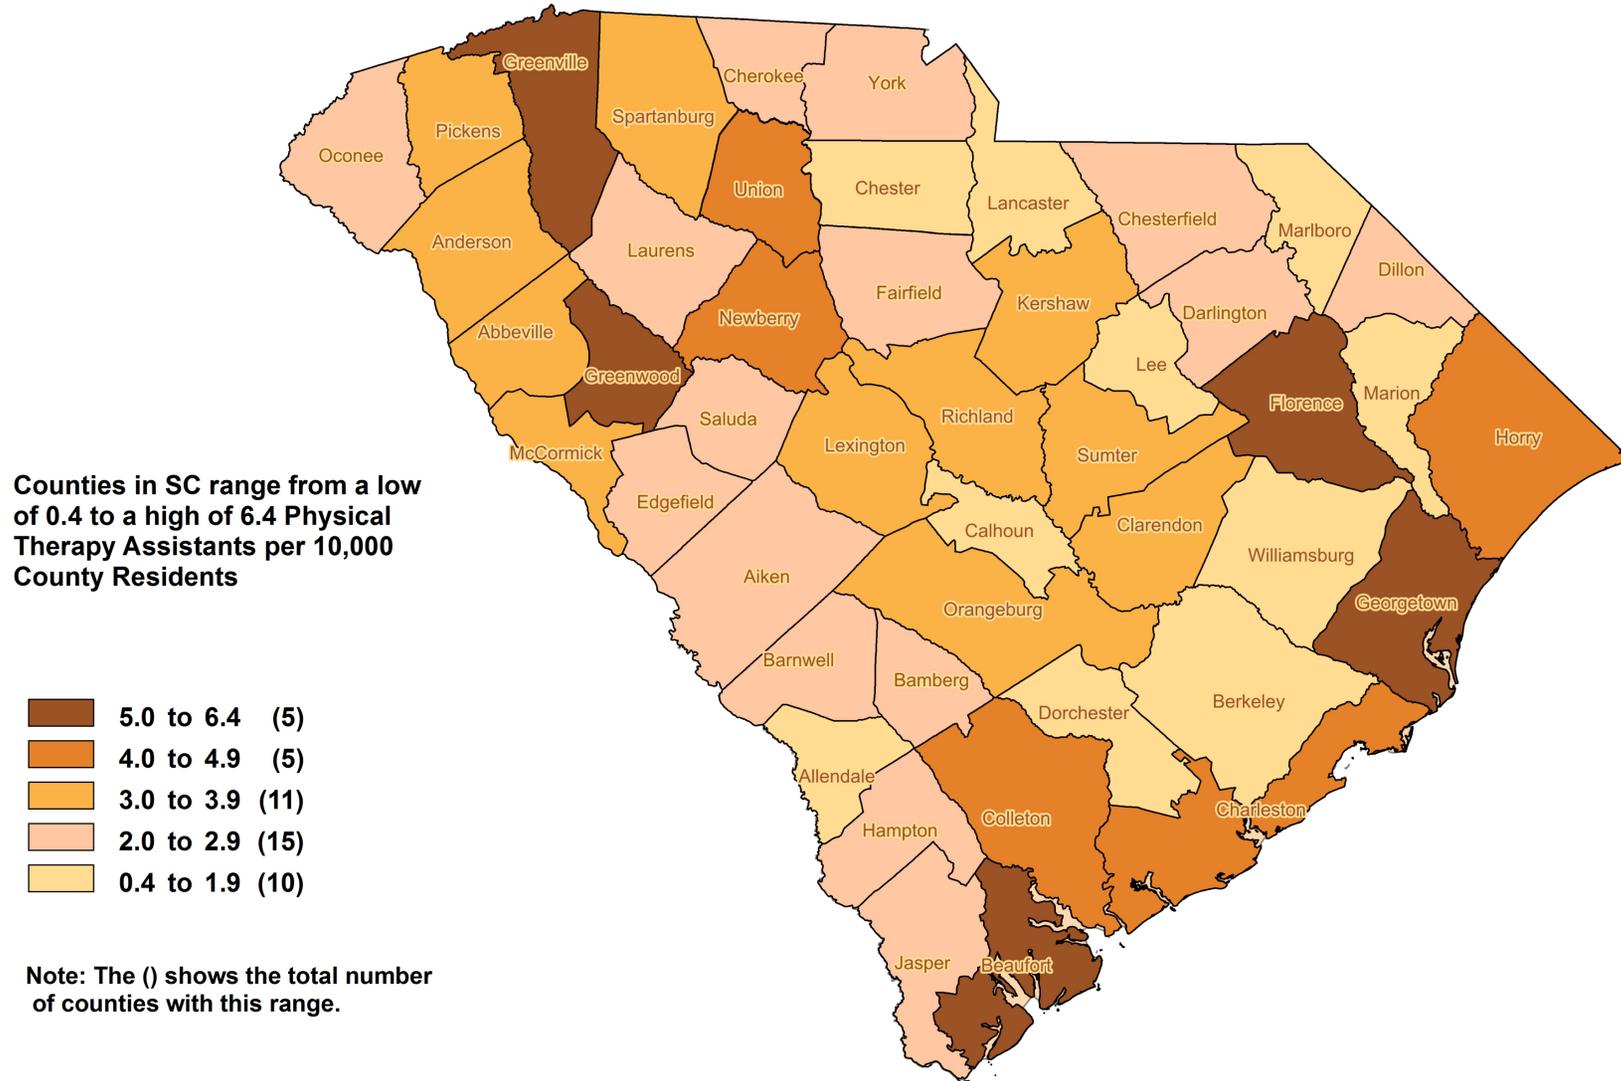

This information is based on all Physical Therapists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Provider counts are based on their primary practice location.

Physical Therapy Assistants in South Carolina by Primary Practice Location

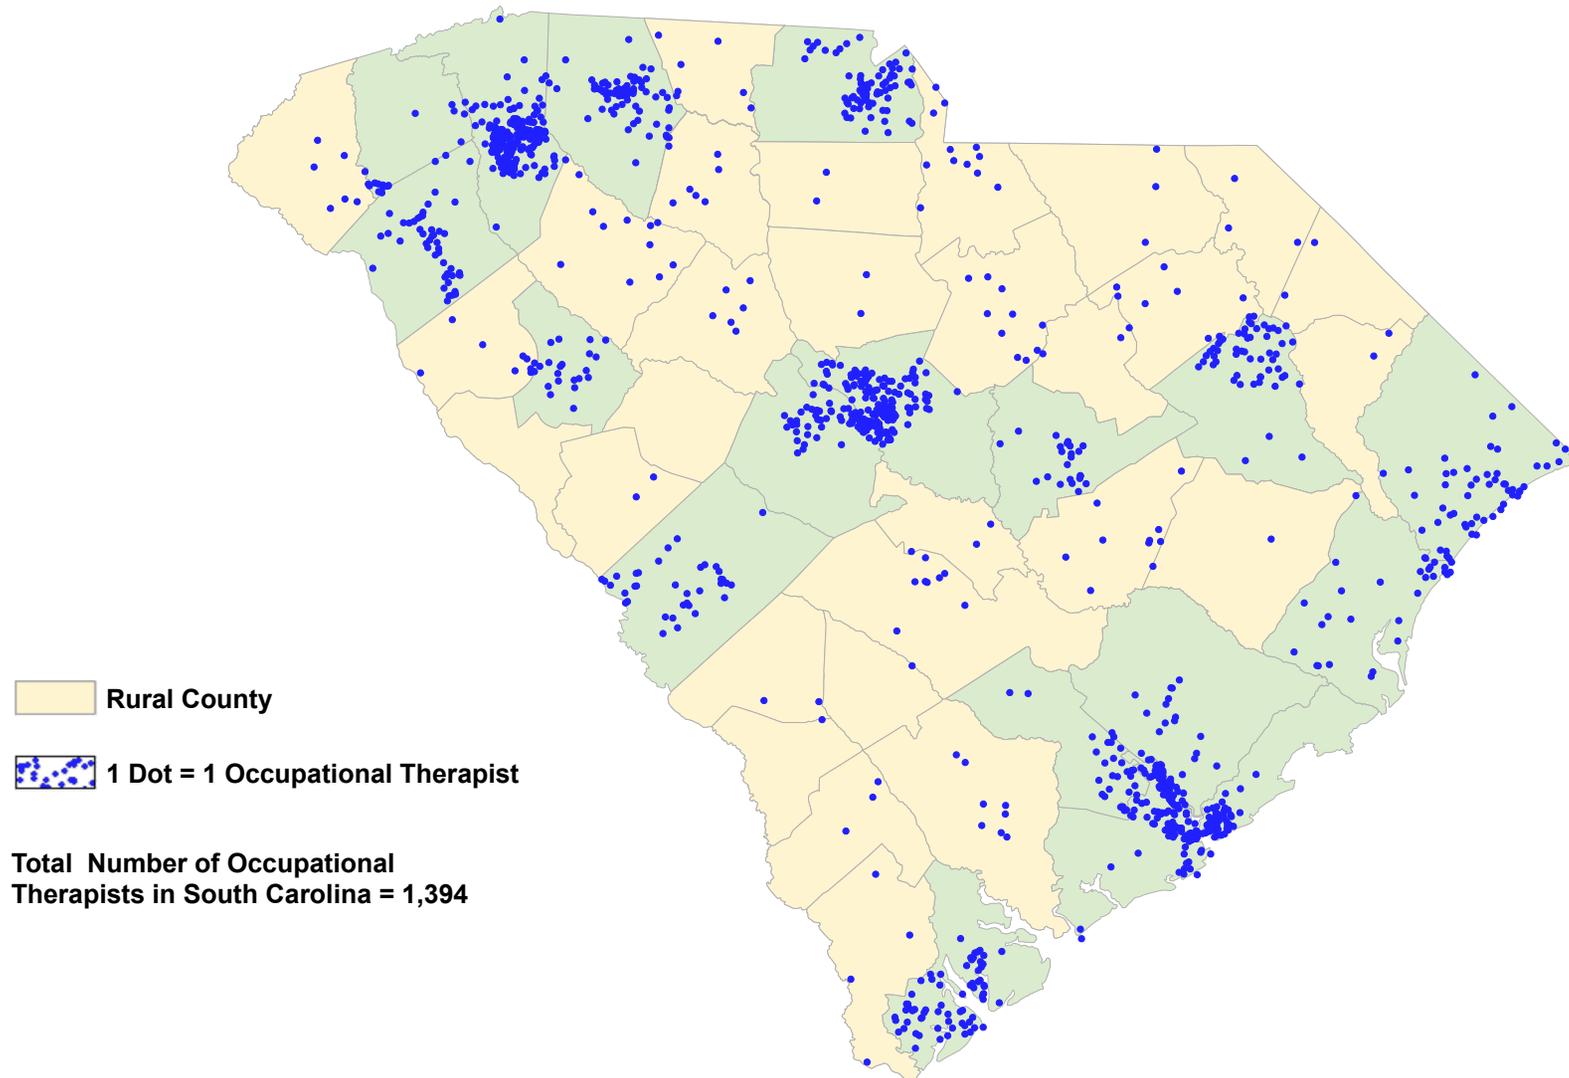

This information is based on all Physical Therapy Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Physical Therapy Assistants Per 10,000 Population

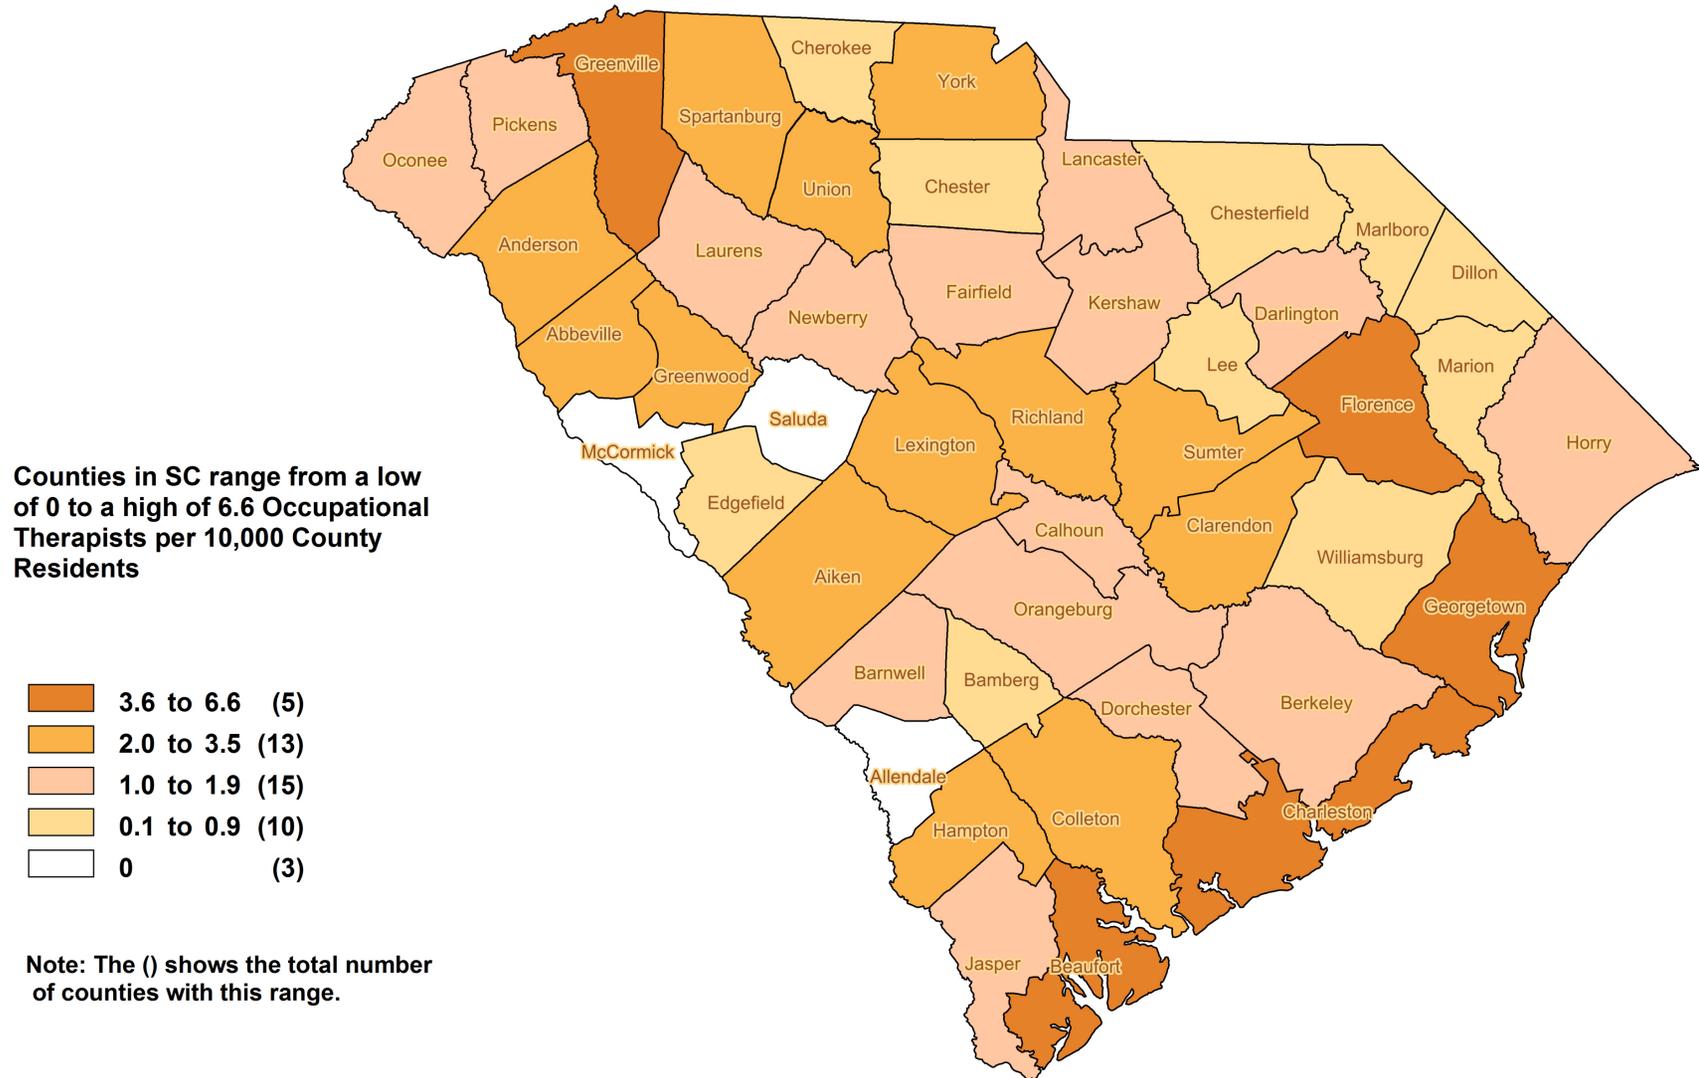

This information is based on all Physical Therapy Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Provider counts are based on their primary practice location.

Occupational Therapists in South Carolina by Primary Practice Location

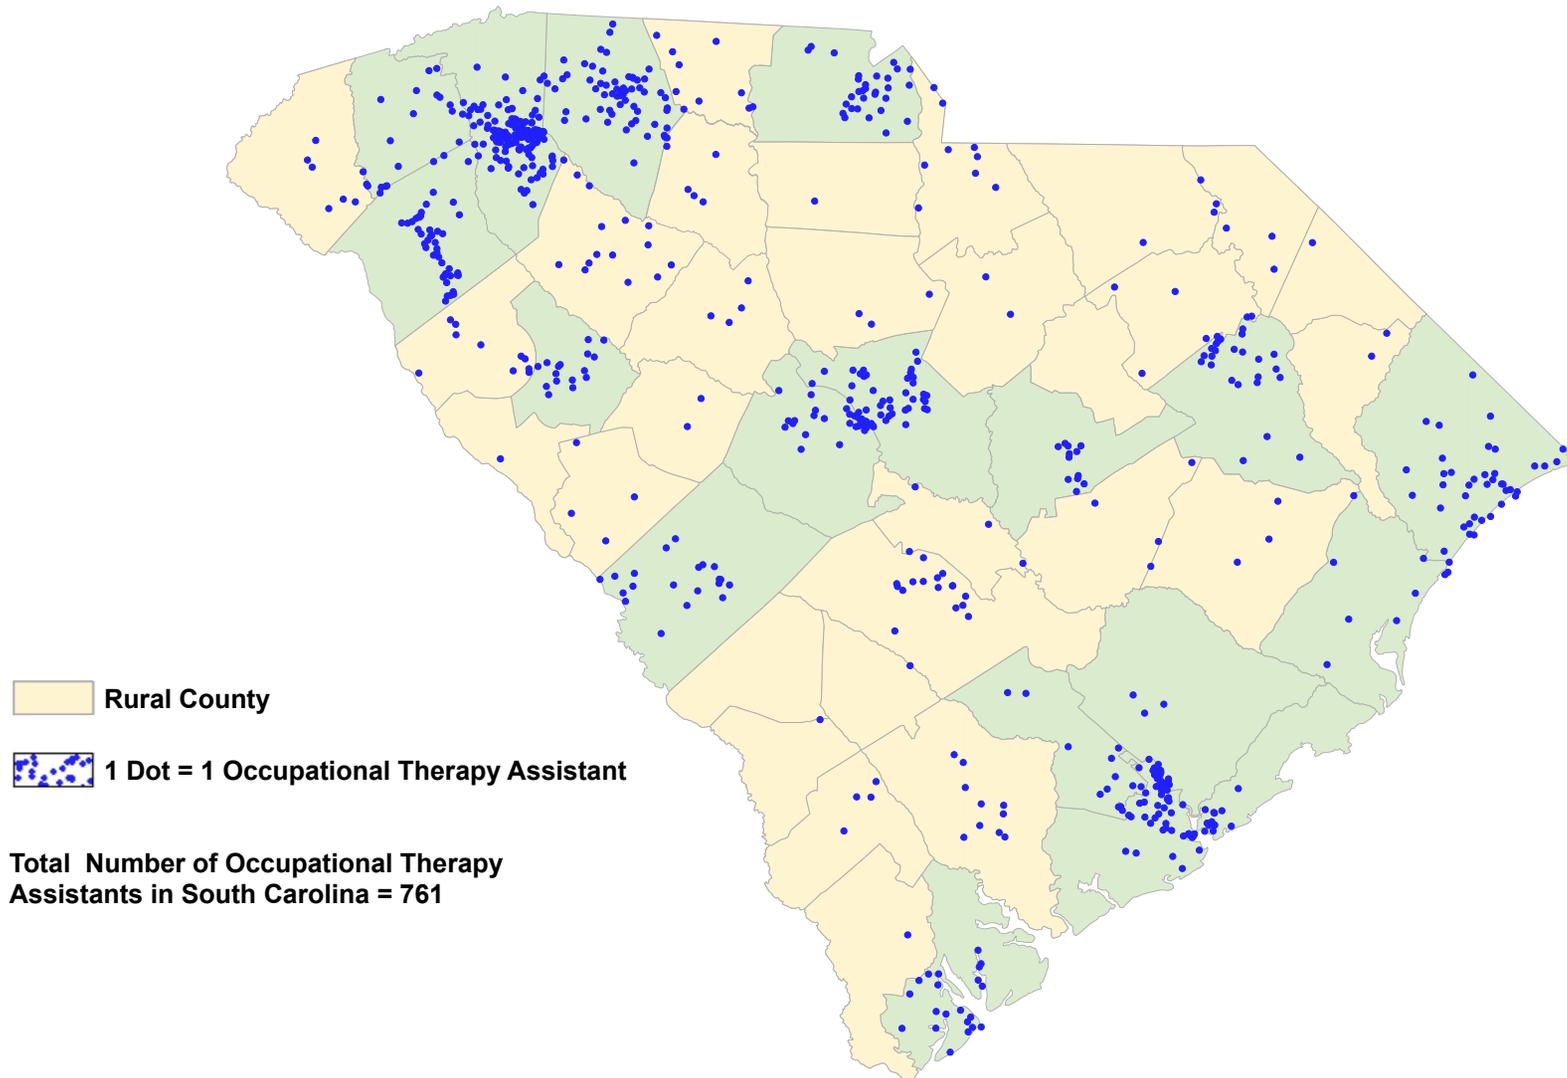

This information is based on all Occupational Therapists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Occupational Therapists Per 10,000 Population

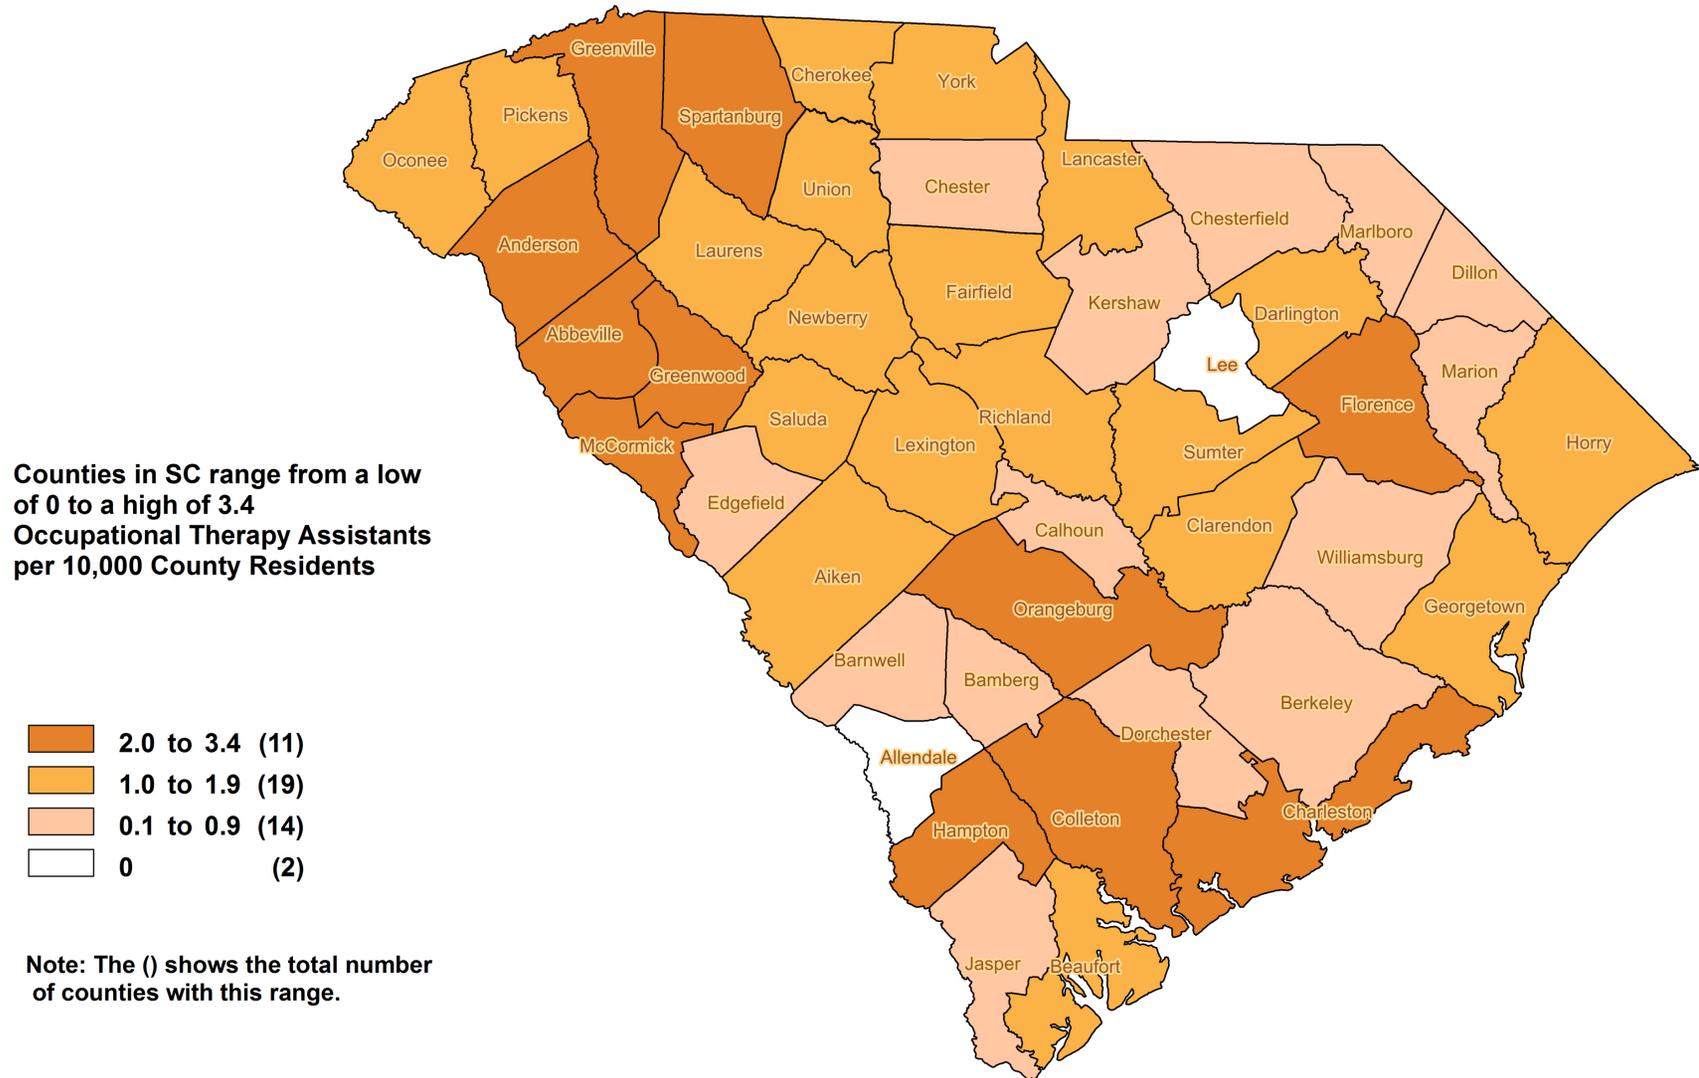

This information is based on all Occupational Therapists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2017. Provider counts are based on their primary practice location.

Occupational Therapy Assistants in South Carolina by Primary Practice Location

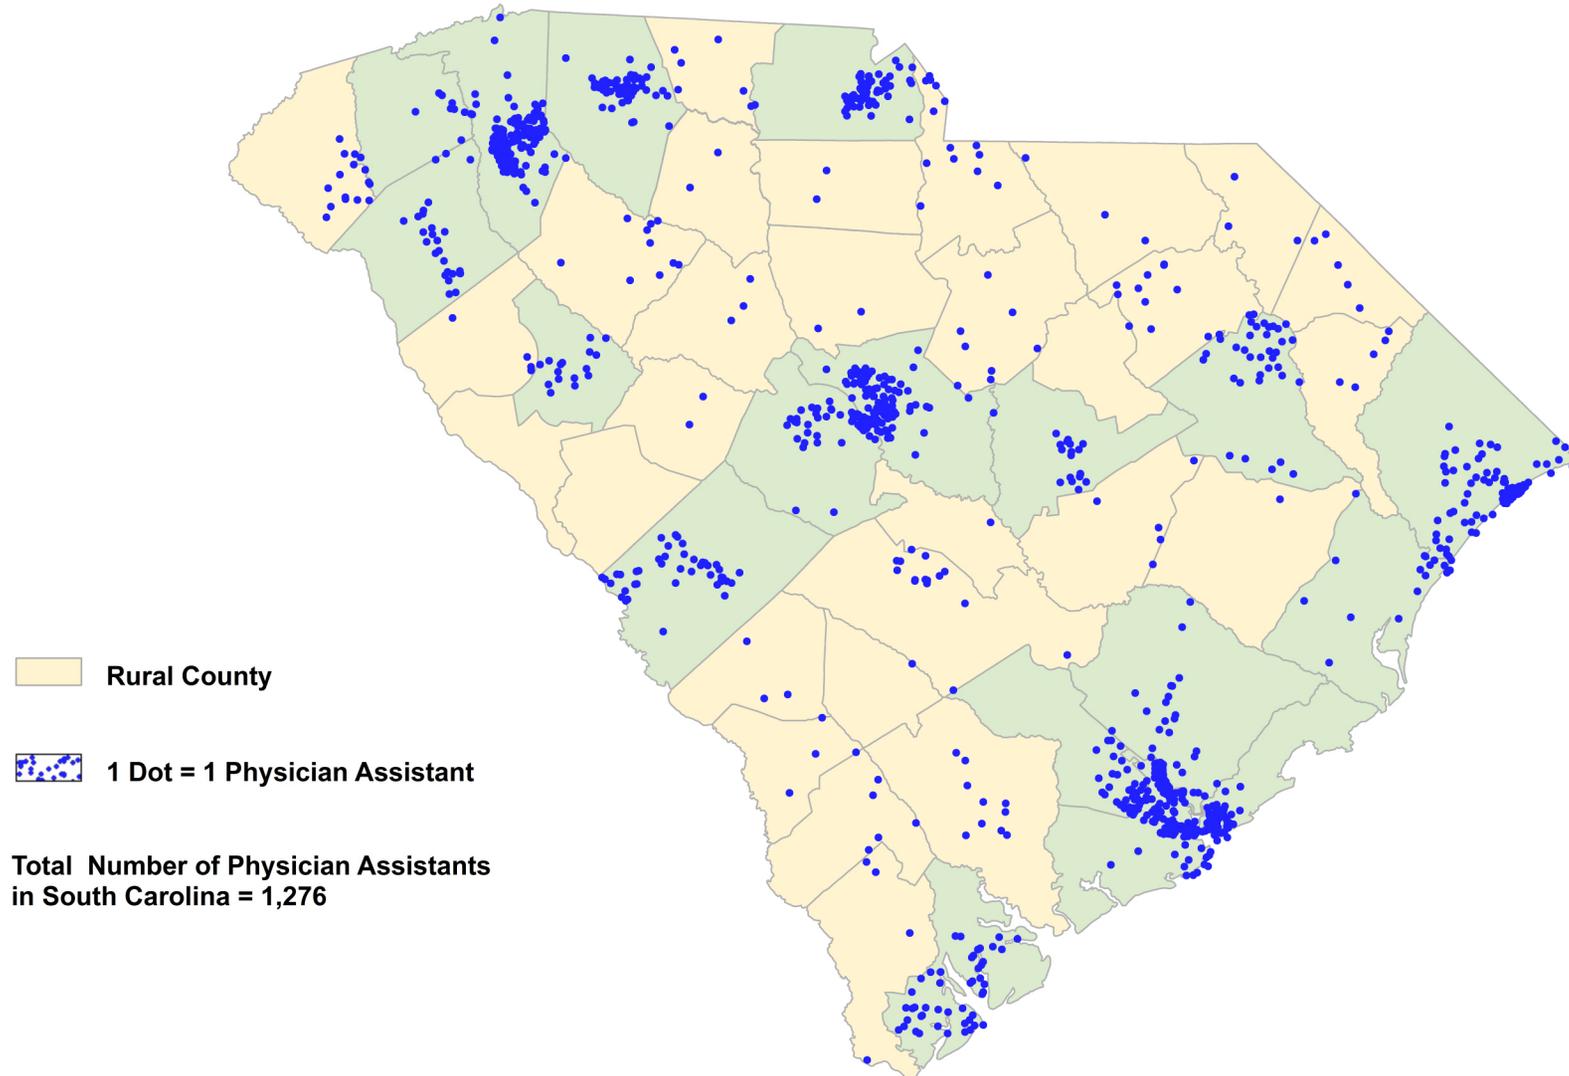

This information is based on all Occupational Therapy Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 1 Occupational Therapy Assistant who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Occupational Therapy Assistants Per 10,000 Population

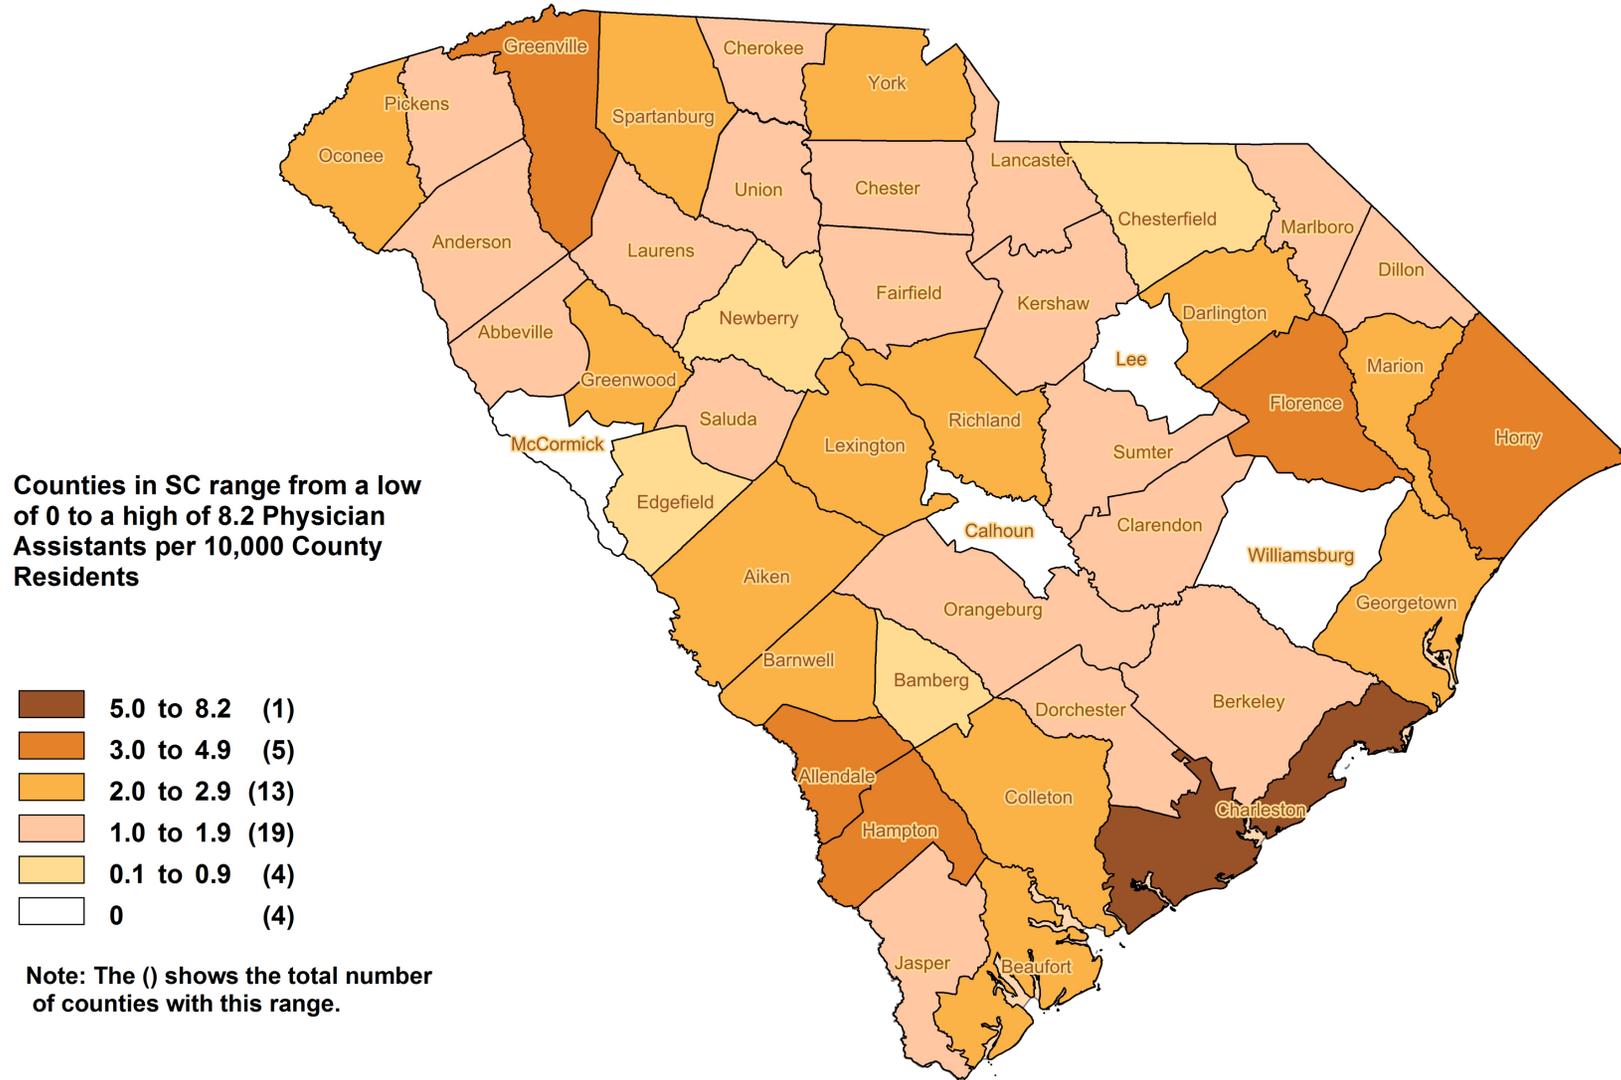

This information is based on all Occupational Therapy Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 03/15/2017. Provider counts are based on their primary practice location.

Physician Assistants in South Carolina by Primary Practice Location

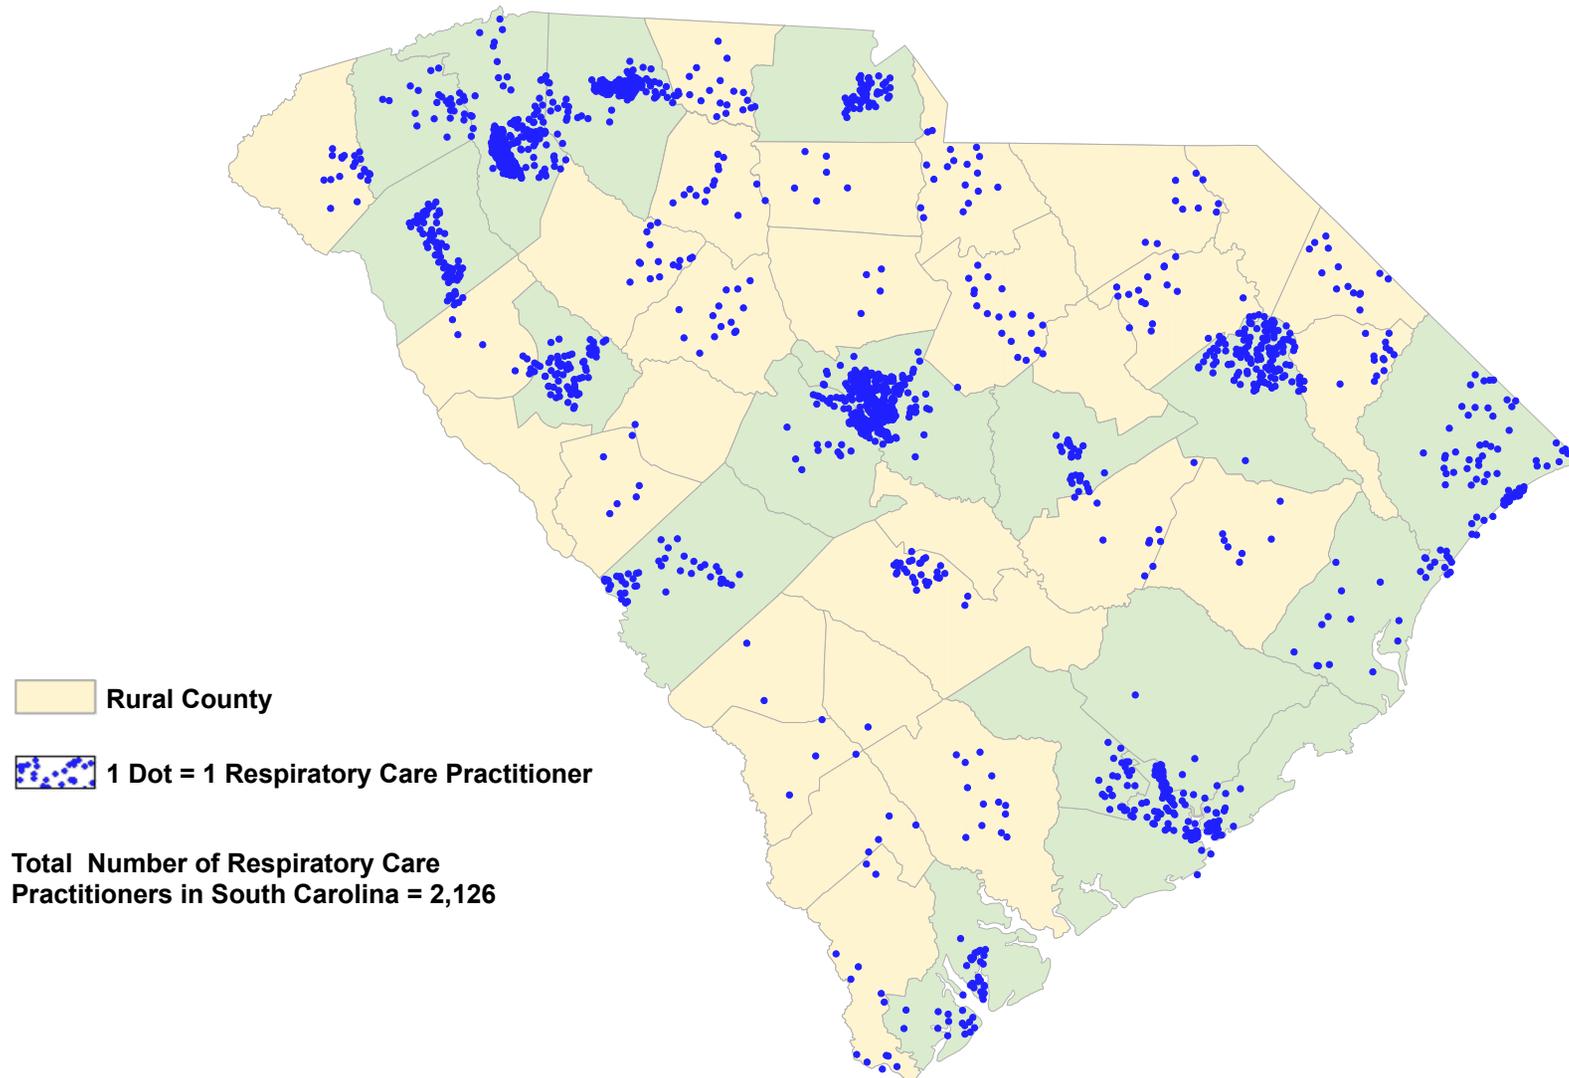

This information is based on all Physician Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 06/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 10 Physician Assistants who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Physician Assistants Per 10,000 Population

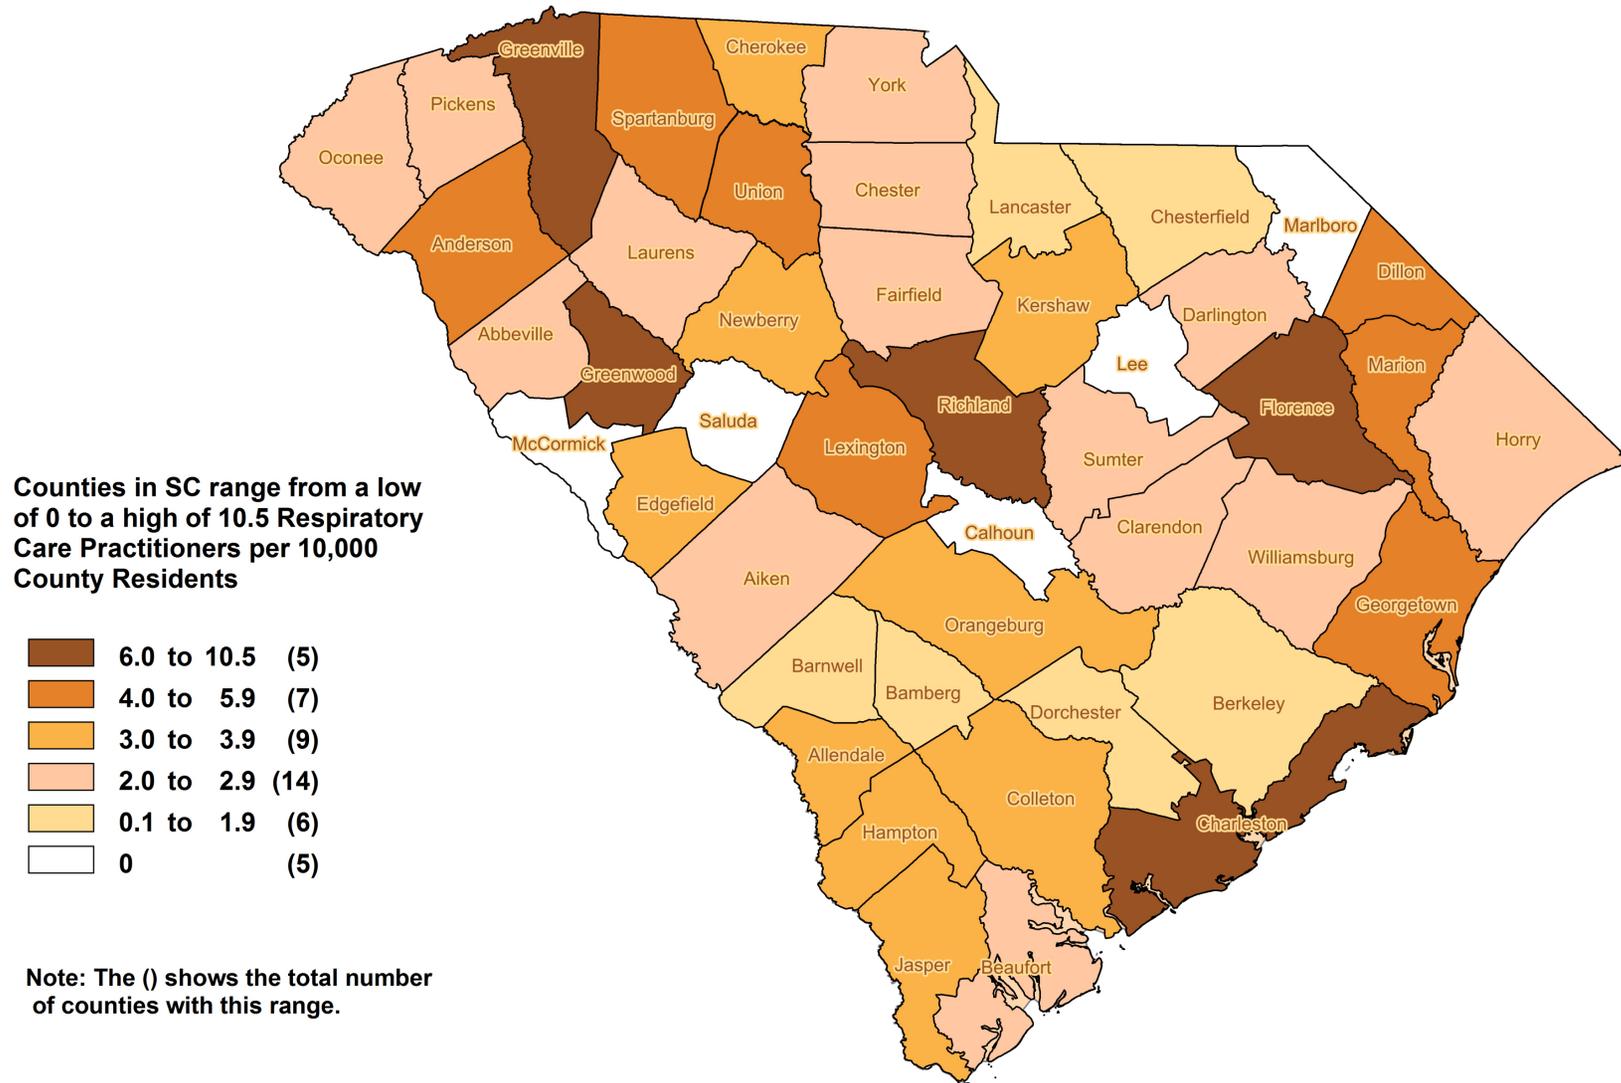

This information is based on all Physician Assistants with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2017. Provider counts are based on their primary practice location.

Respiratory Care Practitioners in South Carolina by Primary Practice Location

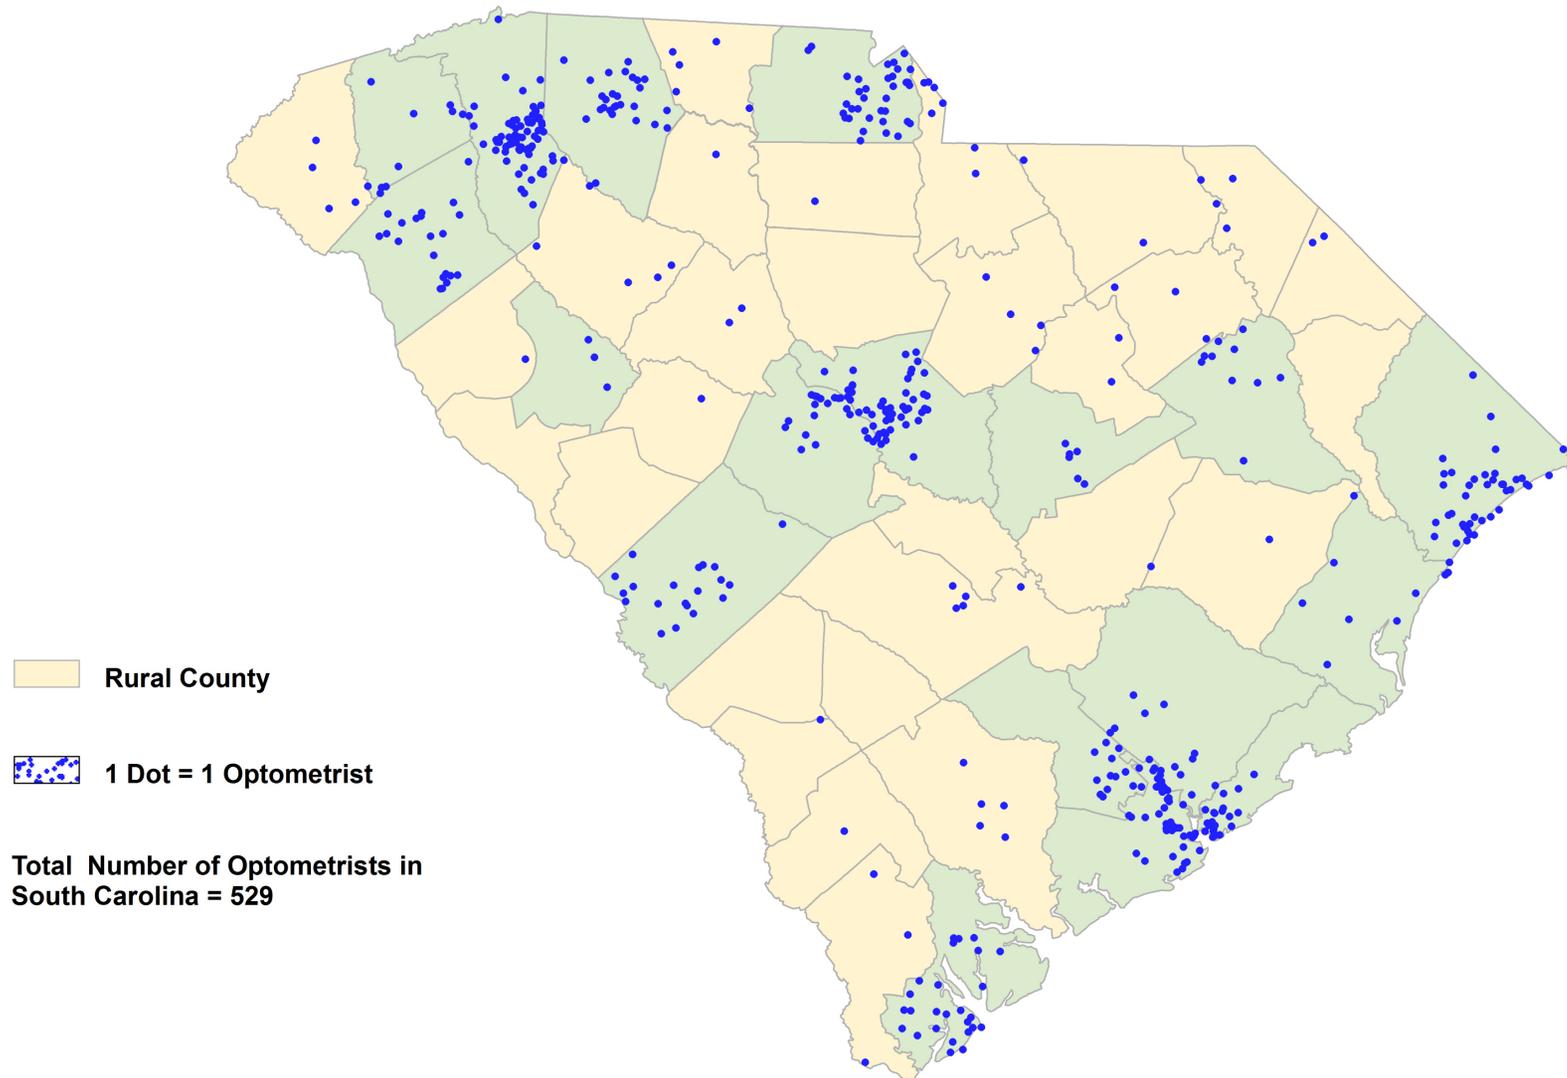

This information is based on all Respiratory Care Practitioners with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 05/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 3 Respiratory Care Practitioners who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Respiratory Care Practitioners Per 10,000 Population

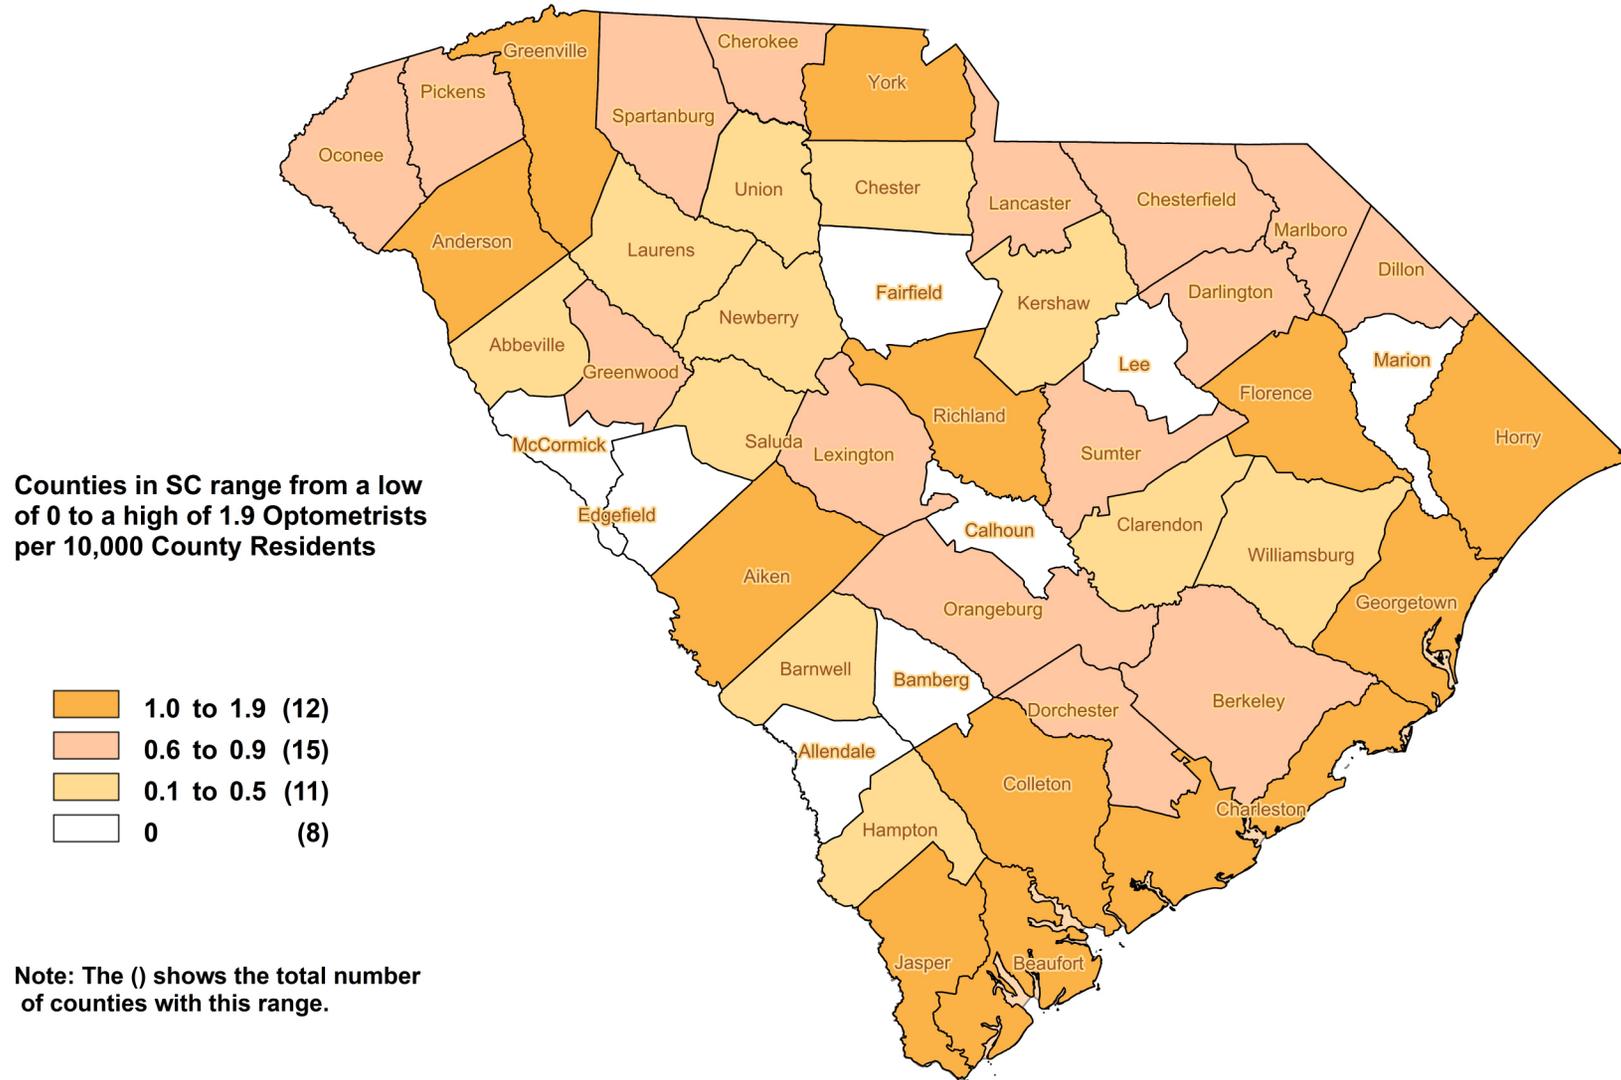

This information is based on all Respiratory Care Practitioners with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 05/30/2017. Provider counts are based on their primary practice location.

Optometrists in South Carolina by Primary Practice Location

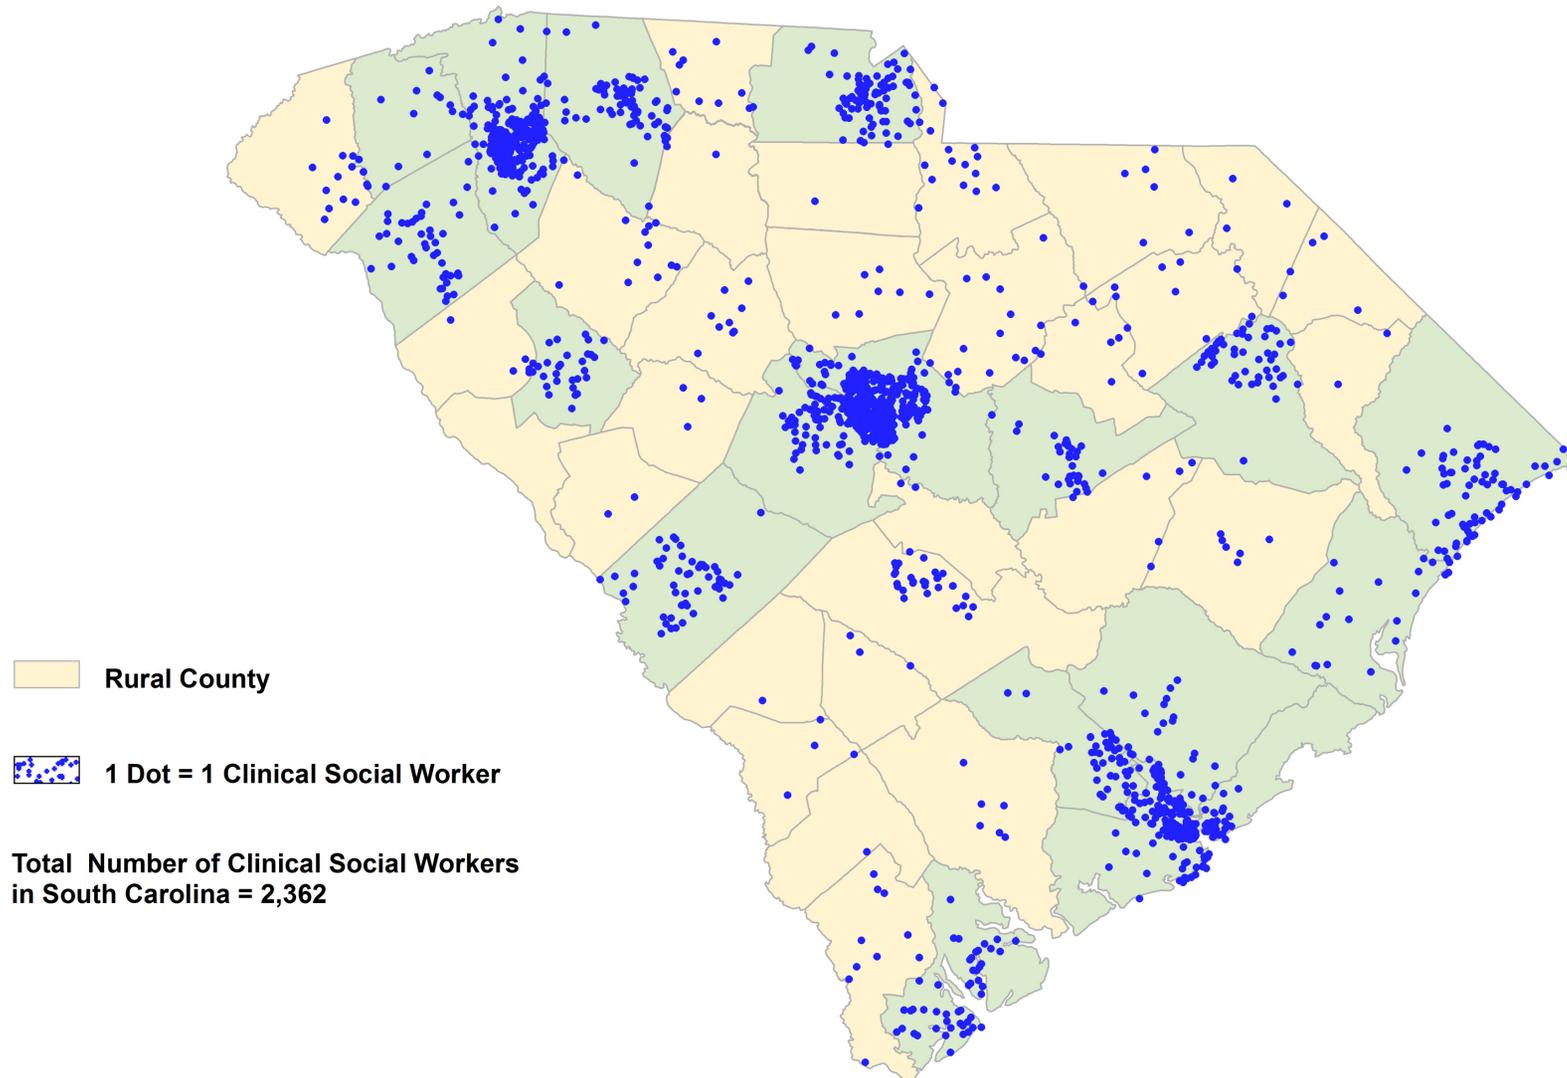

This information is based on all Optometrists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 09/30/2017. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 18 Optometrists who did not have a valid South Carolina zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Optometrists Per 10,000 Population

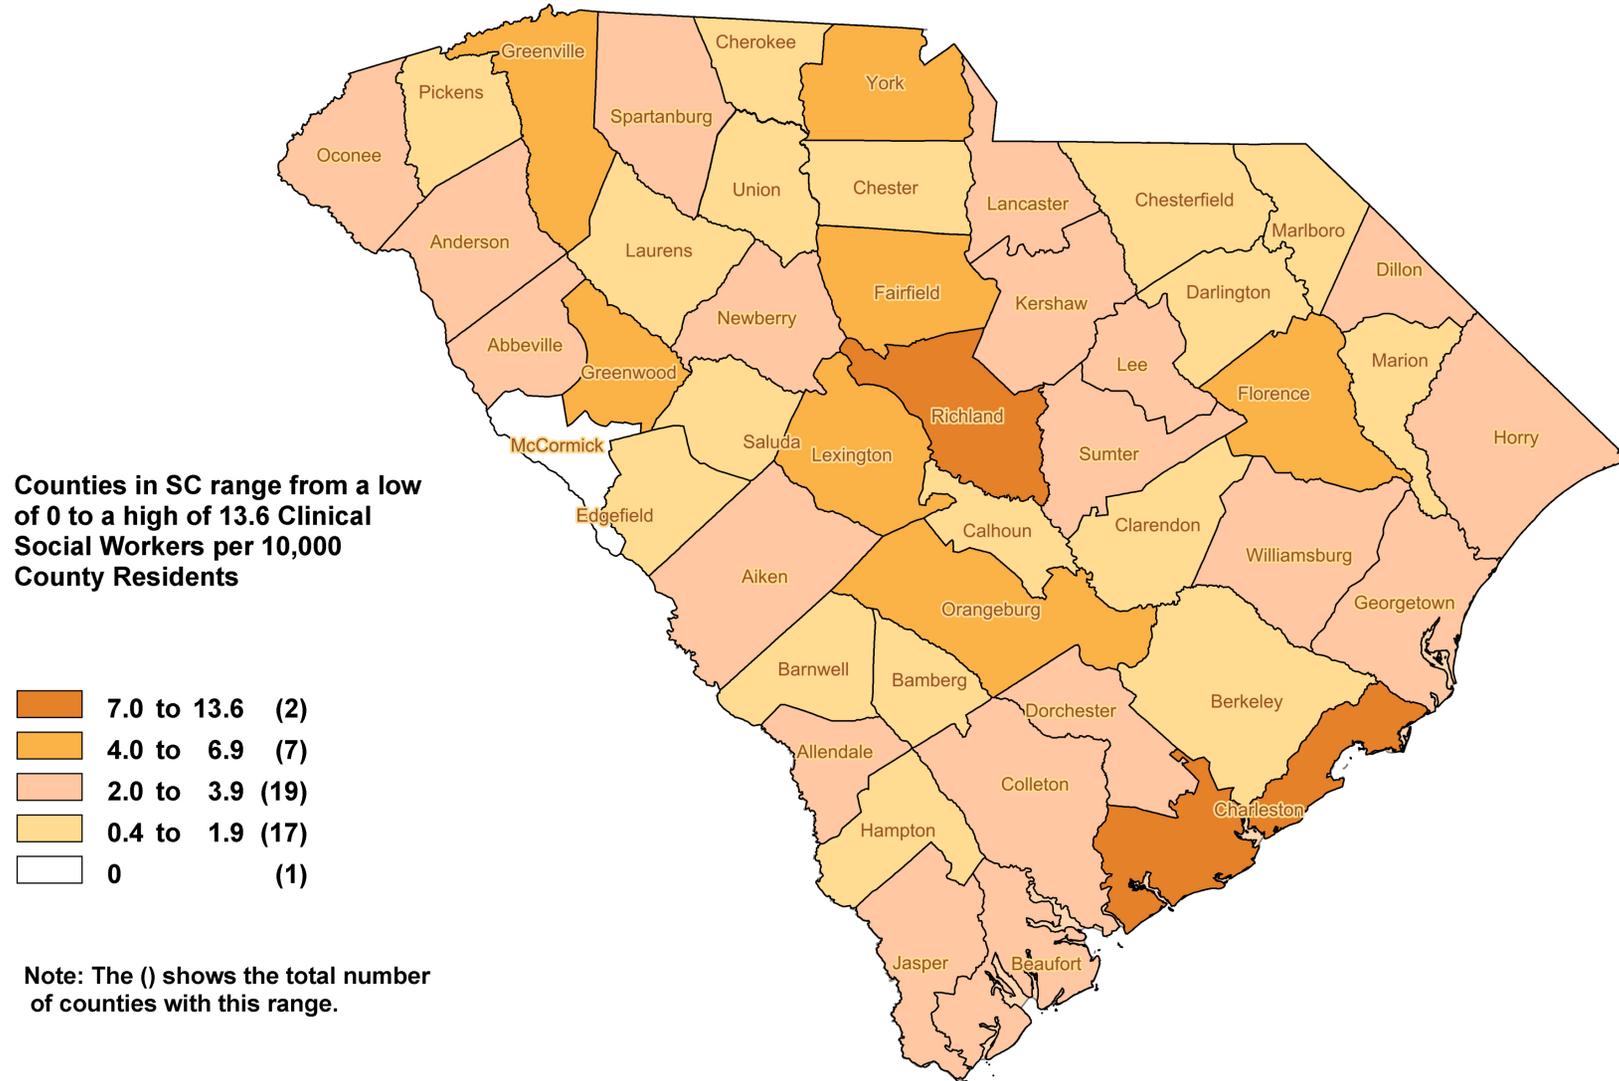

This information is based on all Optometrists with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 9/30/2017. Provider counts are based on the primary practice location.

Clinical Social Workers in South Carolina by Primary Practice Location

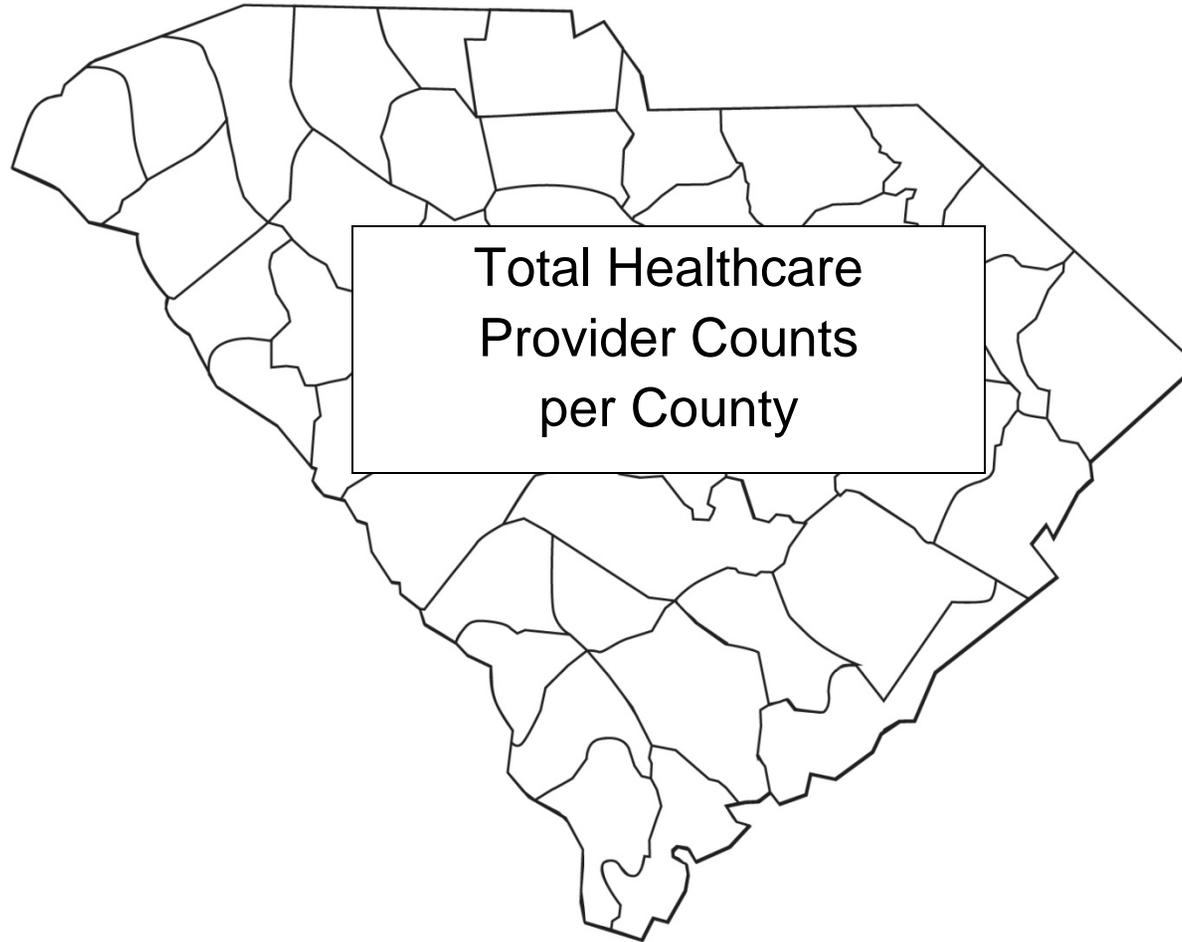

This information is based on all Clinical Social Workers with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2016. Locations plotted here are the primary practice zip code locations. Dots are randomly placed within the zip code area and may not represent the street location of the practice. This map omits 374 Clinical Social Workers who did not report primary practice location information including zip code. Rural counties are those counties where 50% or more of the population lives outside an urbanized area, based on the 2010 census counts.

Concentration of Clinical Social Workers Per 10,000 Population

This information is based on all Clinical Social Workers with an active license to practice and a practice location in South Carolina as reported during the license renewal period ending 12/31/2016. Provider counts are based on the primary practice location.

Total Number of Physicians Reporting Primary or Secondary Practice Sites by County

County	# whose primary practice is in this county	# who have a subsidiary practice in this county
Abbeville	16	18
Aiken	279	12
Allendale	9	6
Anderson	401	29
Bamberg	7	4
Barnwell	5	5

Nurses can report multiple practice site locations, if applicable. This table includes the number of Licensed Practical Nurses (LPNs) who had their primary practice in a specific county and the additional number who reported a secondary practice site in that county during the license period ending 04/30/2016. This is a count of LPNs practicing within the county, not a count of practice sites. One LPN did not report their primary practice county location.

Dentists Reporting Primary or Secondary Practice Sites by County

County	# whose primary practice is in this county	# who have a subsidiary practice in this county

Williamsburg	7	0
York	107	2

Social Workers may report up to 2 practice locations. This publication defines a clinical social worker as someone with a license status of CP, AP, Dual or LMSW employed in the settings approved by the regulatory board: non-profit social service agencies, government agencies, hospitals and other healthcare delivery entities as reported during the license renewal period ending 12/31/16. About 15% of clinical social workers actively employed in their field in South Carolina did not provide a primary practice location. In those cases, home county was substituted for their primary practice location. Seven did not have any primary location information.

Appendix I: Data Definitions and Sources

Vital Statistics

Resident Births - The number of all births recorded in 2017. Births are allocated to the county of the mother's residence.

Source: Data were generated and downloaded December 11, 2018 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/bdp/tables/birthtable.aspx>. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

Resident Deaths - The number of all deaths recorded in 2017. Deaths are allocated to the county of residence of the decedent.

Source: Data were generated and downloaded December 11, 2018 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/bdp/tables/death2table.aspx>. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

Total Pregnancies Number and Rate - The total number of pregnancies is an estimate based on the sum of live births, abortions, and fetal deaths. Rates are calculated per 1,000 women age 15 – 44 in the area. Data reported here are from 2017.

Note that state-wide pregnancy counts and rates include information not assigned to any specific county, and thus the sum of the county figures do not sum to the state-wide totals. This also affects regional area figures which are based on the sum of the counties included in each region. Pregnancies which are included in the state-wide totals but are not assigned to a specific county are thus not included in the regional area sums.

Source: Pregnancy counts and rates were generated and downloaded December 11, 2018 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/pregnancy/input.aspx>. Regional aggregate counts of pregnancy and pregnancy rates were calculated by the South Carolina Office for Healthcare Workforce from county-level pregnancy figures. Regional rates were calculated using 2017 Census population counts for women age 15 – 44 in the area.

% of Births <2500 Grams - This is the percentage of births in 2017 to mothers with a residence in a specific county in which the baby's birth weight was below 2500 grams.

Source: Tables were generated and downloaded December 11, 2018 to generate the number of babies born with weights ranging from 0 – 2499 grams from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/bdp/tables/birthtable.aspx>. Percentages were calculated by dividing number of low birth-weight babies by total number of live births in the county. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

Teen Pregnancies Number and Rate - Based on reported pregnancies, live births and abortions among women age 10 - 19 in 2017. Rates are calculated per 1,000 female population 10 – 19 years of age in the area.

Note that state-wide teen pregnancy counts and rates include information not assigned to any specific county, and thus the sum of the county figures do not sum to the state-wide totals. This also affects regional area figures which are based on the sum of the counties included in each region. Teen pregnancies which are included in the state-wide totals but are not assigned to a specific county are thus not included in the regional area sums.

Source: Pregnancy data were generated and downloaded December 11, 2018 by specifying data for maternal age 10 – 19 from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/pregnancy/input.aspx>. Population data for the rate calculations were generated and downloaded by specifying data for females age 10 – 19 from the SC DHEC SCAN website:

<http://scangis.dhec.sc.gov/scan/bdp/tables/populationtable.aspx>. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

White Infant Mortality Rate – This rate is defined as the number of infant deaths per 1,000 annual live births to women who report their race as White. Due to low numbers in some counties in the single year statistics, we report a rate calculated from years 2015-2017.

Source: Rates and frequencies were generated and downloaded December 11, 2018 by specifying data for Race of Child = "White" from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/mch/infantmortality/input.aspx>. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

Black Infant Mortality Rate - This rate is defined as the number of infant deaths per 1,000 annual live births to women who report their race as Black. Due to low numbers in some counties in the single year statistics, we report a rate calculated from years 2015-2017.

Source: Rates and frequencies were generated and downloaded December 11, 2018 by specifying data for Race of Child = "Black" from the SC DHEC SCAN website: <http://scangis.dhec.sc.gov/scan/mch/infantmortality/input.aspx>. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

Health Status and Behaviors

Cancer Deaths – All deaths resulting from cancer in 2017, based on death certificate data.

Source: Data were generated and downloaded January 17, 2018 by specifying all cancer deaths by county on the SC DHEC SCAN website <http://scangis.dhec.sc.gov/scan/cancer2/mortinput.aspx>. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

Behavioral Risk Factor Surveillance Survey data - Many of the health status indicators presented in this book are based on data collected in the South Carolina section of the Behavioral Risk Factor Surveillance Survey sponsored by the Centers for Disease Control. This edition of the data book reports county-level estimates generated by pooling 3 years of BRFSS data: 2015 to 2017. County, state and regional-level data was provided by the DHEC Office of Public Health Statistics and Information Services. For those counties with a sample size less than 200 data was not provided and the DHEC regional statistic was reported instead for that county. In the case of Perinatal regions, the Spartanburg region was too small to calculate accurate statistics so the values in the Greenville region were assigned to Spartanburg region by the OHW staff. The following measures of health status were all drawn from this source:

% of Adults Diagnosed with Heart Disease - This is the percentage of adults who answered Yes to: "Has a doctor, nurse, or other health professional EVER told you that you had angina or coronary heart disease?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

% of Adults Diagnosed with Hypertension - This is the percentage of adults who answered Yes to: "Have you ever been told by a doctor, nurse or other health professional that you have high blood pressure?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

% of Adults Diagnosed with Diabetes - This is the percentage of adults who answered Yes to: "Have you EVER been told by a doctor that you have diabetes?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

% of Adults Who Currently Smoke - This number is calculated from the Smoking Risk Factor statistic to determine current smoking status among adults, based on responses to the Behavioral Risk Factor Surveillance Survey in South Carolina.

% Reporting a Sedentary Lifestyle - This is the percentage of adults who answered No to: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

% of Adults Overweight or Obese (BMI > 25) – This percentage is based on a calculated risk factor for obesity derived from self-reports of Body Mass Index greater than 25 for adults age 20 and over in the Behavioral Risk Factor Surveillance Survey in South Carolina.

% of Adults Without Health Insurance – This is the percentage of respondents who said No to: "Do you have any kind of health care coverage, including health insurance, prepaid plans such as HMOs, or government plans such as Medicare or Indian Health Services?" in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Healthcare Facilities

General Hospital Beds – The number of general use hospital beds in licensed hospitals. The bed count does not include specialty care beds such as those dedicated to neonatal intensive care, psychiatric, rehabilitation or substance abuse services.

Source: Hospital and Institutional General Infirmaries report published December 11, 2018 by the South Carolina Department of Health and Environmental Control, Division of Health Licensing. Downloaded January 7, 2018 from <https://www.scdhec.gov/Health/docs/hrhptl-cty.pdf>.

% Hospital Discharges within Home County – The percent of persons discharged from in-patient hospital treatment inside the patient's county of residence was calculated by dividing the number of in-county resident discharges by the total number of discharges from short-term general hospitals in that county.

Source: Data provided by the South Carolina Revenue and Fiscal Affairs Office, Health and Demographics Section on January 7, 2018 based on hospital records for 2017. Other hospital utilization statistics can be found at <http://rfa.sc.gov/healthcare/utilization>.

Skilled Nursing Facility Beds – The number of skilled nursing and institutional beds in licensed nursing homes.

Source: Untitled report published December 11, 2018 by the South Carolina Department of Health and Environmental Control, Division of Health Licensing. Downloaded January 7, 2019 from: <http://www.scdhec.gov/Health/Docs/LicensedFacilities/hrnh.pdf>.

Socio-Economic Factors

% Unemployed - 2017 annual average rate of unemployment at the state and county level. These numbers are not seasonally adjusted.

Source: U.S. Bureau of Labor Statistics website: <http://www.bls.gov/lau/#tables>. See the county data tables for 2017. Downloaded on January 8, 2019. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

% of Households with Income < \$25,000 - This is the percentage of adults who reported their annual household income from all sources as less than \$25,000.

Source: Behavioral Risk Factor Surveillance Survey pooled data from 2015 through 2017 provided by the DHEC Office of Public Health Statistics and Information Services. For counties with a sample size less than 200 data was not provided and the DHEC regional statistic was reported instead for that county.

% With High School Education or Less - This is the percentage of adults who reported the highest grade or year of school completed as less than college level in the Behavioral Risk Factor Surveillance Survey in South Carolina.

Source: Behavioral Risk Factor Surveillance Survey pooled data from 2015 through 2017 provided by the DHEC Office of Public Health Statistics and Information Services. For counties with a sample size less than 200 data was not provided and the DHEC regional statistic was reported instead for that county.

Covered by Medicaid - Number of persons with full coverage under the South Carolina Medicaid program, including children covered by the CHIP program, during fiscal year 2017. Persons with partial coverage are not included in these counts.

Source: SC HealthViz South Carolina eHEALTH Medicaid Statistics. Downloaded January 17, 2019 from: <http://www.schealthviz.sc.edu/medicaid-enrollment> .

Per Capita Income - Personal income is the income that is received by persons from all sources. It is calculated as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. Per capita income is calculated as the personal income of all residents in a given area divided by the resident population of that area. In computing per capita personal income, the Bureau of Economic Analysis uses the Census Bureau's annual midyear population estimates.

Source: U.S. Department of Commerce, Bureau of Economic Analysis, Regional Data, Local Area Personal Income and Employment, Table CA1-3 for South Carolina. Reported figures are for 2017. Downloaded January 7, 2019 from: <http://www.bea.gov/regional/reis/>. Regional aggregate counts were calculated by the South Carolina Office for Healthcare Workforce from county-level figures.

Regional Definitions

Area Health Education Centers (AHECs) - The South Carolina AHEC system encompasses four independent regional centers and a central program office. It functions as a cooperative effort of the Medical University of South Carolina, the University of South Carolina, South Carolina community teaching hospitals, the four regional AHEC Centers and the system program office. AHEC implements programs designed to: increase the number of young people who aspire to become healthcare professionals, emphasizing underrepresented ethnic minority groups and the economically disadvantaged; facilitate clinical rotations for health professions students in rural and underserved areas; increase the physician workforce by sponsoring graduate medical education residency training programs; enhance clinical competence by providing educational programs for healthcare providers at or near their workplace; and increase the healthcare workforce by maintaining programs to recruit and retain primary care providers.

Source: Website of the South Carolina AHEC, <http://www.scahec.net/about.html>.

Health Professional Shortage Areas (HPSAs) - The federal Health Resources and Services Administration Shortage Designation Branch within the U.S. Department of Health and Human Services identifies geographic areas, population groups, or facilities which have unmet healthcare needs as Health Professional Shortage Areas (HPSA). These designations provide a means of prioritizing where limited federal resources should be focused. HPSA designations are granted in three areas: primary medical care, dental care and mental health. A HPSA designation may affect an entire county (labeled as "whole"), a population subgroup within a county, or a facility which serves the public within a county (labeled as "partial"). When no geographic area, population group, or public facility within a county has been defined as a HPSA then the HPSA designation for that county is labeled as "none" in this book.

Source: HPSA designations downloaded on December 2, 2016 from the U.S. Department of Health and Human Services, Health Resources and Services Administration Shortage Designation Branch website: <http://hpsafind.hrsa.gov/HPSASearch.aspx>.

Perinatal Regions - Perinatal assessment regions support a geographically structured approach to assuring risk-appropriate care for all mothers and infants with a goal of improving perinatal outcomes and reducing infant mortality. There are five regions organized around the regional Perinatal Centers designated by the South Carolina Department of Health and Environmental Control. For more information about perinatal services within the regions see the South Carolina Health Plan enacted August, 2015.

Source: SC DHEC South Carolina Health Plan enacted August, 2015, available at <http://www.scdhec.gov/Health/docs/FinalSHP.pdf>.

DHEC Planning Regions –The South Carolina Department of Health and Environmental Control organizes the state into four environmental affairs regions: Upstate, Midlands, Pee Dee, and Lowcountry.

Source: A map of the regions can be found at: <http://www.scdhec.gov/HomeAndEnvironment/DHECLocations/>.

Workforce Development Board Regions - The State Workforce Development Boards (SWIB) provides direction to the South Carolina Department of Employment and Workforce on workforce development issues, particularly those pertaining to implementation of the Workforce Investment Act. Twelve regional Workforce Development Boards work directly with local businesses, agencies and other partners in their region to deliver services and programs. These regional boards provide oversight of the Workforce Investment Act in their area and oversee local SC Works Centers which include a variety of workforce partners and programs.

Source: Regional WDB service area information can be found at http://workforceinvestmentworks.com/workforce_board_info.asp?st=SC

Metropolitan Statistical Areas (MSAs) - Metropolitan and micropolitan statistical areas are geographic entities defined by the U.S. Office of Management and Budget (OMB) for use by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics. A metro area contains a core urban area of 50,000 or more population. A micropolitan area contains an urban core of at least 10,000 but less than 50,000 population. Each metro or micro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration with the urban core (as measured by commuting to work). Any county that is not designated a metropolitan or micropolitan area is designated as a non-metro area. Revised every 10 years, the designations reported in this book, released in February, 2013, are based on 2010 census counts.

Source: Downloaded May 27, 2014 from the U.S. Census Bureau website: <http://www.census.gov/population/metro/data/def.html>

Rural / Urban Areas - The definition of rurality in this book is based on U.S. Census Bureau information about the percentage of county residents living in urbanized areas. Counties in which 50% or more of the population lives outside of an urban area or urban cluster are defined as “rural” in this book.

An urbanized area consists of densely developed territory that contains 50,000 or more people. An urban cluster consists of densely developed territory that has at least 2,500 people but fewer than 50,000 people. Geographic entities, such as metropolitan areas, counties, minor civil divisions, places, and census tracts often contain both urban and rural territory, population, and housing units. Based on results of the 2010 Census, the Census Bureau classified all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs) as “urban.” (See the definition of MSAs above for more information.) In general, these urban territories consist of areas of high population density and urban land use resulting in a representation of the "urban footprint" within a geographic area. Rural areas in a county are defined as all territory, population, and housing units located outside of urban areas and urban clusters.

Source: U.S. Census Bureau, Geography Division, data revised on March 26, 2012, downloaded August 20, 2012 from <http://www.census.gov/geo/www/ua/2010Urbanruralclass.html>.

Appendix II: Regional Definitions

Area Health Education Centers (AHECs):

Counties in South Carolina are assigned to AHEC service areas as follows:

Lowcountry AHEC	Allendale Bamberg Barnwell Beaufort	Berkeley Calhoun Charleston Colleton	Dorchester Hampton Jasper Orangeburg
Mid-Carolina AHEC	Aiken Cherokee Chester Fairfield	Kershaw Lancaster Lexington Newberry	Richland Union York
Pee Dee AHEC	Chesterfield Clarendon Darlington Dillon	Florence Georgetown Horry Lee	Marion Marlboro Sumter Williamsburg
Upstate AHEC	Abbeville Anderson Edgefield Greenville	Greenwood Laurens McCormick Oconee	Pickens Saluda Spartanburg

Metropolitan Statistical Areas (MSAs)

Counties in South Carolina are categorized as follows, based on 2010 census data and designation standards:

Metropolitan	Aiken Anderson Beaufort Berkeley Calhoun Charleston Chester Darlington Dorchester Edgefield	Fairfield Florence Greenville Horry Jasper Kershaw Lancaster Laurens Lexington	Pickens Richland Saluda Spartanburg Sumter Union York
Micropolitan	Abbeville Cherokee Georgetown	Greenwood Marlboro Newberry	Oconee Orangeburg
Non-Metro	Allendale Bamberg Barnwell Chesterfield	Clarendon Colleton Dillon Hampton	Lee McCormick Marion Williamsburg

Rural and Urban Areas

The U.S. Census Bureau has identified the percentage of a county’s population living in urban areas and the percentage living outside of urbanized areas. We are classifying a county as rural if 50% or more of the population is living outside of urbanized areas. Using that definition counties in South Carolina are categorized as follows:

Rural counties

- | | | |
|--------------|-----------|--------------|
| Abbeville | Dillon | Marion |
| Allendale | Edgefield | Marlboro |
| Bamberg | Fairfield | Newberry |
| Barnwell | Hampton | Oconee |
| Calhoun | Jasper | Orangeburg |
| Cherokee | Kershaw | Saluda |
| Chester | Lancaster | Union |
| Chesterfield | Laurens | Williamsburg |
| Clarendon | Lee | |
| Colleton | McCormick | |
| Darlington | | |

Urban counties

- | | | |
|------------|------------|-------------|
| Aiken | Georgetown | Spartanburg |
| Anderson | Greenville | Sumter |
| Beaufort | Greenwood | York |
| Berkeley | Horry | |
| Charleston | Lexington | |
| Dorchester | Pickens | |
| Florence | Richland | |

SC Department of Health and Environmental Control (DHEC) Environmental Affairs Regions

Counties in South Carolina are assigned to DHEC regions as follows:

Lowcountry	Allendale Bamberg Beaufort Berkeley	Calhoun Charleston Colleton Dorchester	Hampton Jasper Orangeburg
Midlands	Aiken Barnwell Chester Edgefield	Fairfield Kershaw Lancaster Lexington	Newberry Richland Saluda York
Pee Dee	Chesterfield Clarendon Darlington Dillon	Florence Georgetown Horry Lee	Marion Marlboro Sumter Williamsburg
Upstate	Abbeville Anderson Cherokee Greenville	Greenwood Laurens McCormick Oconee	Pickens Spartanburg Union

Perinatal Regions

Counties in South Carolina are assigned to Perinatal Regions by the SC Department of Health and Environmental Control as follows:

I – Greenville Memorial.	Abbeville Anderson Edgefield Greenville	Greenwood Laurens McCormick Oconee	Pickens Saluda
II – Spartanburg Regional	Cherokee Chester	Spartanburg Union	
III - Palmetto Health Richland . .	Aiken Allendale Bamberg Barnwell Calhoun Clarendon	Fairfield Kershaw Lancaster Lee Lexington	Newberry Orangeburg Richland Sumter York
IV - McLeod Regional.	Chesterfield Darlington Dillon	Florence Horry Marion	Marlboro Williamsburg
V - MUSC Medical	Beaufort Berkeley Charleston	Colleton Dorchester Georgetown	Hampton Jasper

For more information about Perinatal Regions see the South Carolina Health Plan enacted August 13, 2015 at <http://www.scdhec.gov/Health/docs/FinalSHP.pdf>.

Workforce Investment Board Regions

Counties in South Carolina are assigned to Workforce Investment Board regions as follows:

Catawba	Chester	Lancaster	York
Greenville	Greenville		
Low Country	Beaufort Jasper	Colleton	Hampton
Lower Savannah.	Aiken Barnwell	Allendale Calhoun	Bamberg Orangeburg
Midlands	Fairfield	Lexington	Richland
Pee Dee	Chesterfield Florence	Darlington Marion	Dillon Marlboro
Santee Lynches	Clarendon Sumter	Kershaw	Lee
Trident.	Berkeley	Charleston	Dorchester
Upper Savannah.	Abbeville Laurens Saluda	Edgefield McCormick	Greenwood Newberry
Upstate.	Cherokee	Spartanburg	Union
Waccamaw	Georgetown	Horry	Williamsburg
Worklink.	Anderson	Oconee	Pickens

*The South Carolina Office for
Healthcare Workforce is housed in the
South Carolina AHEC Program Office.*
